Message from the Chairman of the Board of Directors

Dear Shareholders,

Amid ongoing changes and business challenges. Twenty-Four Con & Supply Public Company Limited adheres to the philosophy of conducting business with morality, ethics, and social responsibility. To elevate the company to grow with good governance.

Due to the COVID-19 pandemic situation affecting all business sectors, the Company has been affected like other companies. However, the company has adjusted strategy and focused on entering bids for both public and private sector works. Maintain existing customer base and manage costs efficiently.

In 2023, the Company has increased business management strategy which helps increase the scope of accepting more jobs. Maintain existing customer base and create sustainable growth the Company's core strategies include:

- 1. Effective Cost Management: Tight cost control Focus on the efficient use of materials and technologies.
- 2. Creating quality work: Focus on standardized, safe work that meets the needs of customers.
- 3. Collaboration: Encourage teamwork. Leverage each employee's strengths to create effective results.

The Board of Directors would like to thank all stakeholders for their continued support. The company is committed to conducting business with good governance. Under the principles of Good Corporate Governance and considering the best interests of all stakeholders.

We sincerely hope for your continuous support in propelling Twenty-Four Con & Supply Public Company Limited towards success and sustainable growth.

-General Suchart Wongmak-General Suchart Wongmak Chairman of the Board of Directors

Message from the Chief Executive Officer

Dear Shareholders'

In 2023, has been full of challenges both economically and socially. Our business faces intense competition in both the public and private sectors. Volatile global economic conditions and the ongoing impact of the COVID-19 pandemic many waves that have far-reaching impacts.

In the midst of difficult circumstances. The Company is committed to developing its strategy continuously. Under the principles of good corporate governance to meet the needs of customers, business partners and all stakeholders. Lay the foundation for sustainable growth in the future and generate optimum benefits for all parties. By adjusting the management strategy in all dimensions. Strengthening the organization, focusing on em business scope, retaining existing customer base, expanding new reliable customer base, as well as expanding business into energy and household electrical appliances is in line with the Company's Synergy strategy. Expand business opportunities from existing customer base Partnering network and expertise in engineering and construction to expand new business to strengthen and increase the competitiveness of the organization in order to 148 achieve sustainable growth and create maximum benefits for all stakeholders.

Adapting strategies to meet challenges for 2023.

We enhance our management strategy in all dimensions. Strengthening the organization Focus on expanding the business scope as follows:

Expanding into energy: We see the potential of the energy business in the future. Therefore, it has expanded its investment in renewable and clean energy businesses to create new growth opportunities.

Household Consumer Appliance Business Expansion: We see an increasing demand from consumers. Therefore, the company has expanded its business to sell and install electrical appliances in the household to meet the needs of customers in a comprehensive way.

On behalf of the Company, I would like to thank our stakeholders for your confidence and support of our Company. Including the management team and all employees for sincerely help the company overcome challenges and develop the organization to grow steadily and sustainably.

-Mr.Yodsawee Wattanateerakitja-Mr.Yodsawee Wattanateerakitja Chief Executive Officer

O1 BUSINESS OPERATION AND PERFORMANCE

Structure and Business Operations

1. Policy and overview of business operations

Twenty-Four Con & Supply Public Company Limited ("24CS" or "the Company") and Twenty Four Home Company Limited ("24Home" or "the Subsidiary") operates as an importer and distributor of heating ventilation and air conditioner equipment for leading international brand, TROX. Moreover, the Company is a distributor of engineering of building assembly systems and small electrical appliances of various well-known brands such as TRANE, AAF, and KRUGER HONEYWELL and HAIER etc. Furthermore, in order to provide a one-stop services for clients, the Company also provides the engineering system installation services for building, and the turnkey construction services.

The Company divides its main business units into 3 business units as follows: 1) engineering system installation services are including (1.1) Heating Ventilation and Air Conditioning System (1.2) electrical and communication systems (1.3) Sanitary and fire protection systems, (1.4) Installation of sound insulation. The Company also provide additional construction services, such as civil works, architecture works, which are supported by the engineering system of the original building to facilitate the customers to become a contractor one-stop service in order to be able to respond to the needs of customers with full efficiency, deliver quality and standardized work within the agreed timeframe. However, the Company's building engineering system installation services are mostly in the nature of hiring only air conditioning and ventilation systems, separated from other systems. 2) Import and distributor of engineering of building assembly systems. It is the distribution of high-quality engineering products to contractors, project owners and other interested parties. 3) Energy business which provides services for producing and distributing steam energy on medium-long term contracts to project owners. Focusing on value for money in investment and energy management and Twenty Four Home Company Limited, a subsidiary of the Company which engages in the business of selling small air conditioners, household electrical appliances and related services through services on applications and selling products directly to project owners and interested parties.

Engineering of building assembly systems is quite complex which operators must have understanding and expertise in such work. The Company has experience in providing installation services for a variety of project types and continues to gain the trust of customers. However, the Company's current potential engineering team focuses on offering systems engineering products and provide complete construction services for all systems. In order to be able to respond to customer needs with full efficiency, deliver quality and standardized work within the period agreed upon together. As a result, the Company has been entrusted by customers in the installation of building engineering systems continuously. At present, most of the Company's customer base is the main contractor who is responsible for large-scale infrastructure construction such as electric train system, construction at airports, power plants, including power stations, office buildings, etc.

1.1 Vision, Mission, Operation Strategy, and business goals

Vision

To be a leading company in design, installation, system engineering and building engineering.

Mission

- Produce works of engineering system and building structure design with quality technology.
- Create the highest level of customer satisfaction.
- Build a good relationship with partners to become commercial partners.
- Strengthen the organization and employees.
- Build confidence, prosperity and peace with everyone in the organization, including stakeholders in a sustainable manner.

Business Goals

The Company commit to creating work that meets the designs and needs of customers in a timely manner for the highest level of satisfaction to customers and promotes building and maintaining good relationships with all partners by managing budgets within the specified limit and a clear operational plan to ensure efficient operation, including, good corporate governance, risk management and internal control systems for business continuity. In addition, the company has allocated good welfare for personnel, created a standard working system, concise and has a clear framework that is suitable for the operation of the organization, providing appropriate training for each department of employees to increase their skills.

1.2 Important Changes and Developments

2013 JUNE

Registered to establish Twenty–Four Con & Supply Public Company Limited with a registered capital of 1.00 million baht, consisting of 10,000 ordinary shares with a par value of 100 baht, located at 609/81, Pracha Uthit Road, Samsen Nok Subdistrict, Huai Khwang District, Bangkok, to import and distribute products related to air conditioning and ventilation equipment.

Began importing for distribution of products related to air conditioning and ventilation systems under the brand TROX, NICOTRA, FLOWTEC.

2016 MARCH

Mr. Yodsawee Wattanateerakitja and Mr. Santi Maneewong, who are executives of the Company, bought shares from existing shareholders and increased the company's registered capital to 5.00 million baht by issuing 40,000 additional ordinary shares with a par value of 100 baht and fully paid up in order to invest in expanding services and working capital in the business which after Mr. Yodsawee Wattanateerakitja and Mr. Santi Maneewong holds major shares of 50.00 % and 50.00 % respectively.

2019 JANUARY

Increased the Company's registered capital to 15.00 million baht by issuing 100,000 new ordinary shares, with a par value of 100 baht and fully paid up, for investment in service expansion and working capital.

Began distributing products related to air conditioning and ventilation systems under the brand KRUGER.

MAY

Increased the Company's registered capital to 25.00 million baht by issuing 100,000 new ordinary shares, with a par value of 100 baht and fully paid up, for investment in service expansion and working capital.

2021 JANUARY

Obtained ISO 9001:2015 (The trading, installation and maintenance of heating, ventilation and air-conditioning system, electrical system and plumbing system)

AUGUST

Increased the Company's registered capital to 150.00 million baht by issuing 1,250,000 new ordinary shares, with a par value of 100 baht and fully paid up, for investment in service expansion and working capital.

2022 MARCH

The 2022 Annual General Meeting of Shareholders resolved to transform into a public limited company by changing the name to Twenty-Four Con and Supply Public Company Limited, converting the par value from 100 baht per share to 0.50 baht per share and has a resolution to increase the registered capital of the company from 150.00 million baht to 215.00 million baht, divided into 430.00 million ordinary shares with a par value of 0.50 baht per share, with the allocation of 130.00 million newly issued shares to be offered to the public. On March 24, 2022, the Company registered the conversion from a limited company to a public limited company with the Ministry of Commerce.

SEPTEMBER

The Company offered IPO shares between September 23, 26 - 27, 2022 and have the first trading day on the Stock Exchange of Thailand on October 3, 2022.

2023 APRIL

The Company established a new subsidiary, Twenty Four Home Company Limited acquired 49,997 ordinary shares at a par value of Baht 100 each, totaling Baht 4.99 million, with 99.99% ownership interests. The subsidiary was incorporated for the business of sales and installation of air conditioning system and electrical including related services.

NOVEMBER

Obtained ISO 14001:2015, international standards for environmental management. The Company has continuously given importance to the environment by implementing the Environmental Management System according to international standards as a guideline for systematic management.

2023 DECEMBER

Expansion into energy business which entering into a long-term contract to sell steam energy including installation manage and maintain steam boilers.

2. Nature of Business

2. Distribution of small electrical appliances products (Household electrical appliances)

The Company is a distributor of small electrical appliances. Leading international standards from abroad which includes as follows.

3. Steam energy production and distribution services

The Company provides production and distribution of steam energy. This starts with studying the overall budget, evaluating worthiness and environmental impacts, providing materials and boiler design and provide consultation until the installation and operation of steam production through pipe systems for sale to customers with medium-long term contracts.

4. Contractor services for installation of engineering systems for building and related work

4.1 HVAC - Heating, Ventilation, and Air-conditioning system

The Company is able to provide installation services for air conditioning and internal environment control systems starting from procurement of materials, equipment, design and consulting to the installation process of air conditioning and internal environment control systems, consisting of;

- Large air conditioning systems using chiller systems for large buildings such as department stores, large office buildings.
- Split type air conditioning systems include air conditioning systems for buildings with small spaces such as residential buildings and condominiums.
- Variable refrigerant (VRF) air conditioning systems are air conditioning systems for medium-sized buildings that require efficient and energy-saving air conditioning systems.

- Highly accurate temperature and humidity control (CRAC) air conditioning systems, such as air conditioning systems in areas where there is equipment that requires temperature or humidity control, such as a data center.
- Cooling air duct system
- Air ventilation system
- Compressed air and smoke ventilation systems used in high-rise buildings for safety in evacuating people from the building in case of fire.

Examples of works for installation of air conditioning systems and internal environment control.

Installation of large air conditioners

Installation of cooling tower

Installation of ducts and cold air outlets Installation of a small air compressor

4.2 Soundproof System Installation Services

The Company is able to provide sound insulation installation contractors starting from the procurement of materials, design and consulting until the sound insulation installation process, consisting of;

- Sound-absorbing decorative walls are ready-made wall panels to reduce echoes or absorb sound.
- Acoustic panels for soundproofing are solid gray sheets covered with moisture-proof material.
- The ceiling absorbs sound and prevents heat well. It is easy to install with a T-bar ceiling, suitable for offices, conference rooms, shopping centers.
- Prefabricated ceiling panels reduce echoes and absorb sound, can be used with a truss system for offices.

Examples of soundproofing installation services

Installation of a soundproofing system

4.3 Sanitary & Fire Protection System Installation Services

The Company's installation services for sanitary and fire protection systems cover from the procurement of materials and equipment, consulting, design, system implementation and installation, consisting of;

- Plumbing system, including installation of prefabricated water tanks or concrete tanks, water pumps, pipes and water valves to pump water to users in different parts of the building such as bathrooms, kitchens, various machinery equipment.
- Wastewater treatment system, including the installation of prefabricated wastewater treatment tanks, concrete tanks, wastewater pumps, pipes and water valves to transport wastewater from use to be treated before releasing to public areas with the value according to legal standards.
- Drainage system such as rain water drainage system of buildings or areas within the project, flood protection system
- Fire extinguishing system, including fire extinguishing systems with dry or wet pipes, installation of fire pumps using electric or oil engines, pipes and water valves, water distribution heads, fire hose cabinets and fire extinguisher.
- Clean agent fire extinguishing systems, including fire suppression systems that use special fire extinguishing agents for use in areas that require high safety to prevent damage to equipment or people such as FM-200, CO2, IG-100, NOVEC, and Water-Mist.
- Liquefied Petroleum Gas (LPG) system, including the installation of LPG cooking gas distribution stations for use within the building.
- Compressed air system, including air compressor system for use with industrial machinery.

Examples of works for installation of sanitary and fire protection systems

Installation of water pipe systems in buildings

Installation of water pumping system

Installation of sewage system

Installation of a water pump control cabinet

4.4 Electrical & Communication System Installation Services

The Company is able to provide electrical and communication installation contractors starting from the procurement of materials, equipment, design and consulting to the installation of electrical and communication equipment, which consists of;

- High-voltage electrical system, such as the expansion of the overhead HV line, the installation of underground HV cables, voltage from 12 – 33 kV, the installation of transformers and protection devices to adjust the voltage from the Metropolitan Electricity Authority or the Provincial Electricity Authority to be low voltage for indoor use.
- Low voltage electrical system, including the installation of a low voltage panel (Main Distribution Board & Distribution Board) to supply electricity at 400/230 volts for lighting systems, electrical sockets, and power systems for use with various equipment.
- Uninterruptible power system, including the installation of a generator for continuous or temporary operation (Standby), installation of a large emergency uninterruptible power supply (UPS), for buildings that need electrical stability or have equipment that is necessary or must be used continuously all the time, such as hospitals, computer centers.
- Telephone system, including the installation of PABX, signal distribution boxes, signal cables and telephone sockets.

- Computer network, including the installation of UTP computer cables, Fiber Optic signal distribution equipment, cable testing.
- Fire alarm system such as conventional or addressable heat and smoke detectors, HSSD-High Sensitivity Smoke Detector.
- Announcement system, including the installation of sound system equipment for the central areas of the building, such as corridors, halls, for use in announcing or reporting incidents.
- Visual and audio system, including installation of visual and sound equipment for meeting rooms, seminar rooms.
- Closed-circuit television system, including the installation of closed-circuit television cameras, video recording systems for use in security or for surveillance of events within the area.
- Television signal system, including the installation of television broadcasting systems by receiving signals from television antennas, satellites or internet signals.
- Access control systems such as door access control systems, barriers, elevators, smart card systems.
- Burglar alarm systems, including motion detection alarm systems.
- Building automation management and control systems, including centralized control systems for controlling the operation of various systems such as lighting control systems, air conditioning and ventilation systems control, water pumping system control and the building's electrical control system.

Marketing and competition

Competitive strategy

1) Variety of products to support the needs of customers in each industry group

The Company aware of the needs of customers that are different in each application in each industry group. Therefore, the company focuses and gives importance to supplying a variety of products in terms of usage, features, and applications, as well as, a variety of product brands to be able to meet all the needs of customers in all target groups. In addition, the Company also increases options for customers who care about the environment and energy saving by having products designed for energy-efficient buildings or meeting Green Building standards to meet the demand for products of customers who want to reduce emissions greenhouse gases and adapt to Climate Change according to the direction of the world in the future as well, and the management monitors changes in technology and new innovations in order to find products that best meet the needs of consumers.

2) Cost effective management

Since the business of construction of building engineering systems is a business that relies on resource management processes including planning, design, inventory management, planning in the management of materials and equipment used for installation, as well as labor management, therefore, the Company focus on resource management, especially the cost management process to increase efficiency and reduce work losses. The Company has introduced the ERP (Enterprise resource planning) system to help in the management, which will increase the efficiency of management and reduce redundant work and help the Company's executives to receive accurate and clear information and be able to make decisions in a timely manner, while project engineers can also control the withdrawal and use of materials in each project according to the plan.

3) Experience and expertise of executives, sales and engineering teams

The Company's executives, sales team and installation engineers are experienced personnel with expertise in the contractor and installation of air conditioning and indoor environment control systems, as a result, the Company's executives and teams are able to analyze and understand the process of construction design and installation, as well as being able to develop and extend engineering techniques to be applied to a variety of work processes as well. The Company can provide a full range of design and installation services for building engineering systems, starting from consulting, designing, procurement and installation services to after-sales service. In the past, the Company was able to deliver standardized works within the specified time, resulting in the company gaining the trust of customers and continually receiving new projects from the same employers.

4) Develop the knowledge and competence of personnel on a regular basis.

The Company gives importance to its personnel and supports the development of knowledge and abilities to increase work efficiency with quality and standards, which will be a factor promoting the improvement of work in the organization as a whole. The Company supports internal training for personnel both through on-the-job training from personnel with expertise and experience in each department who will transfer their knowledge in terms of academics and skills from the experience of actual operations, including encouraging employees to attend seminars about engineering knowledge to learn new techniques and technologies in installation and construction work.

5) A Quality and Strategic Partnerships

Our company has earned a stellar reputation for the exceptional quality of our building engineering system installations. This commitment to excellence, coupled with our strong partner relationships, yields several key benefits. Firstly, our established clientele consistently demonstrates their trust by selecting us to participate in bids for new projects. Secondly, we consistently secure new client referrals from prominent general contractors, project consultants, and other industry partners – a testament to our positive reputation. Furthermore, we remain steadfast in our commitment to continual organizational improvement. Our dedication to upholding international standards is evidenced by our certifications in both ISO 9001:2015 (Quality Management Systems) and ISO 14001:2015 (Environmental Management Systems). These certifications encompass all aspects of our operations, including sales, installation, and maintenance of heating, ventilation, air conditioning (HVAC), electrical, and plumbing systems. By adhering to these rigorous standards, we ensure consistent delivery of high-quality work that exceeds client expectations. Moreover, our commitment extends to minimizing environmental impact, reflecting our holistic approach to project execution.

6) Customer Retention

In addition to always selling quality products to customers, maintaining the existing customer base to continuously and consistently buy and use the service is another important factor in business operations and to create stability of the Company, therefore, the Company is committed to distributing quality products and meeting the needs of customers that may change, including planning customer relationship management or doing Customer Relationship Management (CRM) so that the Company can meet the needs of customers. There is communication through a marketing team that can communicate and respond directly to the needs of the Company's customers. Besides maintaining the current customer base, the Company also focuses on expanding the new customer base. The marketing department is responsible for communicating in order to make an appointment with new customers to introduce the Company, as well as offering products and services to be recognized in order to continually expand the customer base.

Pricing policy

As for building engineering products and air-conditioning and ventilation systems sold by the Company, the Company will set selling prices based on cost plus margin (Cost plus Margin) under the approval authority and policies set by the Company. The incremental profit margin set by the Company will be based on market competition and economic conditions at that time, which is another factor in setting prices in order to create business advantages to be able to compete in the market. While in terms of pricing for construction services, it will start from the estimating department, who will receive information and details of the project from the sales department to estimate the cost of sales and installation of the project and prepare Preliminary Bill of Quantities (BOQ). The price information in BOQ for general equipment will be considered from the price list prepared in the database. As for government projects, there will be a median price used for that project, while the amount of materials and equipment and labor costs will be determined according to the construction drawings that differ from project to project. After that, the executives and related parties will have a meeting together to consider additional construction-related costs, such as employee salaries related to the project, depreciation, and indirect costs such as the value of performance guarantees as factors for price consideration used in making a reasonable bid to know the true cost of each project and then add the appropriate profit margin.

Target customers and distribution channels

The building engineering system is considered an important component of the construction of buildings and infrastructure systems. Therefore, the Company's target customers are scattered in a variety of industries such as power plants, industrial plants, buildings, hospitals, hotels, etc. The Company provides services that can meet the needs of customers very well and with quality as well as always create satisfaction for customers, therefore the Company has been continuously trusted in new projects. As for the distribution of air conditioning and ventilation system products, as well as the construction of the Company's engineering system construction services, most of the Company's building systems are hired and received from main contractors in the form of sub-contracts, which is in line with the Company's policy to accept work from large private contractors with credibility and good financial status in order to reduce the risk of payment default. The management and marketing department of the Company will use the method of telephone calls or emails to meet with existing customers who have worked with them directly or contacting new target customers that the sales and marketing department expects to use the Company's products or services to open up new customer bases. Including tracking news about project launch plans from a variety of media such as websites, newspapers for projects that are private agencies and news from announcements on the procurement system of the Comptroller General's Department for projects belonging to government agencies.

Industrial conditions

Thailand's construction industry is poised for growth of 3.0–3.5% in 2024, driven by exports, tourism, and government investment, particularly in large-scale projects like the Eastern Economic Corridor (EEC). This presents a significant opportunity for the company, a leading engineering systems installation company.

Strengths and Market Fit

The company is well-positioned to capitalize on this growth. The company boasts a strong customer base encompassing power plant, office buildings, hotels, and government projects. Notably, over 63% of their revenue in 2023 stemmed from building system installation contracts, showcasing their expertise in this crucial area.

By entering the energy market, the company has made a prescient diversification move that is demonstrating strong growth potential.

Challenges and Strategic Response

However, the company faces challenges including fierce competition, rising construction costs, climate change concerns, and the push towards Net Zero goals. To navigate these hurdles, the company follows;

Focus on large-scale government projects: By leveraging their experience, they can actively pursue contracts associated with the EEC and other infrastructure initiatives.

Invest in skills and technology development: This will enhance efficiency, potentially reducing costs and improving project delivery.

Embrace sustainable practices: Adapting to climate change and Net Zero targets requires exploring eco-friendly materials and construction techniques.

Develop strategies to manage cost pressures: Addressing rising labor and building material costs might involve innovative sourcing, negotiation tactics, or exploring alternative materials.

Competitive conditions

Due to the Company's experience and expertise in the construction of air-conditioning system and internal environment control contractors, the Company has a database to use in estimating prices and bidding for works in a variety of industries, including commercial construction such as office building group, condominium group, department store group and industrial construction such as power plants, industrial factories laboratory building group, etc. Therefore, although the overall economy of the country is still facing volatility from both internal and external factors that cause construction work in some industries to slow down, it may increase the competitive advantage for contractors who have experience in construction work and have financial readiness, which is an important factor to increase the chances of winning the project bid.

Procurement of goods, materials, and equipment

The Company has a policy to purchase each type of raw material from many suppliers by comparing prices, negotiating prices, preparing a selection summary report, and attaching documents with complete quotations from vendors or service providers. However, the Company will select raw materials by considering quality, price, trade conditions and characteristics of raw materials.

Labor recruitment

The Company recruits and selects sub-contractors from the AVL register of contractors of the Company by considering the contractor's qualifications, quality of work, expertise, ability to deliver work on time, service after delivery and experience together in the past from the contractor's evaluation data. To be a factor in the selection, especially the work experience similar to that project. In addition, the Company also considers the financial status of the contractor company as an element. To ensure that the installation of engineering systems for building and construction of the company meets the quality standards and can deliver the work on time. The Company has a team of engineers at the site to supervise every step of the operation. With such a mechanism, the Company can manage the contractor to be able to deliver the work to the company on time as specified.

Assets used in business operations

As of December 31, 2022, and December 31, 2023, the Company has Assets used in business operations consisting of;

Property, plant and equipment and right of use assets

As of December 31, 2022, and December 31, 2023, the assets used in the Company's business operation are property, plant and equipment and right-of-use assets, details as follows.

<u> </u>			k Value n baht)	Ownership	
Category	Utilization	December 31,	December 31, December 31,		Obligations
		2021	2022		
 Leasehold improvements 	Head Office	0.19	3.40	Long Term Rental	None

6. Dividend paid policy

The Company has a dividend payment policy of not less than forty (40%) percent of the net profit according to the separate financial statements. After deducting taxes and statutory reserves and other reserves (if any), the Company will consider dividend payment taking into account various factors. The dividend payment must not have a significant impact on the Company's normal operations. The dividend payment is subject to change. It will depend on operating results, financial position, liquidity, working capital needs for operations. Investment Plan and Business Expansion in the Future Market conditions Subject to the condition that the Company shall have sufficient cash for its business operations and such action shall be in the best interest of the shareholders as the Board of Directors and/or the shareholders of the Company deems appropriate, the resolution of the Board of Directors approving the payment of dividend shall be presented for approval to the shareholders' meeting, except for the payment of interim dividends for which the Board of Directors has the authority to approve the payment of interim dividends and shall report to the general meeting of shareholders at the next meeting. Dividend payment is prohibited from any type of money other than profits. In the event that the company still has accumulated losses. No dividend shall be paid, except in the case of preferred shares otherwise specified by the regulations. The dividend payment must be approved by the local government.

Risk Management

1. Risk Management Policy and Plan

The Company realizes the importance of risk management along with its business operations in order to achieve the Company's strategic plan and main goals under acceptable risk. It encourages and encourages all employees and all levels involved in risks to have an understanding. Mutual Awareness and Responsibility in Risk Management Control and supervise the impact of risks on the Company. The Company has a risk management policy and plan. as follows

- The Board of Directors has assigned the Risk Management Committee to be responsible for setting the framework. Evaluate, approve the risk management plan and monitor the risk management, and assign the audit committee to monitor and audit the risk management system to ensure that the risk management is implemented as planned throughout the organization. Everything. The Risk Management Committee and the Audit Committee should communicate with each other to understand significant risks and link them to internal controls.
- 2) Require a process Guidelines and management measures to support risks and ways to reduce impacts on risks, including risk analysis of internationally appropriate and adequate quality, including identification of both internal and external factors. Analysis, assessment of impacts and opportunities of risks, sequencing, management, controlling, monitoring, reporting, as well as evaluating risks continuously, and implementing them throughout the organization and its affiliates.
- 3) The Company has used the Three-line of Defend Model to review the performance of risk management by requiring the first line to be the risk owner, which is all employees and executives to supervise their work to meet the objectives under appropriate risk. The second line is the management team in charge of risk management or supervisor, which sets rules and standards, including overseeing work and communication in accordance with the specified criteria, and the third line is the internal auditor, which will ensure the adequacy and effectiveness of governance and risk management.
- 4) Require ongoing risk communication. The Charter of the Risk Management Committee and the Audit Committee has been prepared and reviewed annually or whenever there is a change in circumstances. In addition, a risk management manual has been prepared as a communication and framework for effective risk management.
- 5) Defining risk is one of the corporate cultures: The Company encourages and raises awareness among all executives and employees about the importance of risk management and regularly implements it.

32

2. Risk factors for the Company's business operation

Investors should carefully consider risk factors and any other information contained in this document before making an investment decision that may affect the operating results and value of ordinary shares of Twenty–Four Con & Supply Public Company Limited (the "Company"). Therefore, other risk factors not mentioned in this document or risks that the Company deems to be immaterial to the Company's current business operations may be risk factors that may affect the Company's business and/or performance in the future.

Other than that, statements in the form of forecasts of what may happen in the future. Estimates and assumptions Such as "believe," "expect," "see," "may," "have a plan," or "approximately," etc., as well as any other words or statements that convey similar meanings, including business planning. Earnings estimates future Changes in laws and/or rules relating to the Company's business operations Government policies and others are just speculations about what might happen in the future, and the actual outcome may differ significantly from what was predicted.

Risk factors, whether internal or external factors, that may affect the Company's future operating results, as well as returns from investing in the Company's ordinary shares. The following conclusions can be drawn.

2.1 Risks to the Company's business operations

1) Risk from Revenue Discontinuity of Building Engineering System Contractor Business The Company's main business can be classified into 2 types: 1. Sales of building components such as air conditioning systems and ventilation systems and other related equipment. The Company is a distributor of air conditioning and ventilation products in popular brands such as TROX, TRANE, NICOTRA, FLOWTECH, etc., and has been selling continuously for a long time. Therefore, the Company has a customer base with a certain number of repeat orders, so it is quite continuous in terms of income from business operations. and 2. Building engineering system installation business, in which revenue from construction work is recognized according to the completion rate of the work completed, which is in accordance with accounting standard No. 15 on revenue from contracts with customers. If the company faces the problem of discontinuity of income of the building engineering system contracting business. In the event that the company is unable to construct the work according to the plan. Increase or decrease some tasks The company may need to extend the working period. As a result, the company may not be able to complete the work within the stipulated time as originally planned. In addition, the Company faces the risk of not being able to bid for new works as planned, which is a constraint and causes a lack of continuity of revenue, which may directly affect the Company's performance to not meet the target. Especially in the face of economic stagnation or strong price competition, most building engineering contractors use competitive price methods in bidding. In addition, nowadays, there are more entrepreneurs entering this type of business.

In order to mitigate the aforementioned risks, the management will regularly monitor the news of the tender. Meanwhile, the marketing department will prepare a plan and coordinate to arrange a meeting with customers, especially the main contractor. In order to know the construction bidding work, inform the estimation and procurement department to prepare information to analyze and study the details of the cost and expense budgeting of each project in advance in order to increase the potential to estimate the cost and expense budget in each project, which will result in the company having a better chance of getting a job or winning the bid. In addition, the Company remains committed to maintaining service quality to create customer satisfaction and trust in terms of accuracy and engineering principles. This includes taking care throughout the warranty period of construction works, which usually has an average warranty period of about 1-2 years from the date of delivery of the work to the customer. As a result, the company has expertise in the project model of that customer, which is considered an advantage of the company in such matters.

In 2023, the Company's revenue from the building engineering system installation business amounted to 435.75 million baht. In 2023, the Company earned 675.14 million baht from the building engineering system installation business. It accounted for 68.99% of total revenue

2) Risks from inaccurate construction cost estimates

Before the company offers building engineering system construction services or participates in the bidding of building engineering system contractors from customers. The Company must always go through the process of preparing a Construction Cost Estimate (BOQ) before every time, with the objective of knowing the cost budget used for construction and to support the initial bidding. Therefore, if the company does not analyze and estimate the construction cost accurately. As a result, the cost of construction used is lower or higher than it actually is. This may expose the company to several risks, such as if the company underestimates the cost of construction. This may cause the company to incur losses from the implementation of that project or may not perform as planned. Whereas, if the company estimates the construction cost too high. As a result, the price used to offer a job or use it in an auction is higher than competitors. As a result, the company cannot compete with competitors and may lose the opportunity to get a job in the end.

This is to reduce the risk of inaccurate construction cost estimates. Therefore, the Company has carefully put in place measures to prepare construction cost estimates in accordance with the following guidelines:

 The system has work modules that support construction planning and linkage between different departments, thus allowing for more systematic and accurate construction budgeting planning.

- 2) Prepare operational manuals, especially in the cost estimation and operation sections, to have a detailed and step-by-step process so that relevant employees have concrete operational guidelines and reduce errors in cost estimation.
- 3) Assign the procurement department and the cost estimation department to store a database of the cost of construction materials used. In the past, such as the price of goods or materials that the purchasing department used to negotiate and order with distributors. This allows the company to use it as a reference in preparing construction cost estimates for accuracy. In addition, the database allows the procurement department to use negotiations to lower the purchase of goods or materials in the future.
- 4) Assign the marketing department to collect the price data used in bidding and bidding for both the job and the company in order to analyze the success and mistakes for strategic planning for the next bid or bid. In addition, during 2020 2023, the Company had a total of 30 construction projects, but none of them were found to have underestimated and underestimated construction costs, resulting in losses from the main contract. In addition, during 2020 2023, the Company had a total of 30 construction costs, resulting in losses from the main contract. In addition, during 2020 2023, the Company had a total of 30 construction projects, but none of them were found to have underestimated and underestimated construction costs, resulting in losses from the main contract. This is an indication that the Company's project cost preparation process has a reasonable risk control mechanism.

3) Risk of price changes in the cost of materials and equipment used for installation

Since the form of the Company's service contract usually stipulates a fixed value of employment at the date of the contract, the Company must manage the use of resources to be adequate. Both in terms of quantity and management, the procurement of materials and equipment shall be within the framework of the project budget. Therefore, in the event that the price of materials and equipment rises and the Company is unable to negotiate the price from suppliers, or if the Company does not manage and plan the procurement of materials and equipment to meet the demand in accordance with the predetermined wage price. The Company will not be able to claim that the Co-Employer is responsible for the price fluctuations of such materials and equipment with the Employer as specified in the contract. so Therefore, the increase in the price of materials and equipment may affect the cost control of the project and may cause the profit margin of such project to not meet the Company's expectations or calculations, or may even cause losses.

moreover The Company has measures and policies to reduce the risk from changes in the cost of materials and equipment by establishing operational procedures for the Company's procurement department to oversee negotiations and consider the purchase of materials and equipment to meet the demand for each project. The procurement department will use the method of collecting the amount of material demand from projects that the company has already contracted with customers in many ways. Projects and projects with the certainty that the company will receive work in the future in order to have a sufficient order volume. In order to gain the power to negotiate a lower unit cost price from the distributor as well as negotiate with trading partners who have been trading continuously, submit a bid for materials and equipment before the start of the bidding to use the information to estimate the installation cost and after the company receives the work, it will start issuing purchase orders to set a fixed purchase price for materials and equipment throughout the construction period of that project. in advance however In the past, the Company has not been affected by the increase in the price of materials and equipment that caused damage to the Company's consolidated operating results.

In 2023, the cost of materials and equipment increased, with the above risk management measures, resulting in the Company maintaining the proportion of material and equipment costs close to the same level as in 2022

4) Risk of labor insufficiency

Managing and allocating sufficient number of workers to meet the needs and meet the construction plan is the heart of the building engineering system installation business, as it requires a large number of skilled workers to enable the company to deliver work to customers as specified in the contract. Therefore, if the company does not manage the number of workers well enough, it may affect the company not being able to deliver the work to the customer on time and may result in the company incurring penalties due to late delivery or higher costs than the company estimates due to the need to extend the period of employment of workers according to the extension of the working period. It also reduces the credibility of the company and may affect plans to accept work or bid for projects in the future. This is to reduce the risk of labor shortage. The company has planned to procure labor to suit the size. In order to ensure that the company will be able to complete the work according to the delivery schedule specified in the contract, the company does not provide sub-labors such as power outlet installation workers. However, the company manages labor costs by hiring labor through subcontractors, where the subcontractor will provide labor to install the system with the company's engineers supervising the installation to meet the building engineering system standards. Compared to the full re-establishment of the department, which will cost both employee wages and benefits, and to increase the certainty that

the company will be able to find subcontractors who will provide enough construction /installation labor to meet the company's labor needs. Therefore, the Company has prepared the AVL (Approved Vendor List) to select qualified and experienced subcontractors according to the conditions specified by the Company. The Company's management still believes that the Company is able to effectively manage the supply of sufficient labor to meet the Company's needs. In 2023, the Company has 88 workers, which is sufficient level for construction projects.

5) Risk of relying on income from a small number of key contractors

Due to the limitations of the construction business, employers tend to outsource the main project contractor on a turnkey basis. (Turnkey project) without discriminating the nature of civil works. Architecture and system work are clearly separated. Therefore, the company had to offer the construction of the building engineering system from another main contractor as a subcontractor. As a result, the Company's customer base is mainly construction operators, who are the main contractors of the project. Everything. The reason why the company derives its income from such main contractors is because of the company's business policy to take over work from trustworthy operators. With a strong reputation and financial position, the Company chose to contract the construction of the building engineering system from the main contractor. however Recognizing such risks, the Company has a policy to increase qualifications to meet the criteria for direct acceptance as a main contractor, such as expanding the registered capital base and establishing a joint venture PLE24, which is a joint venture established by the Company with Powerline Plc. The implementation of this strategy will help the company to have a portfolio of references and will allow the company to expand its customer base to accept jobs directly to government and private sector customers without the need to go through the main contractor. for example In addition, executives and marketing departments continue to seek opportunities to bid for work either from other key contractors or directly to employers in order to reduce their dependence on income from a small number of key contractors.

6) Risk of relying on income from a small number of key contractors

Due to the limitations of the construction business, employers tend to outsource the main project contractor on a turnkey basis. (Turnkey project) without discriminating the nature of civil works. Architecture and system work are clearly separated. Therefore, the company had to offer the construction of the building engineering system from another main contractor as a subcontractor. As a result, the Company's customer base is mainly construction operators, who are the main contractors of the project. Everything. The reason why the company derives its income from such main contractors is because of the company's business policy to take over work from trustworthy operators. With a strong reputation and financial position, the Company chose to contract the construction of the building engineering system from the main contractor. however Recognizing such risks, the Company has a policy to increase qualifications to meet the criteria for direct acceptance as a main contractor, such as expanding the registered capital base and establishing a joint venture PLE24, which is a joint venture established by the Company with Powerline Plc. The implementation of this strategy will help the company to have a portfolio of references and will allow the company to expand its customer base to accept jobs directly to government and private sector customers without the need to go through the main contractor. for example In addition, executives and marketing departments continue to seek opportunities to bid for work either from other key contractors or directly to employers in order to reduce their dependence on income from a small number of key contractors.

7) Risks from changes in government policies or regulations

The company focuses on accepting work as a subcontractor. For the installation of building assembly engineering systems from the main contractor. It is mainly a government project. Therefore, changes in government policies or regulations may affect the Company's performance in bidding for projects that may occur in the future. In addition, other government policy amendments such as LTV (Loan-To-Value) measures or the ratio of home loans to value set by the Bank of Thailand. It also affects investors in buying speculative housing. Therefore, such measures will indirectly affect the Company's business operations. That is, when investors who invest in the real estate market have a decrease in their desire to buy housing. Project owners will also delay the launch of projects. As a result, the Company received a decrease in the installation of building engineering systems.

The Company is aware of the potential risks. Stay up-to-date on changes in government policies or regulations. If there are changes that may affect the Company's operations, an internal meeting will be held to discuss various risk issues that may arise, both from direct and indirect risks, in order to find solutions to problems or reduce such risks.

8) Risk of failing to deliver work in time for the specified time frame

The problem of delay in the installation of building engineering systems is an inevitable problem. This is due to a variety of factors. Both from cases of delays from the project owner, such as delayed delivery of space. or in case of delay from the Company's operation, such as the failure of the subcontractor to deliver the work as agreed with the Company. Or it may be caused by force majeure events that are beyond the expectations or control of both the employer/project owner and/or the company, such as epidemics or natural disasters, etc. When there is a delay due to any factor, it will have negative consequences and affect all parties. Both in terms of increased costs. If it is not possible to reach a conclusion on the cause of the delay together. This may affect the overall operations of the company and, moreover, the reputation of the company, which will have a lasting impact on future job acceptance.

To mitigate such risks, the Company assesses the expected duration of operations as realistically as possible and carefully examines the draft contracts with all customers. The project manager is responsible for overseeing the work of each project. Clearly establish a work plan for supervising the work of subcontractors. In addition, the company's management holds a follow-up meeting of each project at least once a month to receive reports from project managers and can call a meeting immediately in case of problems. In order to be able to seek advice from the management to resolve the problems encountered, the company has steps to take. 1. Meeting between project owners and project consultants. Structural construction contractors and related parties to discuss operational guidelines at an early stage in the event of an incident that may cause the construction work to not go according to plan. 2. Send an email explaining the reasons and guidelines as discussed together to the employer. 3. Issue a letter of reservation to extend the delivery period from the specified in the contract to the

employer to clarify the reasons and necessity for the delay. The said disclaimer will be signed in writing by both parties for acknowledgement. In the past, the company has never been demanded to pay a penalty for late delivery. In addition, the company has been certified according to the quality management system ISO 9001:2015, which is internationally accepted. In addition, the Company has prepared the S-Curve in each project as a tool to track the management of each project to see what percentage of the project has progressed. Is it in line with the plan and timeframe? If the plan is not followed, a meeting will be held with stakeholders to determine the cause and take corrective action in a timely manner.

2.2 Financial Risk

1) Risk of not being able to charge for subsequent amendments or additions

During the installation of building engineering systems, the customer may request to amend or add to the scope or nature of the work, which is usually done by the company before the price of such work is finalized. In order to ensure the smooth and fast execution of the installation. Prior to receiving a written confirmation of the order containing the price of the work to be revised or supplemented by the customer, the Company must bear the cost of the work incurred other than as agreed upon in the document confirming the employment order or the main contract, and this may result in the Company facing the risk of being negotiated at a price lower than the Company's estimate. As a result, the minimum profit margin of such projects has been reduced, as well as the inability to charge for the work. Sections that can be amended or added

Recognizing such risks, the Company has established a policy to control the risks that may arise from the inability to collect money from the revised or supplementary work. A frontline engineer will conduct an initial assessment of the situation. The company must first be instructed to complete changes or additional work in writing from the client. The project engineer will prepare a report summarizing the details of the changes already carried out. This must specify the date, nature of work provided, and calculate a summary of the value of such work to be submitted to the customer/project owner for review and used as supporting documents to collect payment from the customer. however In some cases where the Company wishes to maintain business relationships, the Company may consider additional price reductions for certain clients, but this must not affect the minimum gross profit estimates set by the Company within the framework of the approval authority approved by the Board of Directors

2) Risk of late or non-payment from customers (delinquent receivables)

The process of collecting payments from customers in the construction business is more complicated than other types of businesses. In other words, the company must perform installation services before it can charge the customer. The customer request is based on the completion of the work, which must go through the process of accepting the work from the employer or project owner. Therefore, during the pre-billing period. The Company will have to bear the costs and expenses incurred during the operation, thus the Company may face the risk of not being able to collect payments from customers or customers paying late processing fees. This is often due to the complexity of the process of job acceptance and disbursement of clients. Employers or project owners according to the hierarchy, while government customers who will have a budget disbursement process which may not correspond to the duration and completion of the work.

Therefore, in order to reduce the risk of delayed receipt or delinquent receivables, the Company has given importance to the process of considering the selection of work or bidding for various works, both from private and public sector customers. Always consider the employer's history and financial status before accepting a job. The Company also has a strict internal control system for tracking payments from customers, with the Company requiring the Accounting and Finance Department to monitor the payment process when payments are due according to the customer's billing cycle in each period, as well as prepare a summary report of outstanding receivables to report to management on a weekly basis. In the event that the customer pays late for more than the specified period. Alternatively, the operations department will assist in tracking payments with customers. The company is currently facing the customers exhibiting either payment arrears or an elevated risk of delayed or defaulted payments. To address this, a comprehensive credit control strategy has been implemented. This strategy involves ongoing customers engagement to facilitate the gradual settlement of outstanding receivables. The Company proactive monitoring efforts have ensured that the current state of customer payments remains within acceptable.

3) Risk of reliance on financial assistance from major shareholders and persons who may have conflicts

In business operations in the past to the present. The Company has procured financing from loans from financial institutions. The majority shareholder is the guarantor, which is in accordance with the terms of the loan agreement entered into with the financial institution. If in the future, the majority shareholder group refuses to provide assistance in terms of guarantees. The Company may face the risk of not being able to procure financing for its business operations, resulting in the inability to execute the recruitment plan or bid for the work as scheduled. It also affects the company's operating results.

However, when the company undergoes the transformation from a limited company to a public limited company and is listed on the stock exchange. The company will gain more credibility from financial institutions. Since the Company's performance has been audited by various departments in many stages, the Company can source financing from financial institutions more conveniently. This includes offering newly issued ordinary shares to the public and requesting permission to the Stock Exchange of Thailand to consider accepting ordinary shares for listing on the Stock Exchange of Thailand, which is another channel through which the Company will receive funding from fundraising from interested parties in this venture.

4) Risks from the spread of coronavirus

The coronavirus (COVID-19) pandemic since 2019 has affected the overall economy. As a result, many entrepreneurs are unable to open or operate normally. On the consumer side, they have less purchasing power because they have to save money for essential expenses or emergency expenses if the unexpected happens. In addition, financial institutions have increased the conditions for entering into credit contracts. As a result, private sector operators decide to delay the expansion or postpone the construction of new projects in the future, and the competition for bidding for new works has intensified due to the decrease in the number of new construction projects due to the slowdown in investment by entrepreneurs in many industries. In addition, in the event of the COVID–19 pandemic. In the construction area or within the Company's offices, it may be necessary for the Company to stop or delay the construction of the work and, as a result, increase costs beyond the Company's estimates.

Recognizing such risks, the Company has taken measures to respond to the COVID-19 pandemic by establishing important policies such as increasing the frequency of regular cleaning of workplaces. Provide soap, alcohol hand sanitizer to employees and related parties, as well as arrange for fever screening. Screening employees before entering construction sites and offices. Preparation of alternate worker camps. Establish a backup plan to provide guidance to employees in the event of an emergency. Procurement of vaccines for preventive vaccination of employees and workers, etc.

2.3 Management Risks

1) Risk of dependence on key executives

Since Mr. Yodsawee Wattanateerakitja and Mr. Santi Maneewong are the main executives and major shareholders of the Company, who have been involved in the main management of the Company since the early stages of the establishment of the Company until now. Therefore, it is considered a group of people who are important in management. They are also knowledgeable and experienced in the building engineering system installation business. If the company changes the principal executive. The Company may face risks affecting the Company's management and operating results.

Recognizing such risks, the Company has established a Succession Plan and Talent Management policy to reduce the risk of dependence on key executives that may arise. The company will be open to feedback on the selection of training topics from all employees. To increase the efficiency of procurement and application of training to meet the needs of employees and meet the line of work as much as possible. This will result in employees being able to deliver quality work and achieve the goals set by the company.

2) Risks from having a major shareholder group that influences operations

After the IPO of newly issued ordinary shares The Company still has a group of major shareholders, namely Mr. Yodsawee Wattanateerakitja and Mr. Santi Maneewong, who are the same major shareholders, holding a total of 210.00 million shares or 48.84% of the paid-up capital of 215.00 million baht. so If such a group of shareholders votes at the shareholders' meeting in the same direction. Except for the provisions required by law or the Company's Articles of Association to obtain three-fourths of the votes of the shareholders' meeting, other shareholders may not be able to gather enough votes to carry out checks and balances on matters proposed by the majority shareholder group.

Recognizing this risk, the Company has appointed 3 independent directors out of a total of 6 directors. The number of independent directors is half of the total number of directors. Audit directors and independent directors are independent persons with educational qualifications and qualifications, as well as knowledge and ability to protect the interests of minority shareholders. In addition, in deciding to act or omit to do any act. The Board of Directors has a policy to operate with the interests of shareholders in mind and if the Company needs to enter into transactions with persons who may have conflicts. The Company will strictly comply with the procedures for approving related transactions and the rules announced by the Securities and Exchange Commission of Thailand. Persons with interests shall not have the right to vote for such agenda.

2.4 Investment risks of securities holders

1) Risk from the Company's compliance with the conditions of the mai

Since the Company intends to offer newly issued ordinary shares this time and is in the process of submitting Applying for permission to be a listed securities to the Stock Exchange of Thailand Therefore, investors may be at risk that the Company's securities may not be authorized as listed securities. As a result, investors may not have a secondary market to trade securities and will not receive returns from selling such shares at the projected price. However, UOB Kay Hian Securities (Thailand) Public Company Limited, as a financial advisor, has considered the qualifications of the company initially. In the opinion that the Company and its ordinary shares are fully qualified to be listed on the M Stock Exchange. AI in accordance with the regulations of the Stock Exchange of Thailand. Subject: Acceptance of Listed Securities Disclosure of Information Reporting of Securities Holdings and Delisting of Listed Securities On the M Stock Exchange AI B.E. 2558 dated 16 May 2015 (including as amended) and qualified. Clause 5 (a) is that the Company had a performance of not less than 2 years prior to the submission of the application for a listing license to the MAI Stock Exchange with a net profit in the latest year of not less than 10 million baht and a net profit in the accumulated period prior to the submission of the application. 5 (b) The Company has had a performance of not less than 2 years prior to the submission of the application for a listing license with the MAI Stock Exchange and has a total market capitalization of ordinary shares of not less than 1,000 million baht, except for the qualification for

the distribution of shares to minority shareholders who must be at least 300 persons and hold shares in aggregate not less than 25.00% of the paid-up capital. After the completion of the IPO.

2) Risk from the Company's shareholders may have restrictions on exercising their rights to purchase newly issued ordinary shares of the Company in the future.

Although a public limited company is not required to offer the right to purchase newly issued ordinary shares to existing shareholders prior to the issuance of newly issued ordinary shares, public limited companies do issue various instruments, including newly issued ordinary shares and other types of instruments issued by the company, such as warrants or transferable subscription rights (TSR) or convertible bonds from time to time, allocated to existing shareholders in proportion to their shareholding. In the event that the Company offers or grants rights to ordinary shareholders to purchase newly issued ordinary shares or rights in any form. The Company has the right to exercise its discretion in proceeding with the offering of such instruments to shareholders and the Company may not offer the right to subscribe for such instruments to ordinary shareholders located outside Thailand. In addition, under applicable law, The Company may be prohibited from offering such securities to shareholders in certain countries unless it has taken steps in accordance with the relevant procedures, for example, the Company may not offer such rights to ordinary shareholders who are U.S. persons within the meaning of Regulation S under the U.S. Securities Act. Unless (a) there is a registration statement for the offering of securities in force under the said U.S. Securities Act, or (b) it is an offer to offer such rights to shareholders under the exceptions under the U.S. Securities Act. Compliance with securities laws or other regulatory requirements in certain countries may prevent investors from exercising their right to purchase instruments on a pro rata basis. This may reduce the stake of such investors. Moreover, the Company is not obliged to apply for registration of the Company's ordinary shares in any country in order for foreign investors to exercise their rights to purchase additional ordinary shares on a Proportionate rights basis in the future.

2.5 Risks of investing in foreign securities

– None –

Business drive for sustainability

Management Discussion and Analysis: MD&A

1. Business Overview

Twenty-Four Con & Supply Public Company Limited ("24CS" or "the Company") and Twenty Four Home Company Limited ("24Home" or "the Subsidiary") operates as an importer and distributor of heating ventilation and air conditioner equipment for leading international brand, TROX. Moreover, the Company is a distributor of engineering of building assembly systems and small electrical appliances of various well-known brands such as TRANE, AAF, and KRUGER HONEYWELL and HAIER etc. Furthermore, in order to provide a one-stop service for clients, the Company also provides engineering system installation services for building, and the turnkey construction services.

The Company divides its main business units into 4 business units as follows.

1. Engineering system installation services.

There are important service areas including:

- 1.1) Heating Ventilation and Air Conditioning System
- 1.2) electrical and communication systems
- 1.3) Sanitary and fire protection systems,

1.4) Installation of sound insulation. The Company also provides other construction services, related to the Company's main business activities such as civil and architectural work.

These supporting services could substantially help facilitate clients and help the Company to become a turnkey contractor. Owing to the Company's expertise, long experience, and trustworthiness from clients in the installation of heating ventilation and air Conditioning system, most of the Company's engineering system installation services for building are in the form of subcontract for the installation of heating ventilation and air Conditioning system. However, with the current potentiality of the Company's engineering team, the Company, therefore, expects to offer products and provides turnkey construction services to clients in order to effectively respond to the clients' need, and to deliver the high standard of the quality product within the agreed time frame. These activities will help the Company gain trust from the clients who interested in the Company's engineering system installation services. The Company's clients mostly are the Main Contractors who proficiently manage the mega infrastructure projects such as electric train system, airport construction, power plant, power plant substation and office buildings.

2. Import and distributor of engineering of building assembly systems.

It is the distribution of high-quality engineering products to contractors, project owners and other interested parties.

3. Energy business

Provides services for producing and distributing steam energy on medium-long term contracts to project owners. Focusing on value for money in investment and energy management.

4. Trading and related services business

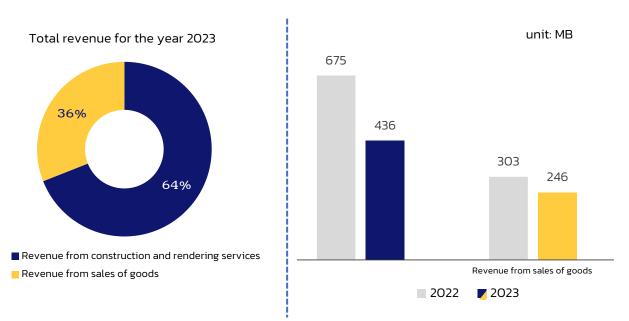

The Company has established a subsidiary company, Twenty Four Home Company Limited to distribute air conditioning and electrical appliances including providing services related to air conditioning systems.

Performance analysis (การวิเคราะห์ผลการดำเนินงานและฐานะทางการเงิน)

Performance analysis

Total Revenue

The Company's revenue could be seperated into 1) Revenue from construction and rendering services which includes the engineering system installation services for building and other related work and revenue from air conditioner cleaning and repair services 2) Revenue from sales of goods including the materials and equipment for heating ventilation and air Conditioning system, and other related materials. On top of that, the Company is also an agent and distributor of heat ventilation and air conditioner of leading international brands such as TRANE, TROX, AAF, KRUGER, HONEYWELL and HAIER etc., and revenue from sale of air conditioners and electrical appliances under the Haier brand and 3) Other revenue which includes the asset sale, interest received, and the scrap sale. To sum up, the majority of the Company's revenue are mostly from the revenue from the engineering systems installation services and the revenue from sales of materials and equipment.

Table 1: The Company's revenue structure by nature of business for the year of 2021 - 2023

Revenue from construction and rendering services

Revenue from construction and rendering services mostly comes from the revenue from building engineering systems installation services and other related the revenue from construction. The revenue recognition could be separated into 1) the revenue from the initial amount as agreed upon the contract, and 2) the revenue or discount from the adjustment or claim against the main contract. This adjustment will be recognized only if the possibility of the adjustment is quite certain, and could be measured reliably The revenue and construction cost will be recognized in the statement of comprehensive income through the stage of completion method. The stage of completion will be based on the ratio of the construction cost incurred of the completed work to date divided by the estimated total construction cost.

The Company's revenue from construction work for the year 2021 to 2023 were 396.26 million Baht, 675.14 million Baht, and 435.75 million Baht, respectively, accounting for the increase of 70.38 % for the year 2022 and decrease of 35.46 % for the year 2023.

In 2022, the Company's revenue from construction was equaled to 675.14 million Baht accounting for the increase of 278.88 million Baht or 70.38 % from the same period last year. This was owing to continuous focus on the mega projects which caused the Company to be able to acquire new mega projects. The Company's 2022 revenue was comprised of the revenue from the projects of which are newly signed the construction contract in 2022, including 1) Ministry of interior construction project with the project value of 394.50 million Baht, and 2) TUM 3.2 building system construction project with the project value of 270.00 million Baht, and the revenue from the previous year backlog, from MRT – Park & Ride Pink Line project 1) Zone Z: Government Complex, 2) JLK Tower Sukhumvit, 3) Plexus–NMC EMS Plant, and 4) Rattanaburi power plant substation.

However, in 2023, the Company had revenue from construction of 435.75 million Baht, a decrease of 239.39 million Baht from 2022, or a decrease of 35.46 %. The decrease in construction and service income in 2023 compared to 2022 has important reasons from many projects have been completed in early to mid-2023, and the Company has delayed accepting work on new projects because they want to screen quality work and customers.

Revenue from sales of goods

Revenue from sales of goods mostly comes from the selling of heating ventilation and air Conditioner, and other related materials to other subcontractor, main contractor, and the project owner in which the Company agreed the project owner to only purchase the product from the Company. The Company's revenue from sales of materials and equipment for the year 2021 to 2023 were 245.21 million Baht, 303.43 million Baht, and 245.75 million Baht, respectively, accounting for the increase of 23.74 % for the year 2022 and decrease of 19.01 % for the year 2023. The increase in revenue from sales of goods of the year 2022 was mainly from the recovery of the construction industry, affected by government lockdown policy from the COVID-19 situation in 2021. The increase in new construction projects, launch by private sector also enhances the revenue from sales of materials and equipment to be increasein year 2022. However, in year 2023, the Company sold most of products to small size projects therefore, revenue from sale of goods decreased compared to the year 2022.

Other revenue

The Company's other revenue mostly comprised of the revenue from asset sales, interest received, scrap sales, and etc. The Company's other revenue for the year 2021 to 2023 were 0.64 million Baht, 3.70 million Baht, and 8.78 million Baht, respectively, accounting for the 0.10 % 0.38 %, and 1.29 % of the Company's total revenue, respectively. Increased in other income for the year 2023 compared to year 2022 due to gain on reversal of accounting estimates amounting to 6.23 million Baht and gain on disposal of assets amounting to 1.23 million Baht.

Cost of construction and services, cost of sales of goods, gross profit, and gross profit margin

Cost of construction and services

The Company's cost of construction comprises of 1) the raw material, 2) sub-contractor, 3) labor, and 4) other overhead cost.

For the year 2021 – 2023, the Company's cost of construction were 348.96 million Baht, 591.63 million Baht, and 443.44 million Baht, respectively, accounting for 88.06%, 87.63 %, and 101.76 % of the Company's revenue from construction, respectively. While the Company's gross profit and (loss) from construction for the year 2021 – 2023 were 47.30 million Baht, 83.51 million Baht, and (7.69) million Baht respectively. Accounting for the gross profit (loss) margin of 11.94 %, 12.37 %, and (1.76%), respectively. Proportion of cost to revenue of year 2021 and 2022 are not significant difference however, cost of construction and services of year 2023 have increased compared to previous years due to inclining in raw materials and sub-contractor during the construction period.

Cost of		2021			2022			2023

Table 2 : The details of the Company's construction costs for the period of 2021 - 2023

Remark: 1/ Other Service Cost comprises of the miscellaneous expense, disposable item expense, transportation expense, fee, and maintenance expense.

Cost of sales of goods

Cost of sales of goods mostly are 1) raw materials cost 2) labor cost, 3) importation cost, and 4) other overhead cost.

For the year 2021 – 2023, the Company's cost of sales of goods were 214.74 million Baht, 278.43 million Baht, and 228.00 million Baht, respectively, accounting for 87.57 % 91.76 %, and 92.78 % of revenue from sales of goods, respectively. While the Company's gross profit from sales of goods for the year 2021 – 2023 were 30.47 million Baht, 25.00 million Baht, and 17.75 million Baht, respectively, accounting for the gross profit margin of 12.43 %, 8.24 %, and 7.22 %, respectively. The drop in 2022 and 2023 gross profit was mainly from the increase in the raw material cost of both heating ventilation and air conditioner which are the major products in which the Company sold to building and factory construction contractors. In addition, Thai Baht has depreciated against the US dollar caused the higher import product cost.

Selling and administration expense

The Company's major selling and administration expenses were the staff expense auditing expense consultation fee, professional fee, office service fee and depreciation expense.

For the year 2021 – 2023, the Company's selling and administration expense were 50.27 million Baht, 75.60 million Baht, and 71.33 million Baht, respectively, accounting for the 7.84 % 7.73 %, and 10.47 % of the Company's revenue from sales and services, respectively.

In 2022, selling and administration expenses continuously increased 25.33 million Baht or 50.39 % from the same period last year. This was due to the increase in staff expense from the yearly salary increase in 2022, consultation and public relation fee for listing in SET fee, and computer program expense.

For the year 2023, selling and administrative expenses amount of 71.33 million Baht which decreased by 4.27 million Baht or 5.65 % compare the same period last year, due to an decrease in commission expenses and salaries expenses of sale department declined by 6.62 million Baht.

Table 3: Selling and administration expense for the period of 2021 - 2023

Remark:

1/ Other expenses includes selling expenses, office service fee, training and seminar fees, utilities fee, telephone fees, computer expenses, insurance premiums expenses, etc.

Financial cost

Financial cost mostly was the interest payment for the business operation. For the period of 2021 – 2023, the Company's finance costs were 2.49 million Baht, 5.07 million Baht, and 3.54 million Baht, respectively, accounting for 0.39 %, 0.52 %, and 0.52 % of the revenue from construction and sales of goods. All finance costs are interest expenses incurred from using credit lines from financial institutions. Most of them are commercial amounts, such as fees for letters of guarantee. Overdraft interest, Interest on hire purchase and interest from long-term loan from financial institutions.

Net profit loss

For the year 2021 – 2022, the Company's net profit were 19.46 million Baht and 24.49 million Baht respectively, Net loss for the year 2023 was 45.07 million Baht which accounting for the 3.03 % 2.50 %, and -6.61 % of the Company's total revenue, respectively. Net loss in 2023 occurred from increasing in raw materials cost and subcontractor cost compared to the same period last year.

However, changes in net profit margins depend on many factors, such as construction material costs, labor costs, and fixed costs for back-office employees, which are fixed expenses that do not vary with the Company's income.

Financial position analysis

Assets

As of December 31, 2021 – 2023, the Company's asset amounted to 411.92 million Baht, 1,018.86 million Baht and 758.01 million Baht, respectively. The increase in total assets as of December 31, 2022 compared to the year as of December 31, 2021 in the amount of 606.94 million Baht was mainly due to an increase in cash and cash equivalents from the initial public offering of ordinary shares, an increase in assets arising from contracts in the amount of 225.99 million Baht and trade and other receivables in the amount of 82.60 million Baht. This is in line with the increase in revenue from sales of goods and construction. However, as of 31 December 2023, the Company had total assets of 758.01 million Baht which decreased by 260.86 million Baht when compared to total asset as at 31 December 2022. The decrease in total assets mainly from decreased in cash and cash equivalents amounting to 190.92 million Baht due to the Company paid to account payables, paid for material and labor during the year. Trade and other receivables decreased by 150.92 million Baht because the Company received payment from main account receivables during year 2023. In addition, inventories declined by 47.59 million Baht due to many construction projects nearly complete therefore, almost all construction materials were withdrawn for the construction. However, contract assets raised by 74.15 million Baht due to increasing in percentage of completion in the year 2023.

Cash and cash equivalents

As of December 31, 2021 – 2023, the company's cash and cash equivalents amounted to 52.87 million Baht, 214. 67 million Baht and 23.76 million Baht. The increase in cash and cash equivalents as of December 31, 2022 from December 31, 2021 was from the initial public offering of ordinary shares. However, as at 31 December 2023, cash and cash equivalents decreased 191.14 million Baht mainly from payment of debt to trade creditors and payment of construction materials and construction labor during 2023.

Trade and other receivables

The Company's trade and other receivables consist of receivable from sales of goods, construction receivables and advance payments to contractors and etc. The Company will recognize trade accounts receivable according to the invoices issued for collecting according to the completed work after delivery. In general, the company has a policy of giving credit terms to customers of 30 - 60 days. If considering from the table showing the age of trade accounts receivable of the company, it was found that most of the accounts receivable of the company are are not yet due or are past the due date of less than 30 days, most of which are due to the mismatch of the payment period and customer cheques, causing the payment to be delayed.

As of December 31, 2021 – 2023, the Company has trade and other receivables totaling 136.90 million Baht, 219.50 million Baht, and 68.60 million Baht, respectively, As of December 31, 2022 Trade and other receivables increased from 2021 in the amount of 82.60 million Baht, which is directly proportional to the value of the projects that the company is under construction and delivering work, which increases in line with income from construction work especially project

starting in 2022. However, as of December 31, 2023, trade and other receivables decreased from 2022 in the amount of 150.92 million Baht because the Company received payment from project receivables during 2023.

Table 4: Age of trade accounts receivable

To consider analyzing information on debt default and bad debt write-off to record an allowance for expected credit losses (Expected Credit Loss: ECL), the company will consider the group of trade accounts receivable divided into 1) trade accounts receivable that are new customers. Such debtors will be considered individually based on performance data, various financial information, the reputation and credibility of the business. 2) Debtors who are former customers, the company already has the past payment information of each customer. Therefore, the Company will consider by analyzing the payment information. payment default and bad debt write-off from the past experience of overdue debtors for at least 3 years , including other factors that may affect the debtor's ability to pay debt in the future. (Forward–looking Information) with reasonable and sufficient supporting information.

Based on the current data, there are no customers who do not pay and also there is no risk of credit risk. In addition, the company has a policy to give credit term to the employer in payment of contract that are charged each installment at 30 – 60 days from the date of delivery of work. While the Company receives credit term for payment of goods and services from trade creditors at 60 – 90 days.

For the allowance for doubtful debts, the management uses judgment to make estimates for expected losses for each debtor by taking into 1) account past collection experiences 2) aging of the outstanding debt and 3) the prevailing economic conditions at that time assembling in the allowance for doubtful accounts.

In 2021 – 2023, the Company's trade receivables turnover ratio was 6.16 times, 5.66 times and 4.94 times, representing an average collection period of 60 days, 65 days and 74 days, respectively.

Contract assets

The Company recognizes a contract asset when the Company recognizes income from performance of its contract performance obligations in excess of the installment billing amount. The amount of the installment billed includes the amount of money that the customer has not yet paid.

As of December 31, 2021 – 2023, the Company has contract assets of 122.61 million Baht, 348.60 million Baht and 422.75 million Baht respectively. The increasing in contract assets came from the percentage of completion during the year 2022 and 2023.

In analyzing the data on debt default and write-off of bad debts to record an allowance for expected credit losses (ECL) of contract debtors who have not yet been collected. The company divides such debtors into 1) monthly progress type and 2) milestone type. As of December 31, 2021, the Company has recorded an allowance for expected credit losses of 0.25 million Baht for one customer, which is a project that the Company has built according to the contract, but due to the problem of such project causing must stop the construction for a period of more than 12 months. At present, the company already has sent a letter informing the suspension of construction work to such customer. In the years 2022 and 2023, the Company was not recording an allowance for expected credit losses (ECL).

Inventories

Inventories are finished goods, materials and equipment awaiting installation, such as main equipment, black steel pipes, PVC pipes, electrical joints and threaded joints, etc. The Company has inventories as of December 31, 2021 – 2023 in the amount of 7.71 million Baht, 86.34 million Baht and 86.34 million Baht, or representing 1.87 %, 8.47 % and 5.11 % of total assets, respectively.

Other current assets

Other current assets of the Company are mainly contains input vat, undue input vat, insurance and other deposits, etc. As of December 31, 2021 – 2023, the Company has other current assets of 30.49 million Baht, 50.24 million Baht and 41.55 million Baht, or representing 7.40%, 4.93% and 5.48% of total assets, respectively.

Other non-current assets

Other non-current assets are mainly contains retention receivables and witholding tax, etc. As of December 31, 2021 – 2023, the Company has other non-current assets of 23.28 million Baht, 50.52 million Baht and 92.94 million Baht, or representing 5.65%, 4.96% and 12.26% of total assets, respectively. Other non-current assets increased from retention which customer deducts part of the construction contract fee as agreed in each billing period as collateral arising from the project. Normally, the debtor's retention will be returned from the debtor within 1–2 years after the final installment of the work is delivered.

Liabilities

As of December 31, 2021 – 2023, the Company has total liabilities of 274.94 million Baht, 409.79 million Baht and 194.01 million Baht, respectively, accounting for 66.75 %, 40.22 % and 25.59 % of total liabilities and shareholders' equity, respectively.

Details of material liabilities of the Company are as follows:

Trade and other payables

The Company's trade and other payables consist of: material payable ,retention payables and advance payments received under construction contracts, etc. As of December 31, 2021 – 2023, the Company has trade and other payables in the amount of 129.63 million Baht, 321.36 million Baht and 98.25 million Baht, respectively, accounting for the 31.47 %, 31.54 %, and 12.96 % of total liabilities and shareholders' equity, respectively.

Trade and other payables as of December 31, 2023 have decreased compared to trade and other payables as of December 31, 2022 in the amount of 223.11 million Baht, representing an decrease of 69.43 %. The decrease was mainly from payment to creditors for TUM 3.2 building system construction, Rattanaburi Power Station, and JLK Tower Sukhumvit project. While the average repayment period of the Company as of December 31, 2022 – 2023 was 48 days and 84 days, respectively.

Other current liabilities

Other current liabilities are vat pending invoices, withholding tax pending remittance and accrued social security funds, etc. As of December 31, 2021 – 2023, other current liabilities of the company amounted to 5.54 million Baht, 16.15 million Baht, and 9.76 million Baht, respectively, accounting for the 1.34 % , 1.58 and 1.29 %, of total liabilities and shareholders' equity, respectively.

Employee benefit obligations

The Company's employee benefit obligations are the Company's obligations to make severance payments to employees upon retirement based on actuarial principles. As of December 31, 2021 – 2023, the Company has employee benefit obligations amounting to 2.73 million Baht, 3.68 million Baht, and 4.94 million Baht, accounting for the 0.66 %, 0.36 %, and 0.65 % of total liabilities and shareholders' equity, respectively. The increase in such employee benefit obligations is due to an increase in the number of employees to support job expansion and employee related expenses according to actuarial principles.

Equity

As of December 31, 2021 – 2023, the shareholders' equity of the Company amounted to 136.98 million Baht, 609.07 million Baht, and 564.00 million Baht, accounting for the 33.25 %, 59.78 %, and 74.41 % of total liabilities and shareholders' equity, respectively. An increase in the shareholders' equity was mainly from the receipt of payment from the initial public offering of ordinary shares. However, as of 31 December 2023, the Company had decreased by 45.07 million Baht due to loss for the year ended 31 December 2023 amounting of 45.07 million Baht.

Dividend payment

The Board of Directors' Meeting No. 9/2021 held on November 11, 2021 at the rate of 10.00 Baht per share from 1.50 million ordinary shares, amounting to 15.00 million Baht.

The Annual General Meeting of Shareholders for the year 2022, held on March 3, 2021, resolved to approve the dividend payment at the rate of 10.6667 Baht per share for fully paid shares of 100.00 Baht which accounted for 250,000 shares, representing 2.67 million Baht and at the rate of 9.0667 Baht per share for shares paid for 85.00 Baht from the full value of 100.00 Baht, amounting to 1,250,000 shares, representing 11.33 million Baht, totaling a total dividend payment of 14.00 million Baht.

Obligations and contingent liabilities

The Company has obligations and contingent liabilities as follows:

Letter of guarantee

As of December 31, 2023, the Company has obligations under a letter of guarantee from a financial institution to issue a letter of guarantee for goods and works according to the employment contract in the amount of 47.78 million Baht, using deposits from financial institutions as collateral.

Cash flows from operating activities

In 2023, the Company had used net cash flow from operating activities in the amount of 175.41 million Baht. This is mainly due to using working capital in business operations. The majority of cash outflows include: cash outflows from payment to trade and other payables amounted to 216.75 million Baht, cash inflows from trade receivables were 150.92 million Baht, and losses before income tax were 56.03 million Baht, resulting in a decrease in overall cash flow from working capital in remaining operating assets.

Cash flows from investing activities

In 2023, the Company had net cash used in investing activities in the amount of 5.82 million Baht. The Company's investment items include the use of renovation of office and investment in the purchase of office equipment and cash paid for right-of-use assets, etc.

Cash flows from financing activities

The Company's cash used in financing activities in 2023 was 9.69 million Baht, mainly from repayment of loans from financial institutions, cash paid for the issuance of shares and dividends paid.

Key financial ratios

Liquidity Ratio

Financial ratio	2021	2022	2023
Liquidity ratio (times)	1.42	2.46	4.13
Qucik ratio (times)	0.77	1.16	0.64
Average collection period (days)	60	65	74
Average product sales period (days)	4	20	35
Average payment period (days)	48	84	108
Cash cycle (days)	16	1	1

In 2021, the Company's current ratio was 1.42 times, an increase compared to 2020 at 1.18 times, due to the fact that the Company's current assets increased at a rate greater than the increase in current liabilities. The increased in current assets mainly came from cash and cash equivalents increased in the amount of 52.87 million Baht, representing an increase of 1,821.97 % from the previous year which came from an increase in the registered capital of the company and trade accounts receivable and assets arising from contracts which increased by 62.11 million Baht and 118.31 million Baht, respectively, accounted for an increase of 83.07 % and 2,746.29 % respectively due to the Company is in the period of construction expansion, it needs working capital to operate its business. However, when considering the quick ratio, the rate has decreased in 2021 to 0.77 times, down from 2020 at 0.90 times due to the current assets of the Company are increasing less than the current liabilities. Most of increasing in the current liabilities are overdraft items, trade accounts payable increased by 66.34 million Baht and 67.28 million Baht, representing an increase of 828.15 % and 107.91 %, respectively, compared to the previous year according to the expansion of the company's construction work.

In 2022, the Company 's current ratio was 2.46 times, an increase compared to 2021 at 1.42 times, due to the increase in current assets of the company at a rate greater than the increase in current liabilities. The increase in current assets mainly are 1) Cash and cash equivalents increased by 161.81 million Baht, representing an increase of 306.07 % from the previous year which came from the capital increase of the Company's ordinary shares and 2) an increase in contract assets by 225.99 million Baht, representing an increase of 184.31 %, which is in the same direction as the quick liquidity ratio that increased in 2022 at 1.16 from 2021 at 0.77 times. Current liabilities of the company increased mainly from trade payables and other payables

that increased by 191.74 million Baht or equivalent to an increase of 147.91% compared to the previous year according to the expansion of the company's construction work.

In 2023, the Company's current ratio was 4.13 times, an increase compared to 2022 at 2.46 times, due to trade and other payables that decreased by 223.11 million compared to the previous year from payment to creditors. During the year 2023. Moreover, total assets of the Company increased from contract assets.

As of December 31, 2021 – 2023, the Company's cash cycle is 16 days, 1 day and 1 day, respectively.

In 2022, the Company has a cash cycle of 1 day, which is 15 days less than the year 2021 due to the company's total debt collection period and product sales period increasing compared to the previous year totaling 21 days, which is less than the period pay off the debt that has increased compared to the previous year for 36 days.

In 2023, the Company has a cash cycle of 1 day, which is the same as 2022 due to the Company's total debt collection period and product sales period more than the repayment period at 1 day.

Financial ratio	2021	2022	2023
Debt to equity ratio (times)	2.01	0.67	0.34
Return on assets ratio (%)	7.01	3.42	(5.07)
Return on equity ratio (%)	22.11	6.57	(7.68)

Financial Policy Ratio

As of December 31, 2021 – 2023, the Company's debt to equity ratio was 2.01 times, 0.67 times, and 0.34 times, respectively. From 2022, debt to equity ratio significantly decreased because of increasing capital for initial public offering. In addition, debt to equity ratio in year 2023 was 0.34 times decreased compared to year 2022 due to declining in liabilities of 215.79 million Baht in 2023.

Return on equity ratio

In 2021, the Company had a return on equity 22.11% increased from year 2020 which return on equity was 20.15%. Although the operation profit in 2021 has increased by 190.47 % compared to the same period last year, the company increased its registered capital by 93.75 million Baht in 2021, thus increasing the average shareholder's equity as well.

In 2022, the Company had a return on equity of 6.57%, a decrease from the year 2021 with a return on equity of 22.11 %, which was mainly due to the increase in average shareholders' equity mainly from the capital increase of ordinary shares in the amount of 430.38 million Baht.

In 2023, the Company has a return on equity of -7.68% due to net loss during the year 2023.

Return on assets ratio

In 2021, the Company had a return on assets of 7.01 %, an increase from the year 2020 with a return on assets of 5.87 %, mainly due to the net profit of the company in 2021 that increased

by 186.68 % compared to the previous year. While the company's assets increased by 187.13 % from 2020, the increase in such assets was mainly due to the increase in cash from the capital increase, trade accounts receivable and contract assets which resulted from the expansion of construction work.

In 2022, the Company had a return on assets of 3.42 %, a decrease from the year 2021 with a return on assets of 7.01 %, mainly due to the net profit of the company in 2022 that increased by 27.05 % compared to the previous year. While the company's assets increased by 147.34% from the year 2021, the increase in such assets was mainly due to the increase in cash from the capital increase, trade accounts receivable and contract assets which resulted from the expansion of construction work.

In 2023, the Company has a return on assets of -5.07 % because of net loss in year 2023. At the same time, asset also decreased 25.60% from year 2022 due to the Company paid to account payables and declining in account receivable.

3. Factors that may affect the financial position or operations of the Company in the future

Factors and influences that may affect the financial position and future performance of the Company apart from those mentioned in Item 2.2.2 Risk Management are as follows:

The decrease in earnings per share according to Fully diluted Basis

Based on audited financial statements from auditors approved by the Securities and Exchange Commission for accounting period ended 31 December 2021, the company has a total paid-up capital of 118.75 million Baht, divided into 250,000 ordinary shares with a paid-up value of 100.00 Baht per share and 1,250,000 ordinary shares with a paid-up value of 75.00 Baht per share. Later, as of March 3, 2022, the company received full payment of shares, resulting in the company has a total paid-up capital of 150.00 million Baht divided into 1,500,000 ordinary shares with a paid-up value of 700.00 ordinary shares with a paid-up capital of 150.00 million Baht divided into 1,500,000 ordinary shares with a paid-up value of 100.00 Baht per share.

On March 22, 2022, the Extraordinary General Meeting of Shareholders No. 1/2022 passed a resolution approving the change of the par value per share from 100.00 Baht per share to 0.50 Baht per share. As a result, the number of ordinary shares of the Company after such change in par value increased from 1,500,000 shares at a par value of 100 Baht to 30,000,000 shares at a par value of 0.50 Baht per share. In addition, at the same time, the meeting resolved to approve the increase of the registered capital of 65.00 million Baht from 150.00 million Baht to 215.00 million Baht by issuing 130,000,000 new ordinary shares with a par value of 0.50 Baht per share for offering to the public. However, if considering earnings per share after being listed on the stock exchange from the financial statements for the year ended December 31, 2021, in which the company has a net profit according to the financial statements of 19.25 million Baht, it can be seen that the net profit per share is equal to 12.83 Baht per share (earnings per share is calculated with the number of shares equal to 1.50 million shares). On the other hand, if the number of shares of the company increases to 430.00 million shares with the same net profit, earnings per share of the company will decrease to 0.04 Baht per share.

However, the Company expects that in the long term, the Company will benefit from the share offering and listing on the Stock Exchange of Thailand this time. The proceeds from the IPO will be invested and used as working capital in business operations. In addition, the company will receive other benefits from being a listed company on the Stock Exchange of Thailand such as flexibility in obtaining funding sources and a good image of being a listed company that supports business operations to be more flexible, etc. This will result in the Company's future revenue and net profit increasing and can compensate for the impact of the increase in the number of shares.

	Extraordinary General Meeting of Shareholders No. 1/2022 As of March 22, 2022	After the initial public offering
Registered capital (Baht)	150,000,000	215,000,000
Paid-up registered capital (Baht)	150,000,000	215,000,000
Number of common shares (Shares)	1,500,000	215,000,000
Par (Baht)	100.00	0.50
Earning per share (Baht)	12.83	0.04

Future Projects

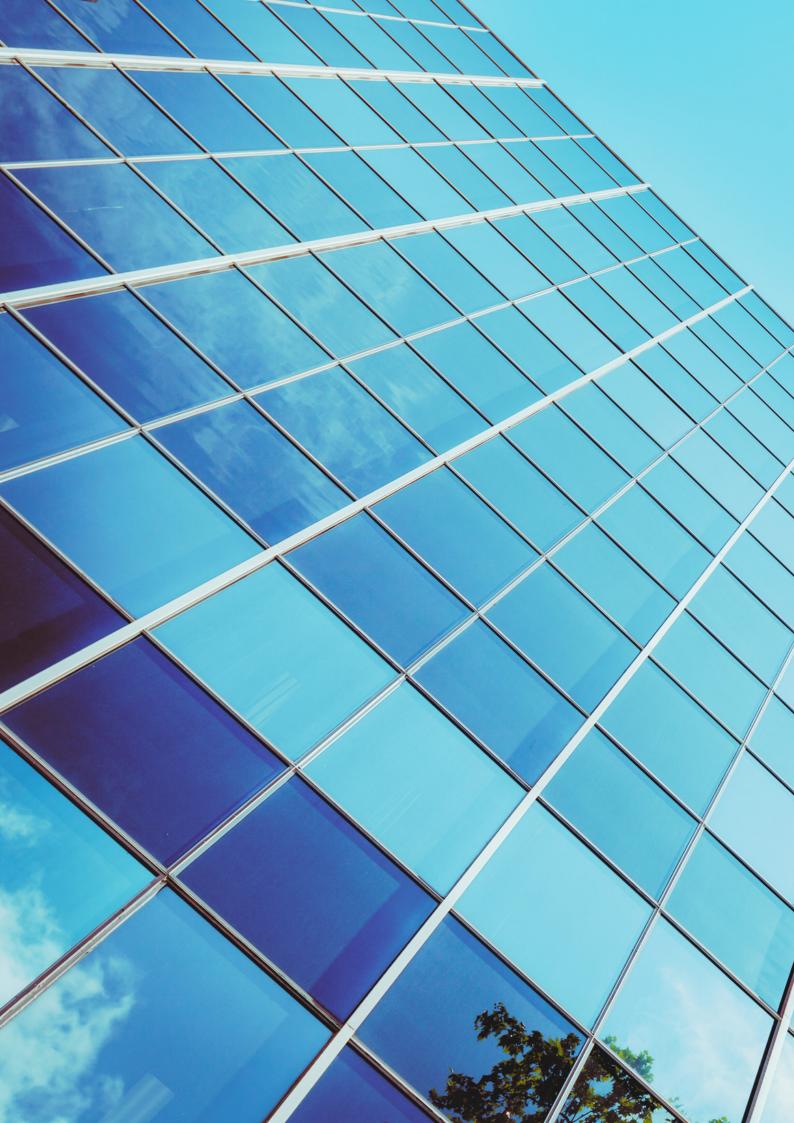

The company remains steadfast in its leadership role for Design, Installation, System Engineering, and Constructions. We deliver high-caliber construction projects while maintaining rigorous cost management.

Furthermore, the company strategically prioritizes expanding its investments in renewable and clean energy. Through our subsidiaries, we are actively involved in the distribution and installation of air conditioners and electrical appliances, catering to both real estate developers and retail consumers. These ventures present lucrative opportunities for future revenue and profit growth.

Undeterred by market fluctuations, we continuously seek out novel business investment opportunities. Our adaptability allows us to capitalize on emerging market trends. By strategically expanding into synergistic businesses, we aim to significantly increase the contribution of new ventures to our overall revenue stream. This strategic expansion will ultimately propel the company towards sustainable growth in both total revenue and net profit.

O2 CORPORATE GOVERNANCE

Corporate Governance Code

The Board of Directors has authorized the corporate governance code for the company to manage in accordance with the principles of corporate governance of the SEC and the SET by realizing the importance of running a business and improving the existing level of corporate governance for long-term sustainable business growth and transparency. The principles not only instill trust among shareholders, investors, or all stakeholders but also provide benefits and positive business outcomes for the company as well as benefits to the company's competitiveness and sustainable growth.

Furthermore, the company continues to focus on shareholder rights and responsibilities towards shareholders and stakeholders of the company, equitable treatment of shareholders, consideration of the role of stakeholders, and disclosure and transparency. Additionally, the Board of Directors has emphasized responsibility for duties and compliance with good corporate governance principles in order to strengthen the confidence of shareholders, investors, and all parties involved. Therefore, the Board of Directors has agreed that there should be a better corporate governance policy that covers key principles ranging from the structure, roles, duties, and responsibilities of the Board of Directors to the management principles of the executives that are transparent, clear, and verifiable by relying on the Securities and Exchange Commission's ("SEC") principles and guidelines for good corporate governance practices for listed companies 2017 as a guideline for managing the organization to ensure that any operation of the company is fair and takes into account the best interests of the shareholders and all stakeholders. The core of the policy can be divided into 8 practical principles as follows:

Principle 1: Establish clear leadership role and responsibilities of the board

Principle 2: Define objectives that promote sustainable value creation

- Principle 3: Strengthen board effectiveness
- Principle 4: Ensure effective CEO and people management
- Principle 5: Nurture innovation and responsible business
- Principle 6: Strengthen effective risk management and internal control
- Principle 7: Ensure disclosure and financial integrity
- Principle 8: Ensure engagement and communication with shareholders

Principle 1: Establish clear leadership role and responsibilities of the board

1.1 The Board of Directors understands and recognizes its role and responsibility as a leader who must supervise the organization to ensure good management, which includes setting objectives and goals, developing strategies, operating policies, and allocating important resources to achieve the objectives and goals, as well as monitoring, evaluating, and supervising the reporting of performance.

1.2 The Board of Directors has established various policies, including policies on corporate governance and social responsibility to create sustainable value for the business to promote ethical business operations, respect the rights and be responsible to shareholders and stakeholders, achieve success in the business operations of the company, benefit society, develop or reduce the impact on the environment, and being able to adapt under changing factors.

1.3 The Board of Directors is responsible for ensuring that directors and executives adhere to their duties with responsibility (Accountability and Responsibility), careful (Duty of Care), and loyalty to the organization (Duty of Loyalty) for the best interests of the company, as well as complying with the law, objectives, regulations, resolutions of the Board of Directors' and shareholders' meeting, and resolutions of the shareholders' meeting. This includes company-defined policies or guidelines as well as adequate mechanisms must be provided to ensure that the company's operations are in accordance with relevant laws, objectives, regulations, resolutions of the Board of Directors' meeting, resolution of the shareholders' meeting, and other policies of the company such as Related Party Transaction Policy, Anti-Corruption Policy, Delegation of Authority, etc. Additionally, this also involves having a process to authorize critical operations such as investments, transactions that have a substantial impact on the company, transactions with related persons, acquisition or disposition of assets, dividend payments, etc.

1.4 The Board of Directors understands their roles, scope of duties, and responsibilities, including clearly specifying the scope of duties and responsibilities assigned to sub-committees and the management, as well as following up and supervising the performance of duties as assigned by establishing the various charters of the Board of Directors and sub-committees in writing and reviewing the charter at least once a year in order to be consistent with the direction of the company.

Principle 2: Define objectives that promote sustainable value creation

- 2.1 The Board of Directors places a high value on determining the objectives and main goals of the organization's business operations in order to grow together with society in a sustainable way, create value and benefit for the organization, customers, partners, employees, shareholders, stakeholders, and society, as well as promote communication and strengthen the objectives and main goals of the organization as reflected in the decisions and operations of personnel at all levels until they become an organizational culture under the principles of good corporate governance.
- 2.2 Annual and long-term business objectives, goals, and strategies must be consistent with the achievement of the business' objectives and key goals, environment, factors, and risks that may impact all stakeholders by applying innovation and technology that

82

are appropriate and safe. Moreover, the company must also be aware of the risks of targeting that could lead to illegal or unethical conduct, as well as supervise the transfer of objectives and goals through strategies and plans throughout the organization.

Principle 3: Strengthen board effectiveness

- 3.1 The Board of Directors consists of between 5 and 12 people, with duties and responsibilities in determining and reviewing the structure of the Board of Directors in terms of composition, qualifications, expertise, experience, the number of directors suitable for the business, and the proportion of independent directors to be appropriate as necessary to achieve the objectives and main goals set. The following is a summary of the relevant practices:
 - 3.1.1 The shareholders' meeting considers the appointment of the company's directors. The tenure is 3 years per term and directors who retire by rotation may be re-elected at the shareholders' meeting.
 - 3.1.2 Company directors must be qualified and not possess any forbidden characteristics as required by law.
 - 3.1.3 The Board of Directors consists of at least half of the total number of directors who are independent, but no fewer than 3 persons. The independent directors must be independent from the control of the management, major shareholders, and must not be involved in or have a stake in finance and business management, as well as having fully qualified according to the criteria for qualifications of independent directors as specified in the Capital Market Supervisory Board publication concerning application for and approval of offer for sale of newly issued shares and having the scope of duties and responsibilities as specified by relevant laws, notifications, rules, and/or regulations.
 - 3.1.4 Directors and senior executives of the company are responsible for reporting information about being an executive director, controlling persons in a limited company or other public limited company, a managing partner in an ordinary partnership, or a limited liability partnership in a limited partnership, and informing the company in accordance with the Board of Directors' rules and procedures.
 - 3.1.5 The Board of Directors has clearly established the scope of authority of the Board of Directors in the charter. The details of composition, qualifications, appointment, tenure, and termination of the position shall be in accordance with the charter of the Board of Directors.
 - 3.1.6 The Board of Directors will disclose the policy for determining the composition of the Board of Directors with diversity and director information such as age, educational background, experience, shareholding percentage, number of

years in director position, and holding the post of director in other listed companies in the annual report and on the company's website.

- 3.1.7 The Board of Directors will appoint a company secretary to execute various activities as required by law and other duties as assigned by the Board of Directors.
- 3.2 The Board of Directors will appoint a suitable individual as Chairman of the Board and ensure that the composition and operations of the Board of Directors are conducive to the exercise of independent discretion. In case the chairman is not an independent director, the Board of Directors will appoint an independent director to jointly determine the agenda of the Board of Directors' meetings to support checks and balances between the Board of Directors and the management and to comply with the principles of good corporate governance for listed companies. In addition, the company has separated roles, duties, and responsibilities between the Board of Directors and management in order to ensure clarity in the duties of each position, have a check and balance, be able to review the management, and operate the company efficiently and transparently as follows:
 - 3.2.1 The Board of Directors: plays an important role in determining directions, policies, and strategies for business operations in order to generate the highest return on investment and benefit to shareholders, as well as having important roles in supervising and monitoring the operations of the management to ensure that policies and strategies are followed and in accordance with the law, objectives, regulations of the company, and resolutions of the shareholders' meeting.
 - 3.2.2 Management: responsible for managing the business to achieve success and in accordance with the direction, policy, and strategy of business operations as determined by the Board of Directors, as well as conducting day-to-day management duties and keeping the company's business in order.
 - 3.2.3 Chairman of the Board: Leader of the Board of Directors plays an essential role in supervising and supporting the performance of the Board of Directors in accordance with the law, corporate governance, etc., as mentioned in 1.
 - 3.2.4 Chairman of Executive Board: has the authority to supervise operations in accordance with the policies of the Executive Board within the framework of laws, objectives, the company's regulations, resolutions of the Board of Directors, and resolutions of the shareholders' meeting.
 - 3.2.5 Chief Executive Officer: is the head and leader of the company's management team and is assigned by the Board of Directors to conduct duties related to the overall business operations of the company. CEO manages operations according to plans and budgets approved by the Board of Directors strictly, honestly, and maintains the best interests of the company and shareholders,

including not doing anything that has interests or benefits in a manner that conflicts with the company and its subsidiaries.

- 3.3 The Board of Directors shall ensure that the recruitment and selection process for each committee is transparent and unambiguous in order to obtain the qualifications of the Board of Directors and sub-committees in accordance with the specified elements.
- 3.4 The shareholders' meeting has the power to approve the remuneration of directors. Therefore, the Board of Directors will consider the structure and remuneration rate to be suitable for the responsibilities and motivate the Board of Directors to lead the organization to achieve both short-term and long-term goals.
- 3.5 The Board of Directors shall ensure that all directors are responsible for executing their responsibilities and devoting adequate time.
- 3.6 The Board of Directors has established a framework and mechanism for supervising the policies and operations of subsidiaries and associated companies at a level appropriate for each business, as well as subsidiaries and associated companies must have the same understanding.
- 3.7 The Board of Directors has a policy to conduct an annual performance assessment of the Board of Directors, subcommittee, and individual directors to be used as a framework for auditing the performance of the Board of Directors, whether it has followed good practices or not, in order to improve the performance of the Board of Directors and to review the problems and obstacles that occurred in the previous year. The evaluation results will be used for further development of the performance.
 - 3.7.1 The company has prepared a self-assessment form for the Board of Directors (Board Self-Assessment) according to the guidelines of the Stock Exchange of Thailand, with modifications to suit the nature of the business and the structure of the Board of Directors. It consists of 2 sets of assessment forms, as follows:
 - 3.7.1.1. Performance evaluation form of the Board of Directors and subcommittees (by committees)
 - 3.7.1.2. Performance evaluation form of individual director (selfassessment)
 - 3.7.2 Assessment criteria address the following critical issues:
 - 3.7.2.1. Structure and qualifications of the Board of Directors and subcommittees
 - 3.7.2.2. Board of Directors meeting
 - 3.7.2.3. Roles, duties, and responsibilities of the Board of Directors and subcommittees
 - 3.7.2.4. Other considerations such as relationships with management and self-development of directors and executives
 - 3.7.3 Scoring method for each assessment topic is separated into 5 levels as follows:0 = Strongly disagree or never conducted

- 1 = Disagree or seldom conducted
- 2 = Fair or moderately conducted
- 3 = Agree or well conducted
- 4 = Strongly agree or excellently conducted
- Assessment process

The Board of Directors is responsible for authorizing and reviewing the performance evaluation form of the Board of Directors to present to the Board of Directors for approval and the company secretary will deliver the assessment form to all directors to assess at the end of each year. Following that, it will be processed, and a summary report of the assessment results will be presented to the company to be used in determining the directors' remuneration each year and reporting the evaluation results to the Board of Directors for acknowledgement as well as discussing ways for future development.

- 3.8 The Board of Directors shall supervise each director to ensure that they understand their roles and responsibilities, the nature of business, and laws related to business operations, as well as assist all directors in enhancing their skills and knowledge for performing their duties on a regular basis.
- 3.9 The Board of Directors shall ensure that the operations of the Board of Directors run smoothly, that they can access the required information, and appoint the company secretary, who has the knowledge and experience that are necessary and appropriate to support the operations of the Board of Directors.
- 3.10 The Board of Directors will appoint a number of directors from the Board of Directors to be members of a subcommittee for special duties to enhance the effectiveness of the Board of Directors. Each subcommittee has the same tenure as the Board of Directors and performs the following duties as assigned by the Board of Directors:

3.10.1 Audit Committee

The Audit Committee is responsible for various duties as assigned by the Board of Directors. This includes the duty to review financial reports, the internal control system, compliance with the law, consideration for the selection of auditors, disclosure of company information, and preparation of the audit committee's report, etc., in accordance with the audit committee charter.

3.10.2 Executive Committee

The Executive Committee performs various responsibilities as assigned by the Board of Directors. This covers administrative duties in relation to the usual operations and administration of the company, scrutinizing policies, business plans, budgets, management structures, and various managerial powers of the company. Furthermore, the Executive Committee determines criteria for conducting business in accordance with economic conditions to propose to the Board of Directors' meeting for consideration and approval and/or give approval, including inspection and monitoring

of the company's performance that is consistent with the policy set by the Board of Directors in accordance with the executive committee charter.

Nomination and Remuneration Committee (or working group or persons 3.10.3 assigned by the Board of Directors in the process of establishing the Nomination and Remuneration Committee)

They are responsible for a variety of tasks as allocated by the Board of Directors. This includes the responsibility to select individuals who deserve to be nominated as new directors or senior executives and persons with management authority by establishing criteria or methods for recruitment and selection with criteria and transparency to propose to the Board of Directors' and/or the shareholders' meetings for approval. Moreover, they are also responsible for considering guidelines and determining compensation for the directors, senior executives, and individuals with management authority by setting the criteria or procedure to determine fair and reasonable remuneration to be proposed to the Board of Directors' and/or shareholders' meetings for approval, etc.

However, due to the small size of the organization and the small number of personnel, the company has not appointed the Nomination and Remuneration Committee. Thereby, the company operates to create checks and balances on such issues through the establishment of a board structure that is balanced through the establishment of a committee consisting of an audit committee that is independent and has no interest in the abovementioned transactions, who are non-executive directors and have no kinship relationship with the executives of the company. The nomination and remuneration of executives and employees will be considered by the Board of Directors that will not be for the benefit of any individual.

3.10.4 Risk Management Committee

The Risk Management Committee carries out various duties as delegated by the Board of Directors. This includes the duties of policy making, management strategy, and risk management framework in order to propose to the Board of Directors, following up to ensure that risks and impacts are assessed, as well as risk management at the level of the company organization being adequate and up-to-date, etc., which is in accordance with the charter of the Risk Management Committee.

Corporate Governance Committee (or working group or persons assigned by 3.10.5 the Board of Directors in the process of establishing the Corporate Governance Committee)

They are in charge of a variety of tasks as assigned by the Board of Directors. This covers the duty to formulate policies and guidelines on corporate governance, including important operations related to good corporate governance, social and environmental responsibility, conflict of interest, and the implementation of sustainable development of the company in order to achieve effective results and enhance the company's corporate governance system to international standards.

However, due to the small size of the organization and the small number of personnel, the company has not appointed the Corporate Governance Committee. Hence, the company operates in order to achieve compliance with such guidelines through the establishment of a board structure that is balanced through the establishment of a committee consisting of an Audit Committee that is independent and has no interest in the abovementioned transactions, who are non-executive directors and has no kinship relationship with the executives of the company. Additionally, the company secretary will present an agenda related to good corporate governance, social and environmental responsibility, conflict of interest, as well as the implementation of sustainable development of the company in order to propose to the Board of Directors' meeting for approval or acknowledgment in the meeting every year.

3.11 The Board of Directors shall ensure that the roles and responsibilities of the Board of Directors and subcommittees, the number of meetings, and the number of times that each director attended the meeting in the past year, and reports on the performance of every subcommittee are disclosed.

Principle 4: Ensure effective CEO and people management

- 4.1 The Board of Directors will ensure that the Chief Executive Officer and top executives are recruited and developed with the knowledge, skills, experiences, and characteristics required to drive the organization towards its goals.
- 4.2 The Board of Directors should oversee that there is an appropriate remuneration structure and evaluation for all levels.
- 4.3 The Board of Directors has a policy to understand the structure and relationship of shareholders that may affect the management of the business and the power to control the management of the business in order not to be an obstacle to the performance of the Board of Directors and will ensure appropriate disclosure of information that may affect business control.
- 4.4 The Board of Directors will monitor the management and develop personnel to have knowledge, skills, experience, and suitable motivation.

Principle 5: Nurture innovation and responsible business

- 5.1 The Board of Directors places importance on and supports the creation of innovations that create value for the business along with creating benefits for all stakeholders and have social and environmental responsibility by promoting actions to add value to the company according to the ever-changing environmental factors. This may cover the determination of business model, perspectives on design and development of products and services, analysis, improvement of production processes and work processes, and cooperation with partners.
- 5.2 The Board of Directors shall monitor and supervise the management to operate the business with social and environmental responsibility and reflected in the operational plan to ensure that all departments of the organization have operated in accordance with the objectives, main goals and strategic plans of the company, and taking into account the roles of stakeholders. Besides, the Board of Directors shall provide mechanisms to ensure that the business operates ethically, has social and environmental responsibility, and does not violate the rights of stakeholders as a guideline for all sectors in the organization to be able to achieve the objectives and main goals sustainably. In this regard, the Board of Directors has established guidelines for various stakeholders as part of the Corporate Social Responsibility (CSR) Policy and Code of Conduct that will disclose important information and relevant information necessary for those stakeholders to be informed adequately, reliably, and timely.

In this regard, the Board of Directors must realize the importance of the role of stakeholders and treat all groups of stakeholders, which include shareholders, employees, shareholders, customers, suppliers, the public, and society, in a transparent, appropriate, equal, and fair manner, as well as establish guidelines related to stakeholders, including:

5.2.1 Shareholders, Investors and Analysts

The Company treats all shareholders and investors equitably as the Board of Directors, executives, and all employees have determination to perform their responsibilities with integrity, take any action with transparency and fairness, adhering to the best interests of the shareholders as a priority, do not take any action in a manner that may cause a conflict of interest, do not use inside information to seek benefits for themselves and their families, and do not disclose confidential information to third parties. In addition, the company recognizes and respects the rights of every shareholder, including investors and analyst to obtain necessary information about the company's performance completely and regularly. The operating results and necessary information have been communicated through various activities of the company and relevant departments.

5.2.2 Employees

Employees are the company's most valuable resource, so the company places importance on strictly complying with labor and social welfare laws, strives to encourage all employees to have a good attitude, has a sense of duty and responsibility, has pride and confidence in the organization, and focuses on teamwork. Moreover, the company encourages employees to attend training on topics that are relevant and beneficial to their work, gives importance to health care by providing annual health checks to all employees, promotes safety, good working environment, and provides compensation and welfare that is adequate and appropriate. Furthermore, the remuneration of employees will be evaluated based on the performance of each employee fairly and consistently with the company's performance, both short-term and long-term, comparable to other companies in the same industry.

In addition, the company aims to continuously promote and develop personnel to have knowledge and competence, taking into account the rights of employees, and providing opportunities for employees to complain in case of unfair treatment of employees through various channels such as opinion boxes or through the Human Resources department that receives the complaint, etc. The company is responsible for ensuring that the workplace is safe, hygienic, and conducive to effective work.

5.2.3 Customers

The organization builds long-term relationships and partnerships with customers by adhering to the principles of honesty, mutual trust, and trust. The company has a responsibility to create the highest level of satisfaction for its customers through responsibility, attentiveness, and prioritizing the problems and needs of customers by requiring all executives and employees to comply with measures in accordance with the policy to ensure that the company adheres to offering and distributing quality products and never stops developing new and efficient products for customers.

5.2.4 Creditors

The company builds relationships and treats creditors by adhering to the principles of honesty, mutual trust, and trust. The corporation has a responsible, attentive, and gives importance to various conditions that made an agreement with the creditors at the best.

5.2.5 Partners

The company treats partners with honesty and equality to ensure that the company's business operations are appropriate, fair, and beneficial to both parties, as well as having sustainable development and being a long-term partner. The company will choose partners based on various conditions such as price, quality, environmental control and protection, technical expertise,

legal compliance, reliability, and adherence to what is right. Moreover, the company will operate and conduct business with its partners by adhering to ethical principles by strictly adhering to contracts, agreements, trade conditions, keeping confidential information of trading partners, and not using such information to seek benefits for oneself and those of others unless the trading partner consents.

5.2.6 Community, Society, and Environment

> The company is aware and has a sense of responsibility towards the community, society, and environment. Hence, the company operates under the concept of creating shared values between the business sector and society and paying attention to the preservation of the environment by promoting efficient use of resources for maximum benefit to help reduce energy consumption as well as overseeing and preventing the company's operations from causing damage to the quality of life of society, communities, and the environment.

> In this regard, the company and its employees commit to conducting themselves in business operations in a responsible and beneficial manner to society and community, to be friendly to the community living nearby, to help and support the development of the community for its well-being, and to be accountable for the company's business operations in a fair and equal manner in order to promote sustainable development.

5.2.7 Competitors

> The company conducts business in an open and transparent manner and does not create unfair competitive advantages.

5.2.8 Relevant government agencies

> The company complies with all applicable laws and regulations as specified and supports various activities of government agencies on various appropriate occasions. In addition, the company is committed to selling products of high quality and in compliance with the law, including treating the government sector and various government agencies with political neutrality as stipulated in the charter, ethics, code of conduct, and anti-corruption policy. Furthermore, there will be a channel to receive complaints and/or express opinions by mail to the head office of the company, which will provide protection for whistleblowers by not disclosing but keeping the information of whistleblowers confidential. Initially, the Internal Audit Department will summarize such matters and present them to the Audit Committee for verification. If the committee finds information that affects the company, it must be presented to the Board of Directors for further consideration.

5.3 The Board of Directors shall monitor management in allocating and managing resources efficiency and effectiveness by taking into account the impact and development of resources throughout the value chain in order to achieve the objectives and key goals in a sustainable manner. There are at least six categories to consider: Financial Capital, Manufacturing Capital, Intellectual Capital, Human Capital, Social and Relationship Capital, and Natural Capital.

5.4 The Board of Directors shall provide a framework for governance and management of information technology at the enterprise level that aligned with the needs of the entity, including ensuring that information technology is used to increase business opportunities and develop operations as well as risk management in order to enable the business to achieve its objectives and main goals.

Principle 6: Strengthen effective risk management and internal control

- 6.1 The Board of Directors shall supervise and ensure that the company has a system of risk management and internal control to achieve its objectives effectively and comply with relevant laws and standards.
- 6.2 The Board of Directors has appointed an Audit Committee of at least three members, all of whom must be independent directors and do not have characteristics prohibited by relevant laws, including qualifications and duties according to the rules of the SEC and the SET, in order to be able to perform duties efficiently and independently and perform various functions as assigned by the Board of Directors. This includes the duty to review financial reports, the internal control system, compliance with the law, the independence of the internal audit department, consideration for the selection of auditors, disclosure of company information, and preparation of the Audit Committee's report, etc., in accordance with the Audit Committee charter.
- 6.3 The Board of Directors oversees and manages conflicts of interest that may arise between the companies with management, Board of Directors, or shareholders. This includes the prevention of undue use of the property, company information and opportunities, and transactions with people who are related to the company in an improper manner, including setting guidelines in the charter, code of conduct, and policy on the use of inside information in writing.
- 6.4 The Board of Directors has a clear anti-corruption policy that has been communicated to all levels of the organization and external people in order to achieve practical implementation. Additionally, the Board of Directors will provide a project or guidelines against corruption, including supporting activities that promote and instill all employees to comply with relevant laws and regulations.
- 6.5 The Board of Directors has established a mechanism for handling complaints and whistleblowing and set clear guidelines in the policy on receiving complaints about fraud and wrongdoing (Whistle Blower). The channels for receiving complaints will be disclosed on the website or in the company's annual report.

Principle 7: Ensure disclosure and financial integrity

- 7.1 The Board of Directors is responsible for ensuring that the financial reporting system and the disclosure of important information are correct, sufficient, timely, and in accordance with relevant rules, standards and guidelines.
- 7.2 The Board of Directors will monitor and supervise the company's financial liquidity and debt repayment ability.
- 7.3 If there is a condition that the business has financial problems or is likely to have problems, the Board of Directors will ensure that the business has a plan to resolve the problem or has other mechanisms to solve the financial problem, which are under the consideration of the rights of stakeholders and reasonableness.
- 7.4 The Board of Directors has a policy to prepare a sustainability report as appropriate in disclosing information to comply with the law, charter, code of conduct, anticorruption policy, and treatment of employees and stakeholders. This covers fair treatment and respect for human rights, including social and environmental responsibility. However, such information may be disclosed in the annual report or it may be prepared in a separate book as appropriate for the company, which the company will consider to appropriate to disclose.
- 7.5 The Board of Directors shall supervise the management to establish an investor relations unit to communicate and publicize information that is beneficial to shareholders, investors, analysts, and related parties in an appropriate, equitable and timely manner.
- 7.6 The Board of Directors encourages the use of information technology to disseminate information. In addition to the dissemination of information in accordance with the prescribed rules and through the channels of the Stock Exchange of Thailand, the Board of Directors will arrange for the disclosure of information in both Thai and English through other channels such as the company's website, as well as present current information.
- 7.7 The Board of Directors requires information disclosure and transparency to be part of the company's charter and code of conduct.

Principle 8: Ensure engagement and communication with shareholders

The Board of Directors places great importance on the company's shareholders as the company ensures that shareholders receive equal treatment and that shareholders can fully exercise their fundamental rights as shareholders, such as (1) the right to trade or transfer shares; (2) the right to having the company's profit sharing; (3) the right to receive sufficient relevant information through the company's website, the website of the Stock Exchange of Thailand, or by any other means; (4) the right to attend meetings and exercise voting rights in shareholders' meetings independently in order to appoint or terminate directors, consideration of remuneration of directors, appointment of an auditor, dividend payment, and capital increase and issuance of new shares. This includes the right to ask questions to the Board of Directors about the report of the Board of Directors and any other matters

presented to the meeting for consideration and approval, the right to propose agenda in advance and nominate a person to be elected as the company's director, and participation in decision-making on important company matters. This prescribes that every shareholder has the right to vote according to the number of shares held and each share has one vote.

In addition, the Board of Directors must realize and give importance to the rights of shareholders and not take any action that violates or deprives those rights. The Board of Directors promotes and sets policies related to the following:

- 8.1 The Board of Directors ensures that shareholders are involved in decision-making on important company matters, including:
 - 8.1.1 They will protect and respect the basic rights of shareholders, such as the right to buy, sell, or transfer shares, right to receive profit sharing of the business, the right to receive sufficient business information, the right to attend the shareholders' meeting to appoint or terminate directors, appointment of an auditor, dividend allocation, prescribing or amending the articles of association or memorandum of association, capital reduction or increase, and approval of extraordinary items, etc.
 - 8.1.2 They will encourage and support shareholders to exercise their rights in various matters at the annual general meeting of shareholders, for example, the right to propose agendas for the shareholders' meeting in advance of the meeting, the right to nominate a person to be elected as a director in advance, the right to send questions to the meeting in advance, the right to express opinions and ask questions at the meeting, etc., as well as facilitating minority shareholders to nominate persons to be elected as directors of the company by submitting the resume and letter of consent of such person to the Chairman of the Board of Directors under the rules, regulations, and procedures set by the company.
 - 8.1.3 The company will publish information supporting the agenda of the shareholders' meeting on the company's website at least 21 days in advance, as well as clarify the rights of shareholders in attending the meeting and voting rights of shareholders
 - 8.1.4 They will encourage shareholders to use powers of attorney, in which shareholders can determine the direction of voting (agree, disagree, or abstain) by preparing powers of attorney in forms A, B, and C (only power of attorney for custodians) to shareholders, including facilitating shareholders who are unable to attend the meeting in person but wish to exercise the right to vote by attorney. This proposal calls for independent directors to attend the meeting and vote on behalf of shareholders in order to facilitate the shareholders' exercise of the right to choose any independent director as an attorney on behalf of the shareholders.

- 8.1.5 They will refrain from any action infringement, restricted rights, or deprivation of shareholders' rights to access the company's information that must be disclosed in accordance with various requirements and attending shareholders' meetings, such as not presenting documents that contain additional important information suddenly, not adding meeting agendas, or changing important information without notifying shareholders in advance, etc.
- 8.1.6 They will facilitate shareholders in exercising their rights such as providing current and important information through the company's website, etc.
- 8.2 The Board of Directors will supervise the proceedings on the day of the shareholders' meeting to ensure they are orderly, transparent, efficient, and enable shareholders to exercise their rights, including
 - 8.2.1 They will facilitate the shareholders to fully exercise their rights to attend and vote at the shareholders' meeting and will refrain from any action that limits the opportunity for shareholders to attend the meeting. In the case that shareholders are unable to attend the meeting in person, the company allows them to appoint independent directors or any other person as their proxies to attend the meeting on their behalf.
 - 8.2.2 The rules and procedures for attending the shareholders' meeting will be communicated to the shareholders in the meeting invitation letter and on the meeting date. The meeting facilitator will inform the shareholders of the rules used in the meeting and voting procedures at the shareholders' meeting, which has been recorded. A notification of the rules and the procedure for voting on such resolutions is included in the minutes of every shareholders' meeting.
 - 8.2.3 They will properly organize the meeting, provide shareholders with the opportunity to ask questions related to the meeting agenda or related to the company, and can express their opinions by the Chairman of the Board of Directors will ask in the meeting for each agenda. This involves providing for the recording of questions pertaining to the meeting agenda or the company, as well as the expression of shareholder opinions, including the explanation of the Board of Directors and/or executives in every shareholder meeting report.
 - 8.2.4 The meeting will be conducted according to the agenda specified in the invitation letter and executives who are shareholders of the company will not present any additional agenda items that are not necessary for the meeting, especially the agenda that shareholders must take sufficient time to study before making a decision.
 - 8.2.5 They will support and promote the use of technology such as bar codes, ballot cards, or others for use in shareholder meetings for both registration of shareholders and score counting and display. So that the meeting can be done quickly, accurately, transparently, and verifiably. The voting results will be

disclosed in the minutes of the shareholders' meeting, along with the votes of approval, disapproval, and abstention for each agenda.

- 8.2.6 There will be an independent person to witness the vote counting process or a person who counts or checks the votes in the meeting, such as the auditor of the company or a legal advisor, and disclosed the results of the vote counting or verification to the meeting and recorded in the minutes of the meeting as well.
- 8.2.7 The Board of Directors recognizes the importance of holding the annual general meeting of shareholders and respects their rights; therefore, they encourage all directors to attend the shareholders' meeting.
- 8.3 The Board of Directors will ensure that the disclosure of resolutions at the shareholders' meeting and the preparation of minutes of the shareholders' meeting are accurate and complete, including
 - 8.3.1 They will ensure that information about the date, time, place, and agenda of the shareholders' meeting is provided; as well as all information relating to matters to be decided in the shareholders' meeting with explanations and reasons according to the agenda provided to the shareholders in advance sufficiently and in time for each shareholders' meeting. Moreover, the company has a policy to allow shareholders to research the information before the meeting date through the website.
 - 8.3.2 After each shareholder meeting, they will ensure that the content of the meeting is compiled, which includes agenda details, a list of directors both attending and absent, meeting resolutions, voting, as well as questions and opinions of shareholders, prepared in the form of "AGM Minutes" published on the company's website and delivered to the Stock Exchange of Thailand and/or related agencies within 14 days from the meeting date, which is in accordance with the requirements of the SEC and the SET. They will also disclose to the public the resolutions of the meeting and voting results for each agenda of the meeting through the system of the Stock Exchange of Thailand within the time specified by law and in accordance with the requirements of the SEC and the SET.
 - 8.3.3 They will promote the exercise of shareholders' rights and will not restrict shareholders' rights by disclosing information through the company's website in advance. Additionally, the company will not present documents containing additional important information during the shareholders' meeting and will not add meeting agendas or change important information without notifying the shareholders in advance.
 - 8.3.4 They will ensure that there is an opportunity for shareholders to receive news and information that is up-to-date through the company's website regularly.

Business Code of Conduct

Directors Code of Conduct

- 1. All directors must behave and make decisions with care and suitability and perform their responsibilities with honesty and integrity for the best interest of the company.
- 2. Directors must not use their position as directors for personal benefit or the benefit of the individual involved, either directly or indirectly. Additionally, directors must disclose any personal interests that may result in a conflict of interest for the company or a conflict of interest with the firm.
- 3. Directors must not misuse information received from their position as directors of the company. It is illegal to trade in company securities using insider information. Directors must accurately, timely, and in compliance with the stipulated criteria report their holdings of the company's securities.
- 4. Directors are not permitted to expose trade secrets or important business information to third parties, nor are they permitted to supply non-public information to anyone.
- 5. In terms of making decisions on behalf of the company, directors must take into account the legitimate interests of the company's stakeholders, including shareholders, employees, customers, and trading partners/creditors.
- 6. Directors must scrupulously adhere to the law while maintaining transparency and accountability. Directors must not accept any offers, presents, or other valuable items from stakeholders with the intent to influence any business decision or action, and they must not take any action or have any assignments that are fraudulent, dishonest, or corrupt.
- 7. Directors must protect the rights of shareholders.
- 8. The Board of Directors must not decide to provide unreasonable benefits to shareholders or other individuals by using the company's expenses or from the shareholders' equity.

Executive Code of Conduct

- 1. The business should be managed with honesty and for the best interest of the company.
- 2. Execute responsibilities by applying knowledge and managerial skills to the best of their abilities in all situations.
- 3. Handle their work with caution and wisdom, and avoid creating obligations that may later conflict with their duties.
- 4. Responsible for their own decisions and actions, as well as able to clarify or explain.
- 5. Not seek benefits for themselves and related people by using any company information that has not yet been revealed to the public and shall not take any action in a manner that may result in a conflict of interest of the company.
- 6. Prioritize the growth of employees' knowledge and abilities by providing ample and consistent opportunities for growth.

- 7. Comply with all employment-related laws and regulations, and listen to employee suggestions.
- 8. Employees should be treated with politeness, respect the individual and the dignity of humanity; and avoid any unfair action that may threaten and put pressure on the mental state of employees.
- 9. Emphasize to employees that they need to understand the code of conduct and the roles that they can perform in order to encourage appropriate behavior within the framework of the code of conduct throughout the company.
- 10. Employees at all levels should instill a sense of social responsibility by refraining from performing actions that may harm natural resources and the environment.
- 11. Conduct or control employees to closely adhere to the law's and rules' intent.
- 12. Maintain security. Employees must keep corporate and customer information confidential without disclosing company information or news that should not be disclosed.

Employees Code of Conduct

Employees are responsible for understanding and complying with the code of conduct. When in doubt or question, they should consult with the supervisor, Human Resources, or a person assigned by the company to be responsible for monitoring compliance with the code of conduct. This includes notifying supervisors or responsible persons when they see a violation or non-compliance with the code of conduct and cooperating in investigating various facts with departments or persons assigned by the company.

Code of Conduct towards stakeholders

The company has established guidelines for directors, executives, and employees to adhere to as the basic principles for business operations are as follows:

Code of conduct for shareholders

- 1. Treat all shareholders equally in terms of information disclosure and shareholder meeting, according to relevant regulations and laws.
- Comply with the law, the company's objectives and regulations, board resolutions, and resolutions of the shareholders' meeting to follow the best practices of the principles of corporate governance, ethics, and code of business conduct.
- 3. Manage the business of the company for progress and stability and to generate appropriate returns for shareholders.
- Execute duties and make decisions with competence and concern by applying knowledge, experiences, expertise, and management skills to the best of their abilities.
- 5. Report the status and performance of the company to the shareholders in an equitable, regular, and truthful manner.
- 6. Not attempting to gain advantages for oneself or others by utilizing any company information that has not been disclosed to the public.

- 7. Do not improperly disclose the company's confidential information to others.
- 8. Do not take any action in a manner that may cause a conflict of interest with the company.
- 9. Prepare the company's website as a channel for shareholders to receive the company information.

Code of Conduct for Customers

- Produce high-quality products and adhere to contracts, terms, or conditions with 1 clients in a transparent and equitable manner. In the event that it cannot be performed, the company must act rapidly to negotiate with customers in advance to jointly discover alternatives and prevent damage.
- 2. Committed to creating satisfaction and confidence for customers in order to receive excellent quality services under appropriate safety and technology, as well as continually raising standards.
- 3. Disclose complete, accurate, timely, and accurate information about the service without distorting any facts, including maintaining a good and sustainable relationship.
- 4. Manage a customer service system and open communication channels so that customers can complain about their dissatisfaction and perform the best to respond to customer needs quickly.
- 5. Always give importance to maintaining confidential information of customers and not using such information for one's own benefit and/or other related persons.

Code of Conduct for Partners

- Comply with contracts, terms, and conditions towards trading partners strictly, 1. transparently, and equally.
- 2. Not demanding, accepting, or paying any benefits traded with partners dishonestly.
- 3. In case the conditions cannot be fulfilled, the company should immediately notify its partners in advance in order to collectively consider finding solutions to problems with reasonable principles.

Code of Conduct for Competitors

- Treat competitors equally and fairly, and based on fair returns to both parties. 1.
- 2. Not demanding, accepting, or paying any benefits traded with partners dishonestly.
- 3. Do not seek confidential information of business competitors through dishonest or inappropriate means.
- 4. Do not harm the reputation of trade competitors by falsely accusing them of slander.

Code of Conduct for Creditors

Comply with contracts, terms, and conditions towards creditors strictly, transparently, 1 and equally.

- 2. Report the financial performance of the company to creditors on a regular basis with honesty, precision, and timeliness.
- 3. In case the conditions cannot be fulfilled, the company should immediately notify its creditors in advance in order to collectively consider finding solutions to problems and preventing damages.

Code of Conduct for Employees

- 1. Provide fair returns and appropriate compensation according to the knowledge, competencies, responsibilities, and performance of each employee.
- Appointment, transfer, rewarding, and punishing of employees must be done with equality, sincerely, and based on knowledge, ability, and suitability, including the action or conduct of that employee.
- Treat employees on the basis of fairness and provide importance to the development and transfer of knowledge and abilities of employees by giving opportunities to employees thoroughly and regularly.
- 4. Strictly comply with the law and regulations related to employees.
- 5. Always keep the working environment safe for employees' lives, physical health, and property.
- 6. Manage by avoiding any unfair action that may impact the stability of the employee's performance.
- 7. Listen to the opinions and suggestions of employees at all levels equally and equitably.
- Encourage employees to understand the code of conduct and roles in order to enhance behavior within the framework of the code of conduct throughout the company.
- 9. Encourage employees to participate in determining the direction of work, including solving problems of the agency and the company.
- 10. Encourage employees to pursue additional training in the fields relating to their job responsibilities.
- 11. Encourage employees to be good and virtuous.

Code of Conduct for Community, Society, and Environment

- 1. Do not take any action that harms natural resources or the environment beyond what is required by law.
- 2. Do not support any action that is harmful to society or morality and/or that promotes vices.
- Give importance to community and social activities by focusing on the development of society, community, and environment, and by focusing on the creation and conservation of natural resources.
- 4. Support activities that enhance public interest.

- 5. Continuously inculcate awareness of social and environmental responsibility in the company and employees at all levels.
- 6. Cooperate and monitor to ensure strict adherence to applicable rules and regulations.
- 7. Respond quickly and effectively to incidents that have an impact on the community and the environment as a result of the company's operations in full cooperation with government officials and relevant entities.
- 8. Set up a grievance system for issues that may harm the community, conduct a cause investigation, improve, and promptly notify the complaint of the results.

Exchanging gift, Entertainment, and Receptions Code of Conduct

- 1. Not demanding, accepting, or agreeing to receive money, gifts, or other benefits from persons related to the company's business.
- 2. Giving or receiving presents may be done in accordance with traditional practices, but not in order to induce someone to act or refrain from acting wrongly, which influences business decisions or provides unfair benefits.
- 3. The exchange of presents should be done freely and has no additional value. Once the transaction has been completed, report to the superiors in the appropriate hierarchical order. If the gift of money or goods is worth more than three thousand baht, refuse to accept it and return it.

Major changes and developments in policies, practices, and corporate governance system in the previous year

Significant changes and developments related to the review, policies, guidelines, and corporate governance systems or charter of the Board of Directors in the past year

- 1. Amend the anti-corruption policy and whistleblowing policy to clearly identify those who are responsible for receiving complaints, investigations, and those who report results and consider sanctions.
- 2. Determine a written vision and mission.
- 3. Determine a written risk management plan.
- 4. Set a budget and the investment plan for 2023, as well as review the report on the use of money according to the investment plan and compare the actual performance with the budget on a quarterly basis.
- 5. Establish written rules and conditions for entering into transactions with persons who may have conflicts of interest.
- 6. Appoint company secretary
- 7. Restructure the executive committee to have the proper number of members for the efficiency of the company's activity.
- 8. Improve the risk management policy to keep up with the current situation, including reporting the results of risk management monitoring to the Board of Directors.
- 9. Approve the personal data protection policy according to the Personal Data Protection Act B.E. 2562

Other practices according to the principles of corporate governance code

The company arranges to review the good corporate governance policy annually.

In addition, the company has a Code of Best Practice policy to promote transparency and be beneficial to the company's business operations, which will create confidence among shareholders, investors, and all parties involved. Therefore, the Board of Directors has established corporate governance principles. This is in line with sound corporate governance guidelines, which are determined by the Stock Exchange of Thailand. The principles of corporate governance of the company cover 5 categories as follows.

Principle 1 The Rights of Shareholders

The company realizes and provides importance to the fundamental rights of shareholders both as the owner of the company and as an investor in securities, such as the right to buy, sell, or transfer the securities; the right to receive sufficient company information; the right to receive profit sharing from the company; the various rights in shareholders' meetings; the right to express opinions; and the right to participate in decision-making on important matters of the company, such as dividend allocation, the appointment or termination of directors, the appointment of an auditor, the approval of important transactions that affect the direction of the company's business operations, etc. In addition to the basic rights mentioned above, the company has also taken various actions which facilitates the exercise of shareholders' rights as follows.

1. The company will hold an annual general meeting every year, which will be held within 4 months from the end of each accounting period, as well as send a meeting invitation letter and meeting information according to various agendas to shareholders 7 days before the meeting date and announce the meeting date in a newspaper for 3 consecutive days prior to the meeting date.

2. The company will publish information supporting the agenda of the shareholders' meeting on the company's website at least 21 days in advance, as well as clarify the rights of shareholders in attending the meeting and their voting rights.

3. In the case that shareholders are unable to attend the meeting in person, the company provides opportunities for shareholders to appoint independent directors or any other person as their proxies to attend the meeting on their behalf by using one of the powers of attorney that the company sent along with the notice of the meeting.

 Prior to the meeting, the company will allow shareholders to submit their opinions, suggestions, and inquiries in advance of the meeting date via the company secretary's email address.

5. In the company's meeting, shareholders will be given the opportunity to raise questions, provide feedback, or express opinions to the meeting on various issues as relevant directors and executives will attend the meeting to answer questions and provide details in the meeting.

Principle 2 The Equitable Treatment of Shareholders

The company will provide equal opportunities to all shareholders and determine the right to vote at the meeting according to the number of shares. One share is equal to one vote and does not take any action that limits, violates, or deprives the rights of shareholders. Whether it's a major shareholder, minority shareholders, institutional investors, or foreign shareholders, the company assigns independent directors to take care of minority shareholders. Minority shareholders can make suggestions, comments, or complaints to independent directors, who will consider appropriate action in each matter. For example, if it is a complaint, the independent directors will investigate the facts and find appropriate solutions. In the case of a suggestion that is important and affects the stakeholders or the business of the company, independent directors will present the matter to the Board of Directors' meeting to consider and set as an agenda of the shareholders' meeting, etc. The company will disseminate such information via the company's website at least 7 days prior to the date of the shareholders' meeting.

The meeting proceeds according to the company's articles of association in order of the agenda. Complete details of each agenda were presented and there is a clear display of information for consideration, including not adding an agenda without informing the shareholders in advance unnecessarily, especially for an important agenda that shareholders must take time to research information before making a decision. However, in the case that the

56-1 one report

shareholders are unable to attend the meeting in person, the company provides opportunities for shareholders to appoint independent directors or any other person as their proxies to attend the meeting on their behalf by using the power of attorney that the company sent along with the notice of the meeting. Voting is transparent according to the agenda set and the agenda for the election of directors will allow shareholders to exercise their rights to appoint directors by voting individually.

In addition, the company has established measures to prevent the wrongful use of inside information (insider trading) of related persons, which are directors, executives, and employees in departments related to inside information (including their spouses and minor children) by prohibiting related persons from trading in the company's securities for at least 1 month prior to the disclosure of the quarterly and annual financial statements and should wait at least 24 hours after the disclosure of such information to the public, including prohibiting the disclosure of that information to other people as well. The company has informed directors and executives regarding the duties that executives have to report on their securities holdings in the company and penalty provisions accordingly under the Securities and Exchange Act B.E. 2535 and the regulations of the Stock Exchange of Thailand. In the case that directors or executives trade the company's securities, they must report the holdings of securities in the company by themselves, their spouses, and minor children under Section 59 of the Securities and Exchange Act B.E. 2535 within 3 business days to the Office of the Securities and Exchange Commission for further dissemination to the public. The company has a measure to monitor the securities trading of directors and executives by assigning the company secretary to coordinate with directors and executives to collect the securities trading transactions of directors and executives to report to the office and acknowledgement of every meeting of the Board of Directors.

Principle 3 The Role of Stakeholders

The company places importance on the rights of all stakeholders, not only internal stakeholders such as employees and executives of the company but also external stakeholders such as competitors, partners, and customers, etc. The company recognizes that supports and comments from stakeholders will benefit its operations and business development and has therefore complied with relevant laws and regulations to ensure that the rights of stakeholders are protected. Furthermore, the company has promoted cooperation between the company and its stakeholders to build security for the company according to the following guidelines

(A) Shareholders : The company emphasizes continuous organization development, which will result in increasing income and profit, increasing company value, and the highest return to shareholders
 (B) Customers : The company emphasizes standard and quality products, including honest, fair services, and responsibilities to customers

104

(C)	Partners	:	The company holds policies that are fair and follow business	
			conditions and/or mutual contract agreements to foster great	
			business relationships that are beneficial to all parties	
(D)	Competitors	:	The company promotes fair competition, including following	
			rules and regulations	
(E)	Employees	:	The company holds a policy of equal and fair treatment for every	
			employee, providing appropriate benefits and compensation,	
			including employee developmental support	
(F)	Community	:	The company emphasizes community and society by operating	
	and Society		ethically and supporting appropriate activities that promote and	
			support society	

(G) Environment : The company continuously operates strictly according to environmental law, regulations, and develops guidelines for controlling the impact on the environment

The company will operate according to different laws and regulations, ensuring good treatment for all stakeholders.

Principle 4 Disclosure and Transparency

The company recognizes the importance of accurate, complete, and transparent disclosure of both general and financial information in accordance with the rules of the Securities and Exchange Commission and Stock Exchange of Thailand, as well as other important information that may affect the company's securities prices. The company has disclosed information to its shareholders, investors, and the public through various channels of the Securities and Exchange Commission, the Stock Exchange of Thailand, and the company's website which is www.24con-supply.com.

The company has assigned Mr. Santi Maneewong to be responsible for investor relations in order to communicate with investors, shareholders, analysts, and relevant government agencies. Moreover, the Board of Directors is responsible for the company's financial statements and the information presented in the annual report. The financial statements are prepared in accordance with Thailand's Generally Accepted Auditing Standards using accounting policies appropriate to the company's business and consistently implementing them, including adequate disclosure in the financial statements. The financial report and internal control system, as well as information presented in the notes to the financial statements, are reviewed by the Audit Committee.

Principle 5 Responsibilities of the Board of Directors

1. Structure of the Board

The Board of Directors consists of persons with knowledge and capability. They play an important role in determining policies and organizational overview. Additionally, they also play an important role in supervising, auditing, and evaluating the company's performance to ensure that it is in accordance with the plan.

Currently, the Board of Directors comprises 6 persons, including 3 non-executive directors who qualify as independent directors. This will result in a balance in the voting consideration of various matters. There is also an Audit Committee consisting of 3 independent committees that acts as the shareholders' representative in supervising the company's operations for accuracy and transparency.

According to the regulations of the company, the directors must retire at a ratio of one third at the annual general meeting of shareholders. If the number of directors required to retire cannot be divided into three parts, then the number closest to one-third shall be retired. Directors who have to retire in the first and second years after the registration of the company must use the method of drawing lots to determine who will leave. In the following years, the director who has been in office for the longest time will be retired from office. However, the retiring director may be re-elected.

In addition, the Board of Directors has appointed 3 subcommittees, namely the Audit Committee, Risk Management Committee, and Executive Committee, to perform specific duties and propose matters to the Board of Directors for consideration or acknowledgment. Each subcommittee has the rights and duties specified in the powers and duties of each committee.

The company has clearly defined the scope of powers and duties of each committee, especially the Executive Committee and Managing Director. As a result, the Executive Committee and the Managing Director have no absolute power. There is a balance of an important resolutions that must be approved by the Board of Directors or the shareholders' meeting (depending on the case), including the company's directors will not be able to approve any transactions that they or a person who has a conflict of interest in their own interest have proposed.

The company has a secretary of the Board of Directors who has to provide regulatory advice that the committees are required to know and perform their duties in overseeing the activities of the committee, as well as coordinate the implementation of the resolutions of the board of directors.

2. Roles, duties, and responsibilities of the board

The Board of Directors consists of people who have knowledge, a wide range of skills and expertise, and leadership that is accepted. Furthermore, the Board of Directors will participate in setting the vision, mission, strategy, policy, business practice guidelines, and supervise the company's operations in accordance with the law, objectives, regulations, and resolutions of the shareholders' meeting. For the benefit of closely monitoring and supervising the operations

106

of the company, the Board of Directors established various committees to follow up on and supervise those operations.

2.1 Corporate Governance Policy

The company has adopted the Corporate Governance Policy in writing. The Corporate Governance Policy and policy compliance will be reviewed at least once every year. Moreover, the company shall strictly comply with rules and regulations set by the Securities and Exchange Commission, Stock Exchange of Thailand, and/or Market for Alternative Investment and disclose its corporate governance performance in its annual report and annual registration statement (Form 56–1 One Report).

2.2 Code of Ethics

The company has established a code of conduct for the Board of Directors, management, and employees to adhere to as a guideline for performing their duties according to the company's mission with honesty, integrity, and fairness, both in relation to the company, all groups of stakeholders as well as the public and society. This includes setting up a system to follow up on the implementation of such guidelines on a regular basis.

In addition, the company has announced and notified all employees to acknowledge and strictly adhere to such guidelines, including their implementation.

2.3 Conflict of Interest

The company has set a conflict of interest policy based on the principle that any business decision must be made in the best interest of the company and that any act that may cause a conflict of interest must be avoided. A person who is related to or connected with a given transaction shall notify the company of such relation or connection and shall not participate in a decision–making process and approve that transaction.

The Audit Committee shall report related-party transactions and conflicts of interest that have been thoroughly considered in accordance with rules set by the Securities and Exchange Commission and/or Stock Exchange of Thailand to the Board of Directors. Such transactions and conflicts of interest shall also be disclosed in financial statements, annual report, and annual registration statement (Form 56–1 One Report).

2.4 Internal Control System

The company places importance on its internal control system at both the management and practitioner levels. To ensure efficiency, the company has clearly specified the authorities, duties, and responsibilities of executives and practitioners in writing, supervised the use of company assets, and separated the roles and responsibilities of practitioners from those of monitoring and assessing officers. The Audit Committee has been appointed to review the internal control system and conduct an internal audit to ensure that it is appropriate and productive, and it outsources experts to follow-up on the internal control system and report the results of the audit to the Audit Committee in order to ensure that the company's key operations have been carried out in accordance with the prescribed guidelines and are efficient.

2.5 Board of Directors' Report

The Audit Committee is responsible for reviewing a financial report prepared jointly by the finance and accounting departments and the auditor to submit to the Board of Directors every quarter. The Board of Directors is responsible for financial statements and financial information (statement of the Board of Directors' responsibilities for financial report) to confirm that such financial statements are prepared in accordance with Generally Accepted Auditing Standards and audited by the company's auditor in the annual report and shall ensure that all important information, both financial and non-financial, is disclosed truthfully and completely on a regular basis.

3. Board of Directors' Meeting

According to the company's regulations, the company organizes a meeting of the board of directors at least every 3 months and will arrange special meetings as necessary. The meeting invitation letter was sent 7 days prior to the meeting date, except in the urgent case that the company needed to protect its benefits. Therefore, in each meeting, there is a clear agenda for the meeting, and there are sufficient and complete supporting documents for the meeting that are delivered to the board in advance in order for the committee to have sufficient time to study the information before attending the meeting. In a meeting, the chairman of the Board of Directors and the Managing Director jointly set the meeting agendas and consider the agendas of the Board of Directors' meetings by giving opportunities for each director to propose matters to be considered on the meeting's agenda, where all directors are able to discuss and express their opinions openly. The chairman of the meeting has to compile the opinions and conclusions from the meeting. The Board of Directors shall hold a majority vote in which one director has one vote. The directors with conflict of interest will not attend the meeting and/or vote on such matters. If the votes are equal, the chairman of the meeting will have one more vote to decide. In addition, the minutes of the meeting will be made in writing after the meeting is completed and certified by the Board of Directors to be ready for the Board of Directors and the relevant persons to examine. In the past, the company has sent supporting documents in advance every time, thus giving the directors sufficient time to research information on various matters and assigning the Secretary of the Board to attend every meeting. The Secretary of the Committee will record the minutes of the meeting and send them to the Chairman of the Board of Directors for consideration and signing to certify the accuracy by proposing to the meeting to certify in the first agenda of the next meeting, including storing information or documents about various meetings for easy searching in later references.

4 Remuneration

Due to the small size of the organization and the small number of personnel in the company, the company does not appoint the Nomination and Remuneration Committee. The company has operated to inspect and balance the issues through the determination of a balanced director structure through the presence of a non-executive committee and does not have a kinship relationship with the company's management. Therefore, the Audit Committee is independent and has no interest in the aforementioned transactions. The nomination and remuneration will be considered by the Board of Directors, which is not for the benefit of any person. The company requires disclosure of remuneration paid to directors and executives in the form prescribed by the Office of the Securities and Exchange Commission.

5. **Development of Directors and Executives**

The company has a policy to provide and facilitate development and training programs for directors involved in the company's management, including the board members, audit directors, executives, and company secretary, in order to continually improve their effectiveness. When there is a change in the company's board of directors, the company will provide guidance on the company's business operations and useful information for the new directors to perform their duties in order to promote the performance of duties with continuous efficiency within the framework of good corporate governance.

Corporate Governance Structure and important information about the Board Sub-committees, Executives, Employees and Others

* The company hires IA Signature Co., Ltd. as an internal auditor who is an outsourced service provider with a year-to-year contract period.

The audit committee of the company will be responsible for selecting and appointing qualified internal auditors every year.

Information about Directors

Composition of the Board of Directors

The Board of Directors consists of 6 directors, namely 3 independent directors and 3 executive directors. Capital Market No. Tor Jor. 39/2559 Re: Application for and Approval of Offer for Sale of Newly Issued Shares dated September 30, 2016 and any amendments thereto tenure.

Term in the Office

At the annual general meeting of shareholders one-third of the directors shall retire from office and the directors who have been in office the longest shall retire. Therefore, the Board of Directors will consider on selecting persons to be appointed as directors or executives of the Company which must be a person who has complete qualifications under Section 68 of the Public Limited Company Act B.E. 2535 and the relevant notifications of the Securities and Exchange Commission as required by law as well as considering other factors in combination, such as knowledge, ability, experience related to the business, and contributing to the Company's business operations, etc.. The criteria and procedures are as following

- 1. The Company's directors must perform their duties in accordance with the law, objectives, and regulations of the company including the resolutions of the shareholders' meeting.
- 2. The Board of Directors consists of not less than 5 directors and not less than half of the directors must reside in the Kingdom. Also, the directors must have qualifications and not have prohibited characteristics according to the law on public limited companies and other relevant laws.
- 3. The Board of Directors must have independent directors at least one-third of the entire Board of Directors considering that there are no less than 3 persons, all of whom are fully qualified in accordance with the criteria for qualifications of independent directors as specified in the Notification of the Capital Market Supervisory Board No. TorJor. 39/2559 Re: Application for Approval and Granting of Approval for Offering of Newly Issued Shares (Codified).
- 4. Company directors can hold directorship positions in other companies. However, being such a director must not be an obstacle to the performance of duties as a director of the Company and must be in accordance with the guidelines of the Securities and Exchange Commission and the Stock Exchange of Thailand. In this regard, holding a directorship in a listed company must not exceed 5 listed companies.
- 5. Directors cannot operate a business of the same nature and in competition with the business of the Company or become a partner or director in other juristic persons of the same nature and in competition with the business of the Company, whether for his own benefit or for the benefit of other, unless the director notifies the shareholders' meeting prior to the appointment resolution.
- 6. Directors and executives must report to the Company about the interest of related persons which is an interest related to the management of the Company or its subsidiaries in accordance with the rules, conditions and procedures prescribed by the Capital Market Supervisory Board.
- 7. The Chairman of the Board of Directors shall be independent and must not be the same person as the Chief Executive Officer.
- 8. In every annual general meeting of shareholders, one-third of all directors shall retire from office. If the number of directors cannot be divided exactly into three parts, then the number nearest to one-third shall be issued. The director who has been in office the longest shall retire first. A retired director may be re-elected.

- 9. Before every annual general meeting of shareholders, the Company will give shareholders an opportunity to nominate a list of persons who will replace the directors who are due to retire by rotation. The Board of Directors will compile such names to consider qualifications according to relevant regulations and select the appropriate list for further submission to the shareholders' meeting for approval.
- 10. The shareholders' meeting appoints the directors according to the following criteria and methods:
 - 10.1. One shareholder has votes equal to the number of shares holding where one share equals one vote.
 - 10.2. Each shareholder may exercise his/her votes to elect one or more persons to be directors. In the case that several persons are elected as directors, the votes cannot be divided for any individual.
 - 10.3. Persons receiving the highest number of votes in descending order will be elected as directors equally to the number of directors to be or to be elected at that time. In the case that the persons elected in descending order have equal votes, which would otherwise cause the number of directors to be exceeded or will be elected, the person presiding over the meeting shall have a casting vote.
- 11. In the case that a director's position becomes vacant due to reasons other than retirement by rotation, the Board of Directors may select a person who has qualifications and does not have prohibited characteristics according to the law on public limited companies and Securities and Exchange Act as a substitute director at the next Board of Directors' meeting, unless the remaining term of that director is less than two months. The person who replaces the director will be in the position of director only for the remaining term of the director he replaces. The resolution of the Board of Directors must consist of votes of not less than three-fourths of the number of remaining directors.
- 12. The shareholders' meeting may pass a resolution to remove any director from office before the expiration of the term with a vote of not less than three-fourths of the number of shareholders attending the meeting and having the right to vote as well as having shares altogether not less than half of the number of shares held by shareholders attending the meeting and having the right to vote.
- 13. Assign shareholders to approve remuneration for the Board of Directors. The remuneration structure and rate must be appropriate to the responsibilities and motivate the Board of Directors to lead the organization to operate according to both short-term and long-term goals.

Qualifications of the Board of Directors

- 1. Company Directors must have qualifications and must not have prohibited characteristics as specified in the Public Company Limited Act B.E. 2535 (and as amended) as well as must not have any characteristics that indicate a lack of suitability to be entrusted with managing a publicly held business as specified by the Securities and Exchange Commission. In addition, they must be persons whose names are listed in the director and executive database of the issuing company according to the Notification of the Capital Market Supervisory Board concerning Rules for Listing Names of Persons in the Director and Executive Database of the Company issuing securities.
- 2. Be a person with integrity, good ethics, good working background, and having enough time to devote knowledge, competence, and fully perform duties for the Company.
- 3. Have knowledge or experience in business administration or in finance, accounting, or other fields that the Board deems appropriate.
- 4. Be able to attend every Board of Directors Meeting and Shareholders Meeting, except in case of necessity or force majeure.

- 5. Directors cannot operate a business of the same nature and in competition with the business of the Company or become a partner or director in other juristic persons of the same nature and in competition with the business of the Company, whether for his own benefit or for the benefit of other, unless the director notifies the shareholders' meeting prior to the appointment resolution.
- 6. Company directors must notify the Company without delay, if there is an interest in a contract made by the company whether directly or indirectly or holding shares, debentures, increasing or decreasing in the company or affiliated.
- 7. Other qualifications that may be added to comply with the law and other suitability later.

Election of Company Directors and Positions

The election of the Company's directors shall be made by the shareholders' meeting, in accordance with the following criteria:

- 1. One shareholder has vote equal to 1 share per 1 vote.
- 2. In electing directors, voting may be used to select individual directors or many directors at a time, as the shareholders' meeting deems appropriate. But, in each resolution, shareholders must vote with all votes they have according to item 1. The votes cannot be divided to any person in any amount. Therefore, shareholders cannot divide their votes in the election of directors, so that any person can be more or less according to Section 70 paragraph one of the Public Company Act (NON-CUMULATIVE VOTING only).
- 3. In voting for the election of directors, the majority vote is used. If there are equal votes, the chairman of the meeting shall have a casting vote.
- 4. The Board of Directors shall hold office for a term of 3 years each. Directors retiring under this clause may be re-elected for another term. In addition, to retiring from office by rotation Director vacates office when:
 - (a) dead
 - (b) resign
 - (c) lack of qualifications or having prohibited characteristics under the law on public companies.
 - (d) removal by a resolution of the meeting
 - (e) dismissal by a court order
- 5. When any director resigns from the position, he/she may submit his or her resignation letter to the Registrar for acknowledgment.
- 6. Company Directors who willing to take a position as a director of another company must be approved by the Board of Directors.

2) Nomination of Independent Directors

The company selects independent directors by considering the qualifications under the Public Limited Act B.E. 2535, the law on securities and stock exchange Announcement of the Capital Market Supervisory Board including the announcement of regulations and/or related regulations. The company will provide independent directors at least one third (1 in 3) of the total number of directors of the company, but not less than three (3) people. The company has criteria for selecting the executive committee based on qualifications as follows.

Qualifications of Independent Directors

- Holding shares not exceeding one (1) percent of the total number of shares with voting rights of the Company, parent company, subsidiary, associated company, major shareholder or controlling person of the company, including the shares held by related persons of that independent director as well.
- 2. Not being or having been an executive director, employee, staff, advisor who receives regular salary or a controlling person of the company, parent company, subsidiary company, associated company, same-level subsidiary company major shareholder or of the person having control over the company, unless he or she has retired from the aforementioned characteristics for at least two (2) years prior to the date of submission of the application for permission to the SEC Office. However, such prohibited characteristics do not include the case where independent directors used to be government officials or consultant of government agencies which are major shareholders or a controlling person of the Company.
- 3. Not being a person related by blood or by legal registration as father, mother, spouse, sibling, and child, including spouse of child of other directors, executives, major shareholders controller or a person who will be nominated as a director executive or controlling person of the company or its subsidiaries.
- 4. Not having or having had a business relationship with the Company, parent company, subsidiary company, associated company, major shareholder or a controlling person of the company in a manner that may obstruct the exercise of independent judgment including not being or having been a significant shareholder or a controlling person of a person having a business relationship with the company, parent company, subsidiary company, associated company, major shareholder or a controlling person of the company, major shareholder or a controlling person of the company, associated company, major shareholder or a controlling person of the company, associated company, major shareholder or a controlling person of the company, unless he/she has retired from such a position for at least two (2) years prior to the date of submission of the application to the SEC Office.

Business relationship under the first paragraph including commercial transactions that are normally done for business operations, renting or renting real estate, transactions relating to assets or services, giving or receiving financial assistance by accepting or lending, guaranteeing, providing assets as collateral for liabilities and other similar behaviors that create a result to the company or the contracted parties to have debts that must be paid to the other party from 3 percent of the net tangible assets of the company or from 20 million baht or more, whichever is lower.

The calculation of such indebtedness shall be in accordance with the method for calculating the value of connected transactions pursuant to the Notification of the Capital Market Supervisory Board concerning Rules for Connected Transactions mutatis mutandis including debt obligations incurred during one (1) year prior to the date of business relationship with the same person.

- 5. Not being or having been an auditor of the company, parent company, subsidiary company, associated company, major shareholder or a controlling person of the company and not being a significant shareholder controller or partners of the audit firm which has auditors of the company, parent company, subsidiaries, associated companies, major shareholders or a controlling person of the company, unless the foregoing status has ended for at least two (2) years prior to the date of filing an application for approval with the SEC Office.
- 6. Not being or having been a professional service provider, including legal advisor or financial advisor which receives service fees of more than two (2) million baht per year from the Company, parent company, subsidiary company, associated company, major shareholder or a controlling person of the company and not being a significant shareholder controller or partner of that professional service provider as well, unless he or she has retired from such a position for not less than two (2) years prior to the date of filing an application with the SEC Office.

- 7. Not being a director who has been appointed as a representative of the Company's directors, major shareholder, or shareholders who are related to major shareholders.
- 8. Not operating a business that has the same nature and is in significant competition with the business of the Company, or its subsidiaries, or not being a significant partner in a partnership or being an executive director, employee, staff, advisor who receives regular salary or holding more than one (1) percent of the total number of shares with voting rights of any other company which operates a business that has the same nature and is in significant competition with the business of the Company or its subsidiaries.
- 9. Not having any other characteristics that make him unable to express independent opinions on the operations of the company.

Independent directors may be assigned by the Board of Directors to make decisions about the business operations of the Company, its parent company, subsidiaries, associated companies, same-level subsidiaries, major shareholder, or a controlling person of the company. The decision can be made in the form of a collective decision.

In the case that the person applying for appointment as an independent director is a person who has or used to have a business relationship or provide professional services exceeding the value specified in item 4. or 6., the company shall arrange for the opinion of the Board of Directors to show that it has considered in accordance with Section 89/7 that the appointment of such person does not affect the performance of duties and the giving of independent opinions. The following information was also disclosed in the invitation letter to the shareholders' meeting in the agenda regarding the appointment of independent directors.

- (a) The nature of the business relationship or the provision of professional services which makes such person qualified not in accordance with the specified criteria.
- (b) Reasons and necessity for maintaining or appointing such person as an independent director.
- (c) Opinion of the Board of Directors of the applicant in proposing the appointment of such person as an independent director.

Term of Office and Election of Independent Directors

- An independent committee shall hold office for a term of 3 years and an independent committee who vacates office upon the expiration of the term may be re-appointed and the independent committee should not hold office for more than 3 consecutive terms, unless the Board of Directors considers that holding office for more than 3 consecutive terms does not affect independence qualifications. Independent directors will retire from office when:
 - (a) dead
 - (b) resign
 - (c) lack of qualifications as an independent director according to the charter or according to the rules of the Stock Exchange of Thailand including relevant laws
 - (d) termination of office as a director of the Company
 - (e) a shareholders' meeting or the Board of Directors resolved to retire from office
 - (f) Removal by a court order.
- 2. Any independent director who wishes to resign from the position must submit a resignation letter to the Chairman of the Board of Directors, which should be notified in writing at least 1 month in advance, together with reasons. The company will notify the resignation together with a copy of the resignation letter to the Stock Exchange of Thailand. In the case that all independent directors vacate office, the independent committee who vacates office must act in office to continue until a new independent committee takes office.

3. In the case that the independent director position becomes vacant due to reasons other than retirement by rotation, the Board of Directors shall appoint a person who is fully qualified to be an independent director within 90 days in order for the number of independent directors to be completed as specified by the Board of Directors. The replacement independent director can only hold office for the remaining term of the independent director he replaces.

3) Nomination of the Audit Committee

The Company has criteria for selecting and appointing members of the Audit Committee according to their qualifications as follows

- 1. The Audit Committee consists at least three independent Company directors.
- 2. The audit committee has appropriate skills and expertise according to the assigned mission. At least one member of the Audit Committee must have knowledge, understanding or experience in accounting or finance.

Internal Control and Related Transactions

Internal Control

The Company realizes the importance of a good internal control system which will help the business to operate efficiently and effectively. The Company has an Audit Committee and a Risk Management Committee to review the appropriate internal control system and ensure that the internal audit is in line with the principles of good corporate governance. The meeting of the Audit Committee and the Risk Management Committee is conduct to approve transactions related to the Company's internal control system, with auditors, internal auditors and executives attending the meeting as appropriate, in order to present the information to the Audit Committee and the Risk Management, follow up on progress and find solutions to remarks in order to be able to resolve the remarks in a timely manner.

In this regard, the Company has appointed an internal auditor who is an independent external agency by appointing IA Signature Co., Ltd., which operated by Mr. Sutee Tanwanichkul, who has excellent knowledge and skills in accounting and internal control systems, to act as a consultant in establishing a strong internal control system, as well as eliminating risks and examining abnormal transactions. The Audit Committee has considered that the qualifications mentioned above are sufficient to perform the duty as the Company's internal auditors.

In addition, the company's auditor from PricewaterhouseCoopers ABAS Ltd. has audited the Company's internal control system in relation to the preparation and presentation of the financial statements of the company to ensure the suitability and credibility of financial reports. In the event that the auditor finds additional remarks on the Company's internal control system, the Company will be notified along with suggestions as information for further improvement.

Each of the aforementioned divisions has presented a concrete report showing observations, suggestions, and follow-ups that will result in internal control helping to prevent waste that will occur to the organization.

The adequacy and suitability of the Company's internal control system

At the Board of Directors Meeting No. 1/2023 on February 27, 2023, with the Audit Committee attending, the Board of Directors assessed the internal control system by asking management about the adequacy of the internal control system of the Company, all 5 parts are

- 1) Organization and Environment
- 2) Risk Management
- 3) Management Operational Control
- 4) Information Systems and Data Communications
- 5) Tracking System

The Board of Directors is of the opinion that the Company has an internal control system that is sufficient and appropriate, including that the Company has a system to monitor and supervise operations that can protect the Company's assets from misuse by executives or without sufficient authority, as well as having an adequate internal control system on of transactions with major shareholders, directors, executives, or related persons.

Observations of the internal control system of the Company by the auditor

PricewaterhouseCoopers ABAS Co., Ltd. is an auditor licensed by the Securities and Exchange Commission, has audited the Company's financial statements. In auditing such financial statements in accordance with generally accepted auditing standards to express an opinion that the financial statements show the financial position, operating results and cash flows are materially correct in accordance with financial reporting standards. For remarks and suggestions on issues and internal control systems in accounting of the Company, the auditor reported such issues to the Audit Committee Meeting No. 1/2023 on February 27, 2023 and the Board of Directors Meeting No. 1/2023 on February 27, 2023 without finding any significant issues.

Assessment of the internal control system by internal auditors

IA Signature Co., Ltd., the Company's internal auditor, has been appointed to assess, audit and monitor the improvement of the Company's internal control system within the year 2022, by conducting a risk assessment and preparing an annual internal audit plan and conducting audits as well as monitoring the results of system improvements and reporting directly to the Audit Committee continuously with the main objective of evaluating efficiency suitability and adequacy of the internal control system also the compliance with relevant policies and regulations, including the appropriateness and reliability of the Company's financial reports.

Until now, internal auditors have conducted audits to ensure the internal control system covers the assessment of components of internal control (COSO) and assessment of risks from internal control systems in various processes, including:

- 1. Proposal of project bidding, sale of products and payment of compensation from sales
- 2. Budget management & purchasing products materials, equipment and setting up debt paying
- 3. Project management
- 4. After-sales service
- 5. Warehouse management and scrap management
- 6. Receipt of payment and revenue recognition from sales and revenue recognition project cost
- 7. Project asset control
- 8. Budget management and financial reporting
- 9. Human resource management
- 10. IT general controls (ITGC)

Each time of the audit, the internal auditor will issue a quarterly internal control audit report. At present, there are a total of 5 reports and all reports have been presented to the Audit Committee for consideration. The audit results and audit period can be summarized as follows

Summary of Internal Audit Report of 2023

No.	Audit period	Report date	Controls Systems
1	March, 10 - 16 2023	May 12, 2023	 Proposal of Warehouse management and scrap management
2	May, 10 - 16 2023	June 2, 2023	 Budget management & purchasing products - materials, equipment and setting up debt - paying, Budget management and financial reporting. Follow up and monitoring of Management Letter (Inspection 1/66, Proposal of Warehouse management and scrap management)
3	August, 7 – 11 2023	September 6, 2023	 Project management, After-sales service Follow up and monitoring of Management Letter (Inspection 2/66, Budget management & purchasing products - materials, equipment and setting up debt - paying, Budget management and financial reporting)
4	November 20 – 27, 2023	January 10, 2024	 Proposal of project bidding, sale of products and payment of compensation from sales Follow up and monitoring of Management Letter (Inspection 3/66, Project management, After-sales service) Assessment of components of internal control (COSO)

Criteria for random selection of projects used in auditing, internal auditors will consider the audit plan along with the construction status of the project during that period, for example, if the internal audit plan requires auditing of the sales process and system installation project management which focuses on the budgeting process, budget disbursement, internal auditors will select a random sample of projects that are in the initial construction phase or are under construction because the construction phase is a critical stage for budgeting and disbursement. If the internal audit plan requires auditing of procurement/hiring processes and recording of receipts or equipment control processes for installation, internal auditors will consider randomly selecting projects that are under construction/installation that have been in operation for a while, which will have quite a lot of purchase request documents and gradually receive goods for use in construction/installation, etc. The internal auditors will choose the scope of the audit mainly based on high-value projects that affect the overall performance of the company in each period.

According to the internal audit of the internal auditor, the internal auditor reported that there were no significant risks or impacts from the audit.

Head of internal audit of the Company

The Audit Committee Meeting No. 1/2023 held on February 27, 2023 resolved to hire IA Signature Co., Ltd., an outsource company, to perform the duties of an internal control auditor, with Mr. Sutee Tanwanichkul as the head of the internal audit department.

The Audit Committee has considered the qualifications of IA Signature Co., Ltd. and Mr. Sutee Talwanichkul and has an opinion that they are appropriate since they are independent and have qualifications, education and experience in working in internal audit and training in the courses related to the practice of internal auditing, such as the Internal Auditor of Thailand (CPIAT) license, CAC SME Certification, Thailand's Private Sector Collective Action Coalition Against Corruption Project, Certificate of Data Protection Foundation, Data Protection Officer ACIS Professional Center, Association of Internal Auditors of Thailand, etc.

In this regard, the consideration and approval of the appointment, removal, transfer of the head of internal audit of the Company must be approved by the Audit Committee, with the qualifications of the head of the internal audit as shown in Attachment 2.

Measures or procedures for approval of related party transactions

The Board of Directors' Meeting No. 1/2024 held on February 27, 2024, resolved to set up policies and procedures for approval of transactions between the Company or its subsidiaries and connected persons. who is a person who may have a conflict of interest having an interest or may have conflicts of interest in the future, such as major shareholders, directors, executives, controlling persons who will be nominated as executives or controlling persons and related persons and close relatives of such persons, etc., taking into account the reasonableness reasonable price and conditions of entering into the transaction This is to be transparent and beneficial to the Company and its subsidiaries. Including giving importance to the prevention of conflicts of interest.

However, when entering related transactions, The Company will comply with the Securities and Exchange Act, regulations, notifications, orders or requirements of the Securities

and Exchange Commission. Capital Market Supervisory Board and the Stock Exchange of Thailand involved in such matters Including complying with the requirements regarding the disclosure of connected transactions of the Company or its subsidiaries. According to the accounting standards set by the Federation of Accounting Professions, those who may have a conflict of interest or have a stake in the transaction will not be able to participate or have no right to vote in approving such transactions.

In case that the law requires that the connected transaction be approved by the Board of Directors. or the shareholders' meeting of the company The Company will arrange for the Audit Committee to attend the meeting to consider and give opinions on the necessity of the transaction and the reasonableness of such transaction.

Policies or trends for future related party transactions

The Company may enter into related transactions with persons who may have conflicts of interest in the future. If it is a normal business transaction and a normal business supporting transaction with general commercial conditions, the Company will proceed in accordance with the procedures and methods of related party transactions specified above before entering into the transaction. That is, it is in accordance with the principles approved by the Board of Directors as stipulated in the Securities and Exchange Act and strictly complies with the agreed contracts, including setting prices and conditions for transactions clearly, fairly and without causing any conflict of interest.

In the event that there will be connected transactions in the future, the Company will proceed in accordance with the measures for approval of related transactions as mentioned above. However, if there is a related party transaction that requires an opinion from the Audit Committee according to the rules and regulations of the Stock Exchange of Thailand on connected transactions, the Company will ask the Audit Committee to give opinions on the necessity and appropriateness of the related transactions. The Company has no policy to grant loans to persons who may have conflicts of interest or persons related to such persons, except according to the Company's regulations concerning employee welfare or according to the management approval authority or financial assistance to juristic persons in which the company holds shares in proportion to its shareholding. In addition, in the event that the Company has related transactions with persons who may have conflicts as mentioned above, the Company will propose to the Audit Committee to give opinions on the appropriateness of the related transactions, and in the event that the Audit Committee does not have expertise in considering related transactions, the Company will arrange for a person with special expertise such as an auditor or an independent property appraiser to provide additional information. The opinion of the Audit Committee or a person with special expertise will be used to support the decision of the Board of Directors or shareholders, depending on the case, to ensure that the transaction will not transfer of benefits between the Company or persons who may have conflicts of the Company, but it is a transaction that the Company takes into account the best interests of the shareholders.

Reasons why persons who may have conflicts of interest hold shares in subsidiaries and associated companies more than 10.00 % instead of holding shares of the Company directly

None, the Company has no subsidiaries or associated companies.

TWENTY-FOUR CON & SUPPLY PUBLIC COMPANY LIMITED

FINANCIAL STATEMENTS 31 DECEMBER 2023

Independent Auditor's Report

To the shareholders and the Board of Directors of Twenty-Four Con & Supply Public Company Limited

My opinion

In my opinion, the consolidated financial statements and the separate financial statements present fairly, in all material respects, the consolidated financial position of Twenty–Four Con & Supply Public Company Limited (the Company) and its subsidiaries (the Group) and the separate financial position of the Company as at 31 December 2023, and its consolidated and separate financial performance and its consolidated and separate cash flows for the year then ended in accordance with Thai Financial Reporting Standards (TFRS).

What I have audited

The consolidated financial statements and the separate financial statements comprise:

- the consolidated and separate statements of financial position as at 31 December 2023;
- the consolidated and separate statements of comprehensive income for the year then ended;
- the consolidated and separate statements of changes in equity for the year then ended;
- the consolidated and separate statements of cash flows for the year then ended; and
- the notes to the consolidated and separate financial statements, which include significant accounting policies and other explanatory information.

Basis for opinion

I conducted my audit in accordance with Thai Standards on Auditing (TSAs). My responsibilities under those standards are further described in the Auditor's responsibilities for the audit of the consolidated and separate financial statements section of my report. I am independent of the Group and the Company in accordance with the Code of Ethics for Professional Accountants including Independence Standards issued by the Federation of Accounting Professions (TFAC Code) that are relevant to my audit of the consolidated and separate financial statements, and I have fulfilled my other ethical responsibilities in accordance with the TFAC Code. I believe that the audit evidence I have obtained is sufficient and appropriate to provide a basis for my opinion.

Key audit matters

Key audit matters are those matters that, in my professional judgement, were of most significance in my audit of the consolidated and separate financial statements of the current period. I determine one key audit matter: Revenue and cost recognition. The matter was addressed in the context of my audit of the financial statements as a whole, and in forming my opinion thereon, and I do not provide a separate opinion on the matter.

Key audit matter

Revenue and cost recognition

Refer to Note 5.16 to the financial statements 'Revenue recognition' and Note 8 'Critical accounting estimates and judgement'

The Group has applied Thai Financial Reporting Standard 15: Revenue from contracts with customers (TFRS15). Recognition of the Group's revenue is complex due to several types of contracts, as well as different conditions in particular contracts.

I focused on this area as revenue recognition involves significant judgement and estimations made by management including the following matters:

- Determined whether contracts contain multiple performance obligations which should be accounted for separately
- Selected the most appropriate method for revenue recognition for each identified performance obligation
- Allocated consideration for an individual performance obligations
- Prepared the budgeted cost and checked with the stage of completion for each project, as well as considered any potential provision for project loss

In addition, I also focused on assessing the direct costs incurred in each project whether they were costs to fulfil the contract or there were the costs used in satisfying performance obligations in the future by assessing their nature of expenses to met the criteria to be capitalised as assets of the Group.

How my audit addressed the key audit matter

My key audit procedures in relation to revenue and cost recognition included:

- Evaluated the design of internal control over budgeting, and revenue and cost recognition process, and tested the effectiveness of internal controls on the budgeting of the estimated total contract costs. This also included the testing of management's estimated costs to complete the project by inquiring the project engineer or management and inspecting the supporting evidence.
- Tested the effectiveness of internal control over the revenue and cost cycle
- Understood the content of the contracts by reading a sample of contracts to assess whether the revenue recognition method was relevant and consistent with TFRS and had been applied consistently. I focused on the allocation of revenue and cost to individual performance obligations and the timing of revenue recognition when the transfer of control. Where a contract contained multiple elements,

I considered that management applied appropriate judgements in assessing the contracts comprising performance obligations, should have been accounted for separately;

- Examined the sampling revenues to evaluate management's significant judgements and estimates in applying the revenue recognition accounting policy to separable performance obligations of contracts over time, using the following methods:
 - Tested the actual costs incurred by examining supporting evidence including certificate of completion and invoices
 - Tested the actual costs incurred but not yet billed from sub-contractors by assessing the appropriateness of the stage of completion with the stage of project completion in the progress report by project engineers to assess the completeness of costs recorded
 - Assessed the appropriateness of service cost estimation by challenging the project engineers and responsible operations and examining relevant supporting evidence.
 - Tested calculations for revenue based on contracts value and the stage of completion.

Based on these procedures, I found that the basis and method of the revenue recognition of each selected contract and how the cost of contracts was recorded reasonably and consistently with supporting documents.

Other information

The directors are responsible for the other information. The other information comprises the information included in the annual report, but does not include the consolidated and separate financial statements and my auditor's report thereon. The annual report is expected to be made available to me after the date of this auditor's report.

My opinion on the consolidated and separate financial statements does not cover the other information and I will not express any form of assurance conclusion thereon.

In connection with my audit of the consolidated and separate financial statements, my responsibility is to read the other information identified above when it becomes available and, in doing so, consider whether the other information is materially inconsistent with the consolidated and separate financial statements or my knowledge obtained in the audit, or otherwise appears to be materially misstated.

When I read the annual report, if I conclude that there is a material misstatement therein, I am required to communicate the matter to the audit committee.

Responsibilities of the directors for the financial statements

The directors are responsible for the preparation and fair presentation of the consolidated and separate financial statements in accordance with TFRS, and for such internal control as the directors determine is necessary to enable the preparation of consolidated and separate financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated and separate financial statements, the directors are responsible for assessing the Group's and the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the Group and the Company or to cease operations, or has no realistic alternative but to do so.

The audit committee assists the directors in discharging their responsibilities for overseeing the Group's and the Company's financial reporting process.

Auditor's responsibilities for the audit of the financial statements

My objectives are to obtain reasonable assurance about whether the consolidated and separate financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes my opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with TSAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated and separate financial statements.

As part of an audit in accordance with TSAs, I exercise professional judgement and maintain professional scepticism throughout the audit. I also:

- Identify and assess the risks of material misstatement of the consolidated and separate financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for my opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's and the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the directors.
- Conclude on the appropriateness of the directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's and the Company's ability to continue as a going concern. If I conclude that a material uncertainty exists, I am required to draw attention in my auditor's report to the related disclosures in the consolidated and separate financial statements or, if such disclosures are inadequate, to modify my opinion. My conclusions are based on the audit evidence obtained up to the date of my auditor's report. However, future events or conditions may cause the Group and the Company to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the consolidated and separate financial statements, including the disclosures, and whether the consolidated and separate financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business
 activities within the Group to express an opinion on the consolidated financial statements. I am responsible for
 the direction, supervision and performance of the group audit. I remain solely responsible for my audit opinion

I communicate with the audit committee regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that I identify during my audit.

I also provide the audit committee with a statement that I have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on my independence, and where applicable, related safeguards.

From the matters communicated with the audit committee, I determine those matters that were of most significance in the audit of the consolidated and separate financial statements of the current period and are therefore the key audit matters. I describe these matters in my auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, I determine that a matter should not be communicated in my report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Significant non-cash transaction for the years ended 31 December 2023 and 2022 are as follows:

Payable for acquisition of equipment		50,973	50,973	-
Acquisitions of assets under leases				
contracts	31	12,859,987	12,859,987	9,203,676

1 General information

Twenty-Four Con & Supply Public Company Limited ("the Company") is a limited company, incorporated in Thailand. The address of the Company's registered office is as follows:

89, AIA Capital Center, 9th Floor, Unit 901, Ratchadaphisek Road, Din Daeng, Bangkok, 10400.

The principal business operations of the Company and its subsidiaries (together "the Group") are to sell and install ventilation and air conditioning systems, electricity systems and plumbing systems as well as maintenance services and electrical appliance distributor and provide related services to air conditioning.

These consolidated and separate financial statements were authorised for issue by the Group's authorised director on 27 February 2024.

2 Significant events during the current year

Establishment of a subsidiary and first-time preparation of consolidated financial statements

On 24 April 2023, the Group established a new subsidiary, Twenty Four Home Company Limited. The Company acquired 49,997 ordinary shares at a par value of Baht 100 each, totaling Baht 4.99 million, with 99.99% ownership interests. The interim consolidated financial statements has been prepared for the first time.

3 Basis of preparation

The consolidated and separate financial statements have been prepared in accordance with Thai Financial Reporting Standards and the financial reporting requirements issued under the Securities and Exchange Act.

The consolidated and separate financial statements have been prepared under the historical cost convention except certain items

The preparation of financial statements in conformity with TFRS requires management to use certain critical accounting estimates and to exercise its judgement in applying the Group's accounting policies. The areas involving a higher degree of judgement or complexity, or areas that are more likely to be materially adjusted due to changes in estimates and assumptions are disclosed in Note 8.

An English version of the financial statements have been prepared from the statutory financial statements that are in the Thai language. In the event of a conflict or a difference in interpretation between the two languages, the Thai language statutory financial statements shall prevail.

4 New and amended financial reporting standards

New and amended financial reporting standards effective for the accounting periods beginning on or after 1 January 2023 do not have material impact on the Group.

The Group has not yet early adopted the amended financial reporting standards which are effective beginning on or after 1 January 2024. The Group's management is currently assessing the impact of adoption of these standards.

5 Accounting policies

5.1 Principles of consolidation

a) Subsidiaries

Subsidiaries are all entities over which the Group has control. The Group controls an entity when the Group is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. Subsidiaries are consolidated from the date on which control is transferred to the Group until the date that control ceases.

In the separate financial statements, investments in subsidiaries are accounted for using cost. Historical cost also includes direct attributable costs of investment.

b) Intercompany transactions on consolidation

Intra-group transactions, balances and unrealised gains on transactions are eliminated. Unrealised gains on transactions between the Group and its associates and joint ventures are eliminated to the extent of the Group's interest in the associates and joint ventures. Unrealised losses are also eliminated in the same manner unless the transaction provides evidence of an impairment of the asset transferred.

5.2 Foreign currency translation

a) Functional and presentation currency

The financial statements are presented in Thai Baht, which is the Company's functional and presentation currency.

b) Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions.

Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the profit or loss.

Any exchange component of gains and losses on a non-monetary item that recognised in profit or loss, or other comprehensive income is recognised following the recognition of a gain or loss on the non-monetary item.

5.3 Cash and cash equivalents

In the statements of cash flows, cash and cash equivalents includes cash on hand and deposits held at call,

short-term highly liquid investments with maturities of three months or less from acquisition date

5.4 Trade accounts receivable

Trade receivables are amounts due from customers for goods sold and/or services performed in the ordinary course of business. They are generally due for settlement within 30 to 60 days and therefore are all classified as current.

Trade receivables are recognised initially at the amount of consideration that is unconditional unless they contain significant financing components, they are recognised at fair value. The Group holds the trade receivables with the objective to collect the contractual cash flows and therefore measures them subsequently at amortised cost.

The impairment of trade receivables are disclosed in Note 5.6 (e).

5.5 Inventories

Inventories are stated at the lower of cost and net realisable value.

Cost of inventories is determined by the first-in, first-out method. Cost of raw materials comprise all purchase cost and costs directly attributable to the acquisition of the inventory less all attributable discounts. The cost of finished goods and work in progress comprises raw materials, direct labor, other direct costs and directly attributable costs in bringing the inventories to their present location and condition.

5.6 Financial assets

a) Classification

The Group classifies its debt instrument financial assets in the following measurement categories depending on i) business model for managing the asset and ii) the cash flow characteristics of the asset whether they represent solely payments of principal and interest (SPPI).

- those to be measured subsequently at fair value (either through other comprehensive income or through profit or loss); and
- those to be measured at amortised cost.

The Group reclassifies debt investments when and only when its business model for managing those assets changes.

For investments in equity instruments, the Group has an irrevocable election at the time of initial recognition to account for the equity investment at fair value through profit or loss (FVPL) or at fair value through other comprehensive income (FVOCI) except those that are held for trading, they are measured at FVPL.

b) Recognition and derecognition

Regular way purchases, acquires and sales of financial assets are recognised on trade-date, the date on which the Group commits to purchase or sell the asset. Financial assets are derecognised when the rights to receive cash flows from the financial assets have expired or have been transferred and the Group has transferred substantially all the risks and rewards of ownership.

c) Measurement

At initial recognition, the Group measures a financial asset at its fair value plus, in the case of a financial asset not at FVPL, transaction costs that are directly attributable to the acquisition of the financial asset. Transaction costs of financial assets carried at FVPL are expensed in profit or loss.

Financial assets with embedded derivatives are considered in their entirety when determining whether the cash flows are solely payment of principal and interest.

d) Debt instrument

Subsequent measurement of debt instruments depends on the Group's business model for managing the asset and the cash flow characteristics of the financial assets. There are two measurement categories into which the Group classifies its debt instruments:

- Amortised cost: Financial assets that are held for collection of contractual cash flows where those cash flows represent solely payments of principal and interest are measured at amortised cost. Interest income from these financial assets is included in other income using the effective interest rate method. Any gain or loss arising on derecognition is recognised directly in profit or loss and presented in other gains/(losses) together with foreign exchange gains and losses. Impairment losses are presented as a separate line item in the statement of comprehensive income.
- FVPL: Financial assets that do not meet the criteria for amortised cost or FVOCI are measured at FVPL. A gain or loss on a debt investment that is subsequently measured at FVPL is recognised in profit or loss and presented net within other gains/(losses) in the period in which it arises.

Impairment (loss allowance) e)

The Group applies the TFRS 9 simplified approach in measuring the impairment of trade receivables, retention and contract assets, which applies lifetime expected credit loss, from initial recognition, for all trade receivables and contract assets.

To measure the expected credit losses, receivables have been grouped based on shared credit risk characteristics and the days past due. The retention receivables and contract assets relate to unbilled work in progress and have substantially the same risk characteristics as the trade receivables for the same types of contracts. The Group has therefore concluded that the expected loss rates for trade receivables are a reasonable approximation of the loss rates for the retention receivables and contract assets. The expected credit loss rates are based on payment profiles, historical credit losses as well as forward-looking information and factors that may affect the ability of the customers to settle the outstanding balances.

The expected loss rates are based on the payment profiles of sales and the corresponding historical credit losses experienced within this period. The historical loss rates are adjusted to reflect current and forward-looking information on macroeconomic factors affecting the ability of the customers to settle the receivables. The Group has identified the GDP, the unemployment rate, and consumer price index of the countries in which it sells its goods and services to assess, and accordingly adjusts the historical loss rates based on expected changes in these factors.

For other financial assets carried at amortised cost, the Group applies TFRS 9 general approach in measuring the impairment of those financial assets. Under the general approach, the 12– month or the lifetime expected credit loss is applied depending on whether there has been a significant increase in credit risk since the initial recognition.

The significant increase in credit risk (from initial recognition) assessment is performed every end of reporting period by comparing i) expected risk of default as of the reporting date and ii) estimated risk of default on the date of initial recognition.

The Group assesses expected credit loss by taking into consideration forward-looking information and past experiences. The expected credit loss is a probability-weighted estimate of credit losses (probability-weighted present value of estimated cash shortfall). The cash shortfall is the difference between all contractual cash flows that are due to the Group and all cash flows expected to receive, discounted at the original effective interest rate.

When measuring expected credit losses, the Group reflects the following:

- probability-weighted estimated uncollectible amounts
- time value of money; and
- supportable and reasonable information as of the reporting date about past experience, current conditions and forecasts of future situations.

Impairment (and reversal of impairment) losses are recognised in profit or loss and included in administrative expenses.

5.7 Leasehold improvements and equipment

All leasehold improvements and equipment are initially recorded at cost. Leasehold improvements and equipment are stated at historical cost less accumulated depreciation. Historical cost includes expenditure that is directly attributable to the acquisition of the items.

Subsequent costs are included in the asset's carrying amount, only when it is probable that future economic benefits associated with the item will flow to the Group. The carrying amount of the replaced part is derecognised.

All other repairs and maintenance are charged to profit or loss when incurred.

Depreciation on other assets is calculated using the straight-line method to allocate their cost to their residual values over their estimated useful lives, as follows:

Leasehold improvements	5 years
Tools and equipment	5 years
Machinery	5 years
Furniture, fixtures and office equipment	5 years
Vehicles	5 years

The assets' residual values and useful lives are reviewed, and adjusted if appropriate, at the end of each reporting period.

Gains and losses on disposals are determined by comparing the proceeds with carrying amount and are recognised other gains or losses, net.

172

5.8 Intangible assets

Acquired computer software

Acquired computer software is measured at cost. These costs are amortised over their estimated useful lives not over than 3 years.

Cost associated with maintaining computer software are recognised as an expense as incurred.

5.9 Impairment of assets

Assets that are subject to amortisation are reviewed for impairment whenever there is an indication of impairment.

An impairment loss is recognised for the amount by which the carrying amount of the assets exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs of disposal and value in use.

Where the reasons for previously recognised impairments no longer exist, the impairment losses on the assets concerned other than goodwill is reversed.

5.10 Leases

Leases - where the Group is the lessee

Leases are recognised as a right-of-use asset and a corresponding liability at the date at which the leased asset is available for use by the Group. Each lease payment is allocated between the liability and finance cost. The finance cost is charged to profit or loss over the lease period so as to produce a constant periodic rate of interest on the remaining balance of the liability for each period. The right-of-use asset is depreciated over the asset's useful life on a straight-line basis.

Contracts may contain both lease and non-lease components. The Group allocates the consideration in the contract to the lease and non-lease components based on their relative stand-alone prices. However, for leases of real estate for which the group is a lessee, it has elected not to separate lease and non-lease components and instead accounts for these as a single lease component.

Assets and liabilities arising from a lease are initially measured on a present value basis. Lease liabilities include the net present value of the following lease payments:

- fixed payments (including in-substance fixed payments), less any lease incentives receivable
- variable lease payment that are based on an index or a rate
- amounts expected to be payable by the lessee under residual value guarantees
- the exercise price of a purchase option if the lessee is reasonably certain to exercise that option, and
- payments of penalties for terminating the lease, if the lease term reflects the lessee exercising that option.

Lease payments to be made under reasonably certain extension options are also included in the measurement of the liability.

The lease payments are discounted using the interest rate implicit in the lease. If that rate cannot be determined, the lessee's incremental borrowing rate is used, being the rate that the lessee would have to pay to borrow the funds necessary to obtain an asset of similar value in a similar economic environment with similar terms and conditions.

Right-of-use assets are measured at cost comprising the following:

- the amount of the initial measurement of lease liability
- any lease payments made at or before the commencement date less any lease incentives received
- any initial direct costs, and
- restoration costs.

Payments associated with short-term leases and leases of low-value assets are recognised on a straightline basis as an expense in profit or loss. Short-term leases are leases with a lease term of 12 months or less. Low-value assets comprise small items of office equipment.

5.11 Financial liabilities

a) Classification

Financial instruments issued by the Group are classified as either financial liabilities or equity securities by considering contractual obligations.

- Where the Group has an unconditional contractual obligation to deliver cash or another financial asset to another entity, it is considered a financial liability unless there is a predetermined or possible settlement for a fixed amount of cash in exchange of a fixed number of the Group's own equity instruments.
- Where the Group has no contractual obligation or has an unconditional right to avoid delivering cash or another financial asset in settlement of the obligation, it is considered an equity instrument.

Borrowings are classified as current liabilities unless the Group has an unconditional right to defer settlement of the liability for at least 12 months after the reporting date.

b) Measurement

Financial liabilities are initially recognised at fair value and are subsequently measured at amortised cost.

c) Derecognition and modification

Financial liabilities are derecognised when the obligation specified in the contract is discharged, cancelled, or expired.

Where the terms of a financial liability are renegotiated/modified, the Group assesses whether the renegotiation / modification results in the derecognition of that financial liability. Where the modification results in an extinguishment, the new financial liability is recognised based on fair value of its obligation. The remaining carrying amount of financial liability is derecognised. The difference as well as proceed paid is recognised as other gains/(losses) in profit or loss.

Where the modification does not result in the derecognition of the financial liability, the carrying amount of the financial liability is recalculated as the present value of the renegotiated / modified contractual cash flows discounted at its original effective interest rate. The difference is recognised in other gains/(losses) in profit or loss.

5.12 Current and deferred income taxes

The tax expense for the period comprises current and deferred tax. Tax is recognised in profit or loss, except to the extent that it relates to items recognised in other comprehensive income or directly in equity.

Current tax

The current income tax is calculated on the basis of the tax laws enacted or substantively enacted at the end of the reporting period. Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation. It establishes provisions where appropriate on the basis of amounts expected to be paid to the tax authorities.

Deferred income tax

Deferred income tax is recognised on temporary differences arising from differences between the tax base of assets and liabilities and their carrying amounts in the financial statements. However, deferred income tax is not recognised for temporary differences arise from:

- initial recognition of an asset or liability in a transaction other than a business combination that affects neither accounting nor taxable profit or loss is not recognised
- investments in subsidiaries, associates and joint arrangements where the timing of the reversal of the temporary difference is controlled by the Group and it is probable that the temporary difference will not reverse in the foreseeable future.

Deferred income tax is measured using tax rates of the period in which temporary difference is expected to be reversed, based on tax rates and laws that have been enacted or substantially enacted by the end of the reporting period.

Deferred tax assets are recognised only to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilised.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets and liabilities and when the deferred tax balances relate to the same taxation authority. Current tax assets and tax liabilities are offset where the entity has a legally enforceable right to offset and intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously.

5.13 Employee benefits

Short-term employee benefits

Liabilities for short-term employee benefits such as commission and bonuses that are expected to be settled wholly within 12 months after the end of the reporting period are recognised in respect of employees' service up to the end of the reporting period. They are measured at the amount expected to be paid.

Defined contribution plan

The Group pays contributions to a separate fund on a voluntary basis. The Group has no further payment obligations once the contributions have been paid. The contributions are recognised as employee benefit expense when they are due.

Defined benefit plans - retirement benefit

Amount of retirement benefits is defined by the agreed benefits the employees will receive after the completion of employment. It usually depends on factors such as age, years of service and an employee's latest compensation at retirement.

The defined benefit obligation is calculated by an independent actuary using the projected unit credit method. The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows using market yield of government bonds that matches the terms and currency of the expected cash outflows.

Remeasurement gains and losses are recognised directly to other comprehensive income in the period in which they arise. They are included in retained earnings in the statements of changes in equity.

Past-service costs are recognised immediately in profit or loss.

5.14 Provisions

Provisions are recognised when the Group has a present legal or constructive obligation as a result of past events; it is probable that an outflow of resources will be required to settle the obligation; and the amount has been reliably estimated. Provisions are measured at the present value of the expenditures expected to be required to settle the obligation. The increase in the provision due to passage of time is recognised as interest expense.

5.15 Share capital

Ordinary shares are classified as equity. Incremental costs directly attributable to the issue of new shares (net of tax) are shown as a deduction in equity.

5.16 Revenue recognition

Revenue includes all revenues from ordinary business activities. All ancillary income in connection with the delivery of goods and rendering of services in the course of the Group's ordinary activities are also presented as revenue.

Revenue are recorded net of value added tax. They are recognised in accordance with the provision of goods or services, provided that collectability of the consideration is probable.

Multiple element arrangements involving delivery or provision of multiple products or services are separated into individual distinct performance obligations. Total transaction price of the bundled contract is allocated to each performance obligation based on their relative standalone selling prices or estimated standalone selling prices. Each performance obligation is recognised as revenue on fulfilment of the obligation to the customer.

a) Sale of goods

The Group sells air conditioner, and equipment for air conditioning system and ventilation system. Sales are recognised when control of the products has transferred, being when the products are delivered, and there is no unfulfilled obligation that could affect the customer's acceptance of the products. Delivery occurs when the products have been shipped to the specific location, the risks of obsolescence and loss have been transferred to the customer, and either the customer has accepted the products in accordance with the sales contract, the acceptance provisions have lapsed, or the Group has objective evidence that all criteria for acceptance have been satisfied.

The Group's obligation to repair or replace faulty products under the standard warranty terms is recognised as a provision and cost of sales.

A receivable is recognised when the goods are delivered as this is the point in time that the consideration is unconditional because only the passage of time is required before the payment is due.

b) Revenue from construction

Revenue from construction contracts or construction-type service contracts or service contracts where a defined output is promised, is recognised using the percentage of completion method. The

stage of completion is generally determined as the percentage of cost incurred up until the reporting date relative to total estimated cost.

Where the progress of work is not reliably measured, revenue is only recognised up to the amount of contract costs expensed, provided it is recoverable.

Claims, variations and liquidated damages are accounted for as variable consideration and are included in contract revenue provided that it is highly probable that a significant reversal will not occur in the future.

Contract assets and contract liabilities

A contract asset is recognised where the Group recognised revenue for fulfilment of a contractual performance obligation before the customer paid consideration or before the requirements for billing.

A contract liability is recognised when the customer paid consideration or a receivable from the customer that is due before the Group fulfilled a contractual performance obligation.

For each customer contract, contract liabilities are set off against contract assets.

c) Revenue from maintenance services

The Group recognised revenue from service contracts with a continuous service provision as revenue on a straight line basis over the contract term, regardless of the payment pattern.

d) Revenue from services

Revenue from rendering services is based on the stage of completion.

e) Other income

Other income is recognised on an accrual basis unless collectability is not probable.

5.17 Share-based payment

For the equity-settled share-based payment, the transactions in which goods or services are received as consideration for equity instruments of the entity should be measured at the fair value of the goods or services received. Only if the fair value of the goods or services cannot be measured reliably would the fair value of the equity instruments at the granted date be used.

5.18 Dividend distribution

Dividend distributed to the Company's shareholders is recognised as a liability when interim dividends are approved by the Board of Directors, and when the annual dividends are approved by the shareholders.

6 Financial risk management

6.1 Financial risk

The Group exposes to a variety of financial risk: market risk (including foreign exchange risk, interest rate risk and price risk), credit risk and liquidity risk. The Group's overall risk management programmed focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the Group's financial performance. The Group might uses derivative financial instruments to hedge certain exposures.

6.1.1 Market risk

a) Foreign exchange risk

The Group operates internationally and is exposed to foreign currency risks, primarily the US dollar from purchase of goods that are denominated in foreign currencies. The Group may use forward contracts to hedge their exposure to protect foreign currency risk when necessary. However, the proportion of purchases in foreign currencies were not material compared to total purchase balance.

The Group does not apply hedge accounting. The foreign currency forwards recognised as derivatives assets or liabilities measured at fair value through profit or loss.

b) Cash flow and fair value interest rate risk

The Group's income and operating cash flows are substantially independent of changes in market interest rates. The Group is exposed to interest rate risk relates primarily to its deposits at financial institutions, short-term loans to related parties, short-term borrowings and long-term borrowings. Most of the Group's financial assets and liabilities bear floating interest rates or fixed interest rates which are close to the market rate, which expose the Group to cash flow interest rate risk. However, the Group will use interest rate swap to management the risk when necessary.

The Group does not apply hedge accounting.

The exposure of the Group's borrowings to interest rate at the end of the reporting period are as follows:

	Consolidated	Consolidated and separate		financial
	financial st	tatements	staten	nents
	202	23	202	22
		% per total		% per total
	Baht	borrowings	Baht	borrowings
Bank overdraft and short-term				
loan				
from financial institutions at				
floating rate	7,655,859	35	-	-
Long term loan from financial				
institutions at floating rate	11,644,619	53	18,971,852	81
Long term loan from financial				
institutions at fixed rate	2,586,473	12	4,572,213	19
	21,886,951	100	23,544,065	100

6.1.2 Credit risk

Credit risk arises from cash and cash equivalents, contractual cash flows of debt investments carried at amortised cost as well as credit exposures to customers, including outstanding receivables.

a) Risk management

Credit risk is managed on a group basis. For banks and financial institutions, only independently rated parties with a minimum rating of 'BBB' are accepted.

If customers are independently rated, these ratings are used. Otherwise, if there is no independent rating, risk control assesses the credit quality of the customer, taking into account its financial position, past experience and other factors. Individual risk limits are set based on tips assessments in accordance with limits set by the board. The compliance with credit limits by customers is regularly monitored by line management.

b) Security

For some trade receivables the Group may obtain security in the form of letters of credit which can be called upon if the counterparty is in default under the terms of the agreement.

c) Impairment of financial assets

The Group has the following financial assets that are subject to the expected credit loss model:

- cash and cash equivalents
- trade and other receivables
- deposits at financial institutions used as collateral
- retention receivables (presented under other current and non-current assets)

While cash and cash equivalents and deposit at financial institutions used as collateral are also subject to the impairment requirements of TFRS 9, the identified impairment loss was immaterial.

Trade receivables, retention receivables and contract assets

The Group applies the TFRS 9 simplified approach to measure expected credit losses which uses a lifetime expected loss allowance for all trade receivables, retention receivables and contract assets.

To measure the expected credit losses, trade receivables and contract assets have been grouped based on shared credit risk characteristics and the days past due. The contract assets relate to unbilled work in progress and have substantially the same risk characteristics as the trade receivables for the same types of contracts. The Group has therefore concluded that the expected loss rates for trade receivables are a reasonable approximation of the loss rates for retention receivables and the contract assets.

The Group write-off trade receivables and contract assets when there is no reasonable expectation of recovery. Indicators that there is no reasonable expectation of recovery include, amongst others, the failure of a debtor to engage in a repayment plan with the Group, and a failure to make contractual payments or cannot be contacted for a period greater than 365 days past due.

Impairment losses on trade receivables, retention receivables and contract assets are presented as net impairment losses within operating profit. Subsequent recoveries of amounts previously written off are credited against the same line item. *Other receivables*

The Group has other receivables measured at amortised cost. The 12-month expected credit loss allowance was recognised for those loans without any significant increase in credit risk. The lifetime expected credit loss was recognised for those loans with significant increase in credit risk.

6.1.3 Liquidity risk

Prudent liquidity risk management implies maintaining sufficient cash and marketable securities and the availability of funding through an adequate amount of committed credit

facilities to meet obligations when due and to close out market positions. At the end of the reporting period the Group and the Company held deposits at call of Baht 23.53 million (2022: Baht 214.67 million) that are expected to readily generate cash inflows for managing liquidity risk. Due to the dynamic nature of the underlying businesses, the Group Treasury maintains flexibility in funding by maintaining availability under committed credit lines.

Management monitors i) rolling forecasts of the Group's liquidity reserve (comprising the undrawn borrowing facilities below); and ii) cash and cash equivalents on the basis of expected cash flows. In addition, the Group's liquidity management policy involves projecting cash flows in major currencies and considering the level of liquid assets necessary, monitoring balance sheet liquidity ratios and maintaining financing plans.

a) Financing arrangements

The Group has access to the following undrawn credit facilities as at 31 December as follows:

	Consolidated and	
	separate financial	Separate
	statements	financial statements
	2023	2022
	Baht	Baht
Floating rate		
Over than 1 year		
- Bank overdraft	144,141	3,000,000
- Short-term loan from financial institutions	200,000	5,000,000
- Combined short-term loan from		
financial institutions	124,404,626	35,165,462
- Letter of credit	1,591,410	22,391,152
	126,340,177	65,556,614

b) Maturity of financial liabilities

The tables below analyse the maturity of financial liabilities grouping based on their contractual maturities.

The amounts disclosed are the contractual undiscounted cash flows. Balances due within 12 months equal their carrying balances as the impact of discounting is not significant.

6.2 Capital management

6.2.1 Risk management

The objectives when managing capital are to:

- safeguard their ability to continue as a going concern, to provide returns for shareholders and benefits for other stakeholders, and
- maintain an optimal capital structure to reduce the cost of capital

In order to maintain or adjust the capital structure, the Group may adjust the amount of dividends paid to shareholders, return capital to shareholders, issue new shares or sell assets to reduce debt.

184

Consistent with others in the industry, the Group monitors capital based on gearing ratio which is determined by dividing net debt with equity.

The gearing ratios at 31 December are as follows:

	Consolidated financial statements	Separate finar	icial statements
	2023	2023	2022
	Baht	Baht	Baht
Net debt	194,007,502	196,222,038	409,792,604
Equity	563,998,887	564,988,064	609,069,931
Net debt to equity ratio	0.34	0.35	0.67

7 Fair value

Fair values are categorised into hierarchy based on inputs used as follows:

- Level 1: The fair value of financial instruments is based on the current bid price or closing price by reference to the Stock Exchange of Thailand or the Thai Bond Dealing Centre.
- Level 2: The fair value of financial instruments is determined using significant observable inputs and, as little as possible, entity-specific estimates.
- Level 3: The fair value of financial instruments is not based on observable market data.

The carrying amount of financial assets and financial liabilities is considered to be the same as their fair value due to the short-term nature. Fair value of short-term borrowings from financial institutions and current portion of long term borrowings from financial institutions are equal to their carrying amounts, as the impact of discounting is not material. The fair value of the long-term borrowings from financial institutions is close to the carrying amount because these are floating-rate loans.

There were no transfers between levels during the year.

8 Critical accounting estimates and judgement

Estimates and judgement are continually evaluated and are based on historical experience and other factors, including expectation of future events that are believed to be reasonable under the circumstance.

a) Revenue recognition

The Group needs to estimate the stage of completion of works under contracts with customers to recognised revenue. The progress of work is generally determined as the percentage of cost incurred up until the reporting date relative to total estimated cost. Total estimated cost of project is

estimated by engineers who is responsible for each project, and is subjected to change subsequent to original estimation.

b) Defined retirement benefit obligations

The present value of the retirement benefit obligations depends on a number of assumptions. Key assumptions used and impacts from possible changes in key assumptions are disclosed in note 23.

c) Determination of lease terms

Critical judgement in determining the lease term, the Group considers all facts and circumstances that create an economic incentive to exercise an extension option, or not exercise a termination option. Extension options (or periods after termination options) are only included in the lease term if the lease is reasonably certain to be extended (or not terminated).

For leases of properties, the most relevant factors are historical lease durations, the costs and conditions of leased assets.

Most extension options on offices and vehicles leases have not been included in the lease liability, because the Group considers i) the underlying asset condition and/or ii) insignificant cost to replace the leased assets.

The lease term is reassessed if an option is actually exercised (or not exercised) or the Group becomes obliged to exercise (or not exercise) it. The assessment of reasonable certainty is only revised if a significant event or a significant change in circumstance affecting this assessment occur, and that it is within the control of the Group.

d) Determination of discount rate applied to leases

The Group determines the incremental borrowing rate as follows:

- Where possible, use recent third-party financing received by the individual lessee as a starting point, adjusting to reflect changes in its financing conditions.
- Make adjustments specific to the lease, e.g. term, country, currency and security.

e) Impairment of financial assets

The loss allowances for financial assets are based on assumptions about default risk and expected loss rates. The Group uses judgement in making these assumptions and selecting the inputs used in the impairment calculation, based on the Group's past history and existing market conditions, as well as forward-looking estimates at the end of each reporting period. The impairment of financial assets are disclosed in note 11.

9 Segment information

Operating segment information is reported in a manner consistent with the internal reports that are regularly reviewed by the chief operating decision maker (CODM). CODM is chairman of Executive committee and managing director who make decisions about the allocation of resources to the segment and assess its performances. The Group and its associate operate under 2 operating segments as follows:

1. Services segment

- 1.1 Service render for construction of heating, ventilation, and air conditioning systems, electricity systems and plumbing systems
- 1.2 Service render for maintenance services.

2. Sales segment

2.1 Sales and installation heating, ventilation, and air conditioning, electricity systems and plumbing systems equipment.

56-1 one report

Significant information relating to revenue and profit of the reportable segments are as follows.

- Trade and other receivables, net	64,964,309	63,909,417	212,030,262
– Other current assets	9,616,830	9,616,830	3,588,887
- Deposit at financial institutions used as collateral	23,828,151	23,828,151	23,461,950
- Other non-current assets	70,854,032	70,854,032	42,805,473

	Consolidated financial		
	statements	Separate financ	cial statements
	2023	2023	2022
	Baht	Baht	Baht
Financial liabilities			
Financial liabilities at amortised cost			
 Bank overdrafts and short-term borrowings 			
from financial institutions	7,655,859	7,655,859	-
- Trade and other payables	98,251,390	97,183,943	321,363,985
- Derivatives liabilities	864,658	864,658	-
- Other current liabilities	4,318,716	4,316,491	3,674,346
- Long-term borrowings from financial institutions	14,231,092	14,231,092	23,544,065
- Lease liabilities	19,234,046	19,234,046	13,858,947
- Other non-current liabilities	27,418,641	27,418,641	11,569,085

Other financial assets at amortised cost

a) Classification of financial assets at amortised cost

The Group classifies its financial assets as at amortised cost only if both of the following criteria are met:

- the asset is held within a business model whose objective is to collect the contractual cash flows; and
- the contractual terms give rise to cash flows that are solely payments of principal and interest

Book value of financial assets at amortised cost are shown in the table above

b) Fair value of financial assets at amortised cost

Due to the short-term nature of the other current receivables, their carrying amount is considered to be the same as their fair value. For the majority of the non-current receivables, the fair values are also not significantly different to their carrying amounts.

c) Loss allowance

The loss allowance for retention receivables presented in current and non-current assets was determined as follows:

	Consolidated and separate financial statements								
		2023		2022					
		Non-			Non-				
	Current	current	Total	Current	current	Total			
	Baht	Baht	Baht	Baht	Baht	Baht			
Retention receivables Less: Loss allowance	9,616,830 -	70,225,093 (525,760)	79,841,923 (525,760)	3,588,887 -	42,416,889 (788,862)	46,005,776 (788,862)			
Total	9,616,830	69,699,333	79,316,163	3,588,887	41,628,027	45,216,914			

The loss allowances for retention receivables as at 31 December reconcile to the opening loss allowances as follows:

	Consolidated
	and separate
	financial
	statements
	Retention
	receivables
	Baht
Opening loss allowance at 1 January 2022	788,862

Remeasurement for:		
– Retirement benefits	-	44,104

The movement in the obligations for retirement benefit are as follows:

	Consolidated	
	and separate	Separate
	financial	financial
	statements	statements
	2023	2022
	Baht	Baht
At 1 January	3,683,941	2,725,215
Current service cost	1,124,059	835,863
Interest cost	130,412	78,759
	4,938,412	3,639,837
Remeasurement		
Gain from change in financial assumptions	-	(323,902)
Loss from change in plan experience	-	368,006
	-	44,104
At 31 December	4,938,412	3,683,941

The Group engaged independent actuary to calculate its defined benefit obligation. The significant actuarial assumptions used were as follows:

	Consolidated	
	and separate	Separate
	financial	financial
	statements	statements
	2023	2022
Discount rate	3.54%	3.54%
Future salary increase rate	6%	6%
Employee turnover rate	1.91% - 22.92%	1.91% - 22.92%

	Consolidated and separate financial statement					
	Impact on defined benefit obligations					
	Chan	ge in				
	assum	ption	Increase in a	ssumption	Decrease in	assumption
			2023	2022	2023	2022
	2023	2022	Baht	Baht	Baht	Baht
Discount rate	1%	1%	(596,143)	(459,136)	723,921	557,785
Future salary increase			1,651,559		(1,159,500)	
rate	1%	1%		537,952		(453,329)
Employee turnover rate	20%	20%	(908,240)	(348,877)	1,399,208	425,860

Sensitivity analysis for each significant assumption used is as follows:

The above sensitivity analyses are based on a change in an assumption while holding all other assumptions constant. In practice, this is unlikely to occur, and changes in some of the assumptions may be correlated. When calculating the sensitivity of the defined benefit obligation to significant actuarial assumptions, the same method (present value of the defined benefit obligation calculated with the projected unit credit method at the end of the reporting period) has been applied as when calculating the liability recognised in the statement of financial position. The methods and types of assumptions used in preparing the sensitivity analysis did not change compared to the previous period.

The weighted average duration of the defined benefit obligation is 19 years (2022: 20 years).

Expected maturity analysis of undiscounted retirement benefits is as follows:

	Con	Consolidated and separate financial statement

Retirement benefits		_	1,001,152	5,305,210	6,306,362

24 Dividend

At annual general shareholder meeting on 2 March 2022, shareholders approved the payment of annual dividend from retained earnings and net profit for year ended 31 December 2021 at Baht 10.6667 per share for the fully paid-up shares and at Baht 9.0667 per share for partially paid-up shares, totaling Baht 14 million and appropriate its retained earnings to legal reserve according to the Civil and Commercial Code amounting to Baht 0.7 million.

25 Legal reserve

	Consolidated and separate financial	Separate
	statements	financial statements
	2023	2022
	Baht	Baht
At 1 January	2,675,000	750,000
Appropriation during the year	-	1,925,000
At 31 December	2,675,000	2,675,000

Under the Public Companies Act., B.E. 2535, the Company is required to set aside as statutory reserve at least 5 percent of its net profit after accumulated deficit brought forward (if any) until the reserve is not less than 10 percent of the registered capital. This reserve is not available for dividend distribution.

26 Assets and liabilities relating to contracts with customers

26.1 Assets recognised from contract costs

Incremental costs of obtaining a contract

	Consolidated and	
	separate financial	Separate
	statements	financial statements
	2023	2022
	Baht	Baht
Statements of financial position as of 31 December		
Assets recognised for costs of obtaining a contract	-	9,179,140
Less: Accrued commission	-	(14,089,514)
Accrued commission	-	4,910,374

Statements of comprehensive income		
for the year ended 31 December		
Amortisation charges	-	5,270,402

The asset recognised as the costs to obtain a contract, includes sales commissions, were presented by offsetting with the obligations to pay. It was presented as trade accounts payable in statement of financial position. It is amortised over the term of the specific contract it relates to, consistent with the revenue recognition pattern. The Group reverse transactions as no obligation to pay for commission during the year.

26.2 Contract liabilities

The Company has recognised the following liabilities related to contracts with customers

	Compalidated and	
	Consolidated and	
	separate financial	Separate
	statements	financial statements
	2023	2022
	Baht	Baht
Current contract liabilities		
Contract liabilities from sales of goods contracts	11,442,100	19,626,835
Total	11,442,100	19,626,835

Revenue recognised in relation to contract liabilities

Revenue recognised in the current reporting period relates to carried-forward contract liabilities and how much relates to performance obligations that were satisfied in a prior year

	Consolidated and separate financial statements	Separate financial statements	
	2023	2022	
	Baht	Baht	
Revenue recognised that was included in the contract liability balance at the beginning of the period - Sales of goods - Construction contract	8,318,835 _	6,984,800 1,430,091	
	8,318,835	8,414,891	

26.3 Unsatisfied long-term contracts with customers

The following table shows unsatisfied performance obligations resulting from significant construction contracts as at 31 December.

	Consolidated and separate financial statements	Separate financial statements
	2023	2022
	Baht	Baht
Construction contracts	425,040,960	753,642,578
Long-term sales contract	187,229,002	318,635,795
	612,269,962	1,072,278,373

Management expects that all of the transaction price allocated to the unsatisfied contracts as of 31 December 2023 will be recognised as revenue during 2024 – 2026. The amount disclosed above does not include variable consideration which is constrained.

27 Other income

210

Other income for the year ended 31 December are as follows:

	Consolidated financial statements	Separate finance	cial statements
	2023	2023	2022
	Baht	Baht	Baht
Interest income	1,103,143	1,102,595	985,026
Gain from disposal of assets	1,214,952	1,224,998	-
Gain from disposal of right-of-use assets	-	-	1,295,046
Gain on exchange rate, net	-	-	1,158,783
Gain on lease cancellation	52,002	52,002	-
Gain on reversal of accounting estimates	6,231,261	6,231,261	-
Other income	176,458	505,774	257,072
Total	8,777,816	9,116,630	3,695,927

28 Expenses by nature

The following expenditures, classified by nature, have been charged in arriving at profit before finance costs and income tax:

	Consolidated financial statements	Separate financ	cial statements
	2023	2023	2022
	Baht	Baht	Baht
Materials, labour and subcontractors	423,293,869	423,060,513	573,393,881
Cost of sales of goods	223,187,223	222,051,902	275,127,478
Staff costs	56,351,976	55,923,424	55,843,189
Depreciation and amortisation	9,617,938	9,603,559	7,726,357
Professional and consultant fees	3,813,899	3,813,899	6,425,985
Other expense	26,495,439	25,817,348	27,142,562

29 Income tax expense

Income tax expense for the year comprises the following:

	Consolidated financial statements	Separate finar	ncial statements
	2023	2023	2022
	Baht	Baht	Baht
Current tax	-	-	7,466,436
Deferred income tax	(10,959,355)	(10,712,735)	(424,090)
Total income tax (revenue) expense	(10,959,355)	(10,712,735)	7,042,346

The tax on the Group's profit before tax differs from the theoretical amount that would arise using the basic tax rate of the home country of the Company as follows:

	Consolidated financial statements	Separate finan	cial statements
	2023	2023	2022
	Baht	Baht	Baht
(Loss) profit before income tax	(56,030,399)	(54,794,602)	31,536,577
Tax calculated at a tax rate of 20% (2022: 20%)	(11,206,080)	(10,958,921)	6,307,315

30 Basic earnings per share

Basic earnings per share is calculated by dividing the profit attributable to shareholders by the weighted average number of ordinary shares in issue during the year.

At the Extraordinary General Meeting of shareholders No.1/2022, held on 22 March 2022, the shareholders approved the change in par value of Baht 100 per share to Baht 0.50 per share. The Company adjust the number of outstanding ordinary shares to reflect the increase in the number of ordinary shares as if the event has occurred at the beginning of the period presented.

	Consolidated financial statements	Separate finan	cial statements
	2023	2023	2022
(Loss) profit attributable to shareholders (Baht) Weighted average number of ordinary shares	(45,071,044)	(44,081,867)	24,494,231
in issue during the year (Shares)	430,000,000	430,000,000	325,513,699
Basic (loss) earnings per share (Baht)	(0.10)	(0.10)	0.08

There are no potential dilutive ordinary shares in issue during the years ended 31 December 2023 and 2022.

214

Enterprises and individuals that directly, or indirectly through one or more intermediaries, control, or are controlled by, or are under common control with, the Group including holding companies, subsidiaries and fellow subsidiaries are related parties of the Group. Associates and individuals owning, directly or indirectly, an interest in the voting power of the Company that gives them significant influence over the enterprise, key management personnel, including directors and officers of the Group and close members of the family of these individuals and companies associated with these individuals also constitute related parties.

In considering each possible related party relationship, attention is directed to the substance of the relationship, and not merely the legal form.

Major shareholders of the Group are Mr. Yodsawee Wattanateerakitja and Mr. Santi Maneewong, who aggregately hold 48.84 % of the total shares (2022 : 48.84% of the total shares).

In the year 2022, the key management sold all shares in MEP Power Engineering Company Limited.

(a) Transaction with related parties

The transaction with related parties as at 31 December are as follows:

	Consolidated		
	financial		
	statements	Separate finar	ncial statements
	2023	2023	2022
	Baht	Baht	Baht
Subsidiary			
Other income	-	340,732	-
Interest expense	-	14,300	-
Other expense	-	80,000	-
Related persons			
Other income	-	-	635,513

(b) Outstanding balances arising from administrative expense

The outstanding balances at the end of the reporting period in relation to transactions with related persons are as follows:

	Consolidated financial statements	Separate fina	
	2023	2023	2022
	Baht	Baht	Baht
Subsidiary Other receivable	-	43,408	-
Related persons Other payables	583,724	583,724	131,831

(c) Short-term loans from related parties

The movements of short-term loans from related parties can be analysed as follows:

	Consolidated financial statements	Separate finan stateme	
	2023	2023	2022
	Baht	Baht	Baht
At 1 January	-	-	-
Loans proceed during the period	-	4,100,000	5,810,000
Loans repayment received	-	(600,000)	(5,810,000)
At 31 December	_	3,500,000	-

Short-term loans from related parties are denominated in Baht and are not secured. The interest rates are 1.20% (2022: 4.44%) per annum and due at call.

(d) Directors and managements' remuneration

Directors and managements' remuneration comprises salaries, other benefits, other remuneration and meeting fees.

	Consolidated and	
	separate financial	Separate
	statements	financial statements
	2023	2022
	Baht	Baht
Salaries and other short-term benefits	13,314,080	9,397,234
Post-employment benefits	491,542	420,642
Total	13,805,622	9,817,876

33 Commitments and contingent liabilities

33.1 Non-cancellable services agreements

The Group has entered into non-cancellable services agreements in respect of the lease of right of computer program and office services as follows:

	Consolidated and separate financial	Separate
	•	financial statements
	2023	2022
	Baht	Baht
Not later than 1 year	2,131,998	1,502,322
Later than 1 year but not later than 5 years	2,837,997	315,581
	4,969,995	1,817,903

33.2 Letters of guarantee

As at 31 December 2023, the Group had outstanding letters of guarantee of Baht 47,784,911 (2022: Baht 50,829,333) issued by a bank for purchases of goods. No liabilities are anticipated to be arisen.

33.3 Capital commitment

As at 31 December 2023, the Group had capital expenditure contracted but not yet recognised of Baht 7.90 million (2022: None).

34 Significant contract

The Group have entered into consortium agreement for on-going projects which the Company agreed with counterparty to bind themselves to be held accountable and replaced as joint debtor to the owners. The Company has a 56.36% interest in a consortium called 'PLE24 consortium' which was set up as a partnership together with Powerline Engineering Public Company Limited, for acceptance for government's project to constructed electrical substation. The calculation of the interest sharing defined by the scope with agreed tasks and responsibility with the venturers.

Audit Committee's Report

The Audit Committee of Twenty–Four Con & Supply Public Company Limited consists of 3 independent directors who are qualified with fulfilled of knowledge, ability and experience which will support the Audit Committee to perform its duties efficiently and independently. Patra Supanich as the Chairman of the Audit Committee, Gen Suchartt Wongmak and Lt.Gen.Parinya Chaidilok as the Audit Committee. The Audit Committee performs its duties in accordance with the responsibilities assigned by the Board of Directors and the charter of the Audit Committee.

In 2023, the Audit Committee held 4 meetings and 4 meetings for the year 2023. As conclusion.

List of the Audit Committees ^{1/}			Total number of attened/Number of meetings				
		Addit Committees	2022	2023			
1.	Pattra	Supanich	4/4	4/4			
2.	Suchart	Wongmak	4/4	4/4			
З.	Parinya	Chaidilok	4/4	4/4			

Remark: ¹/Appointed as audit committee member at the Board of Directors' meeting 6/2021 on July 22, 2021, all 3 members of the Audit Committee are fully qualified to be members of the audit committee in accordance with the criteria set by the SET and Patra Supanich is a person with knowledge in accounting and finance (please refer to the additional history of the audit committee in Attachment 1).

In addition, the Audit Committee invited the 24CS managements. The auditor of the Internal Audit attended the meeting as appropriate, the Audit Committee proceeded to consider various matters with the following issues and essences:

- 1. Review the company's financial reporting process to ensure that it is accurate and adequately disclosed, as well as reliable in accordance with generally accepted accounting standards.
- 2. Review the company's financial reporting process to ensure that it is accurate and adequately disclosed, as well as reliable in accordance with generally accepted accounting standards to consider, select and nominate an independent person to act as the Company's auditor in order to conduct audits, control systems and financial statements of the Company. Propose remuneration and supervise the work of the audit office for the purpose of preparing or issuing audit reports or conducting any other audits.
- 3. Each auditor and audit firm report directly to the Audit Committee. The Audit Committee has the authority to approve the conditions and preliminary charges for audit services and other services offered by the auditors.
- 4. Therefore, the Audit Committee will make recommendations to the Board of Directors to propose to shareholders at the Annual General Meeting of Shareholders to approve the appointment of auditors and audit fees.
- 5. Meeting with managements and auditors as appropriate which includes any management's actions, limitations of any inspections by auditors. The Company's management and risk assessment policies, as well as significant financial risks and management's measures to control and mitigate such risks. In addition, the Audit Committee shall resolve any conflicts between management and auditors relating to financial reports. Moreover, to maintain the standard, the private meeting between auditor and audit committee is held at least once a year.

- 6. Promote and ensure the independence of auditors The Audit Committee shall discuss with the auditor about the independence of the management and the Company, including any relationship or service between the Auditor and the Company, as well as any other relationship that may affect the objectivity of the auditor.
- 7. Review the Company's financial reports, accounting standards and accounting policies, and make significant changes to accounting standards, principles or practices, including important accounting decisions that affect the Company's financial reports, including the choices, reasonableness and consequences of such decisions.
- 8. Consider connected transactions or transactions that may have conflicts of interest in accordance with the laws and regulations of the Stock Exchange Thailand. This is to ensure that such transactions are reasonable and in the best interests of the Company.
- 9. Review and approve or ratify any transaction between the Company and related parties which are required to be disclosed in accordance with the rules of the Securities and Exchange Commission.
- 10. Consider and follow up on the results of the internal control system assessment from external agencies every quarter to ensure that it is appropriate, sufficient, and to identify any potential risks. Provide additional recommendations to the management team.

The Audit Committee monitors the Company's operations in accordance with the scope of authority, duties and responsibilities assigned by using knowledge and ability with care and prudence, and independence in performing duties with good information and cooperation from the Company's management. The Audit Committee is of the opinion that the Company has prepared accurate financial reports in accordance with accounting standards and financial reporting standards. The Company discloses sufficient information about transactions or transactions that may cause conflicts of interest. There is an internal control system and an audit of the internal control system, including risk management that is appropriate to the conditions of the business. Comply with relevant laws correctly and completely, as well as comply with good corporate governance principles.

> Mrs. Pattra Supanich Chairman of the Audit Committee
